REVIEW
1284  Disulfide Formation in the ER and Mitochondria: Two Solutions to a Common Process
J. Riemer et al.

BREVIA
1288  Anthropogenic Impacts on Nitrogen Isotopes of Ice-Core Nitrate
M. G. Hastings et al.
The isotopic composition of nitrogen in nitrate deposited in Greenland has changed markedly over the past 150 years.

RESEARCH ARTICLES
1289  Regulation of Hypoxia-Inducible Factor 2α Signaling by the Stress-Responsive Deacetylase Sirtuin 1
E. M. Dioum et al.
A deacetylase implicated in aging directly regulates a transcription factor that controls stress-responsive genes.
>> Perspective p. 1281
1293  Did Warfare Among Ancestral Hunter-Gatherers Affect the Evolution of Human Social Behaviors?
S. Bowles
Prehistoric conflict among humans could have favored the survival of groups containing altruists.
>> Perspective p. 1280

REPORTS
1298  Late Pleistocene Demography and the Appearance of Modern Human Behavior
A. Powell et al.
Population size and migration account for modern human behavior appearing in Africa about 90,000 years ago but much later across Europe.
>> Perspective p. 1280
1302  Pd-Pt Bimetallic Nanodendrites with High Activity for Oxygen Reduction
B. Lim et al.
The catalytic activity of platinum is enhanced through a growth process that creates nanocrystals with high surface area.

1306  Natural Quasicrystals
L. Bindi et al.
A sample of the mineral khatyrkite contains quasicrystals, which are ordered but lack the translational symmetry of crystals.

1309  Observation of Single Colloidal Platinum Nanocrystal Growth Trajectories
H. Zheng et al.
Transmission electron microscopy provides details of the growth mechanisms of platinum nanocrystals in solution.
>> Perspective p. 1276

1312  Large-Area Synthesis of High-Quality and Uniform Graphene Films on Copper Foils
X. Li et al.
Predominantly single-layer graphene films grow in a self-limited manner on copper and can be transferred to other substrates.

1314  Superconductivity at the Two-Dimensional Limit
S. Qin et al.
Superconductivity persists in lead films down to just two monolayers thick.

1318  Social Transmission of a Host Defense Against Cuckoo Parasitism
N. B. Davies and J. A. Welbergen
Social learning and predisposition explains why reed warblers mob parasitic cuckoos but not innocuous parrots.

1320  Epigenetic Temporal Control of Mouse Hox Genes in Vivo
N. Soshnikova and D. Duboule
A time-dependent transition in chromatin modifications parallels the sequential activation of genes involved in embryo organization.

1323  McsB Is a Protein Arginine Kinase That Phosphorylates and Inhibits the Heat-Shock Regulator CtsR
J. Fuhrmann et al.
A protein kinase can specifically target arginine residues in a transcription factor to regulate its DNA binding.

1327  Rhes, a Striatal Specific Protein, Mediates Mutant-Huntingtin Cytotoxicity
S. Subramaniam et al.
A small G protein localized in the brain stratum may explain the localized neurodegeneration observed in Huntington’s disease.

1330  Mechanoenzymatic Cleavage of the Ultralarge Vascular Protein von Willebrand Factor
X. Zhang et al.
Mechanical forces regulate the length of von Willebrand factor multimers and thus regulate thrombogenic potential.
>> Perspective p. 1278

1334  Halofuginone Inhibits TH17 Cell Differentiation by Activating the Amino Acid Starvation Response
M. S. Sundrud et al.
Activation of the amino acid starvation response inhibits differentiation of a subset of inflammatory T cells.
>> Perspective p. 1282

1338  Endogenous Activation Patterns of Cdc42 GTPase Within Drosophila Embryos
D. Kamiyama and A. Chiba
Bioprobe imaging reveals precise patterns of activation for a signaling protein in the neurons of intact animals.
A Billion-Year Hard Drive

Disease Treatment

A team suggests a way to prevent plant Armageddon.

RESEARCH ARTICLE: Involvement of the Protein Kinase CK2 in the Regulation of Mammalian Circadian Rhythms

Y. Tsuchiya et al.

Protein kinase CK2 promotes PERIOD2 degradation and modulates the mammalian circadian clock.

PERSPECTIVE: Allosteric Effects Govern Nuclear Receptor Action—DNA Appears as a Player

H. Gronemeyer and W. Bourguet

DNA sequences regulate glucocorticoid receptor activity.

NETWATCH: PANTHER

Explore a database of proteins classified by function; in Bioinformatic Resources.

NETWATCH: Inside Cancer

Learn about the cell biology of cancer through interactive multimedia resources; in Educator Sites.

SCIENCECAREERS

www.sciencemag.org/career_magazine

Free Career Resources for Scientists

A Bioethicist’s Work Bridges Science, Law, and Religion

C. Wald

An erroneous conference invitation prompted Jennifer Miller to pursue a bioethics career.

Weighty Research in Microgravity

E. Pain

A physician and an engineering student are preparing experiments in microgravity for a European Space Agency competition.

SCIENCEPODCAST
