REVIEW

1284 Disulfide Formation in the ER and Mitochondria: Two Solutions to a Common Process
J. Riemer et al.

BREVIA

1288 Anthropogenic Impacts on Nitrogen Isotopes of Ice-Core Nitrate
M. G. Hastings et al.
The isotopic composition of nitrogen in nitrate deposited in Greenland has changed markedly over the past 150 years.

RESEARCH ARTICLES

1289 Regulation of Hypoxia-Inducible Factor 2α Signaling by the Stress-Responsive Deacetylase Sirtuin 1
E. M. Dioum et al.
A deacetylase implicated in aging directly regulates a transcription factor that controls stress-responsive genes.
>> Perspective p. 1281

1293 Did Warfare Among Ancestral Hunter-Gatherers Affect the Evolution of Human Social Behaviors?
S. Bowles
Prehistoric conflict among humans could have favored the survival of groups containing altruists.
>> Perspective p. 1280

REPORTS

1298 Late Pleistocene Demography and the Appearance of Modern Human Behavior
A. Powell et al.
Population size and migration account for modern human behavior appearing in Africa about 90,000 years ago but much later across Europe.
>> Perspective p. 1280

1302 Pd-Pt Bimetallic Nanodendrites with High Activity for Oxygen Reduction
B. Lim et al.
The catalytic activity of platinum is enhanced through a growth process that creates nanocrystals with high surface area.

1306 Natural Quasicrystals
L. Bindi et al.
A sample of the mineral khatyrkite contains quasicrystals, which are ordered but lack the translational symmetry of crystals.

1309 Observation of Single Colloidal Platinum Nanocrystal Growth Trajectories
H. Zheng et al.
Transmission electron microscopy provides details of the growth mechanisms of platinum nanocrystals in solution.
>> Perspective p. 1276

1312 Large-Area Synthesis of High-Quality and Uniform Graphene Films on Copper Foils
X. Li et al.
Predominantly single-layer graphene films grow in a self-limited manner on copper and can be transferred to other substrates.

1314 Superconductivity at the Two-Dimensional Limit
S. Qin et al.
Superconductivity persists in lead films down to just two monolayers thick.

1318 Social Transmission of a Host Defense Against Cuckoo Parasitism
N. B. Davies and J. A. Welbergen
Social learning and predisposition explains why reed warblers mob parasitic cuckoos but not innocuous parrots.

1320 Epigenetic Temporal Control of Mouse Hox Genes in Vivo
N. Sosnikova and D. Duboule
A time-dependent transition in chromatin modifications parallels the sequential activation of genes involved in embryo organization.

1323 McsB Is a Protein Arginine Kinase That Phosphorylates and Inhibits the Heat-Shock Regulator CtsR
J. Fuhrmann et al.
A protein kinase can specifically target arginine residues in a transcription factor to regulate its DNA binding.

1327 Rhes, a Striatal Specific Protein, Mediates Mutant-Huntingtin Cytotoxicity
S. Subramaniam et al.
A small G protein localized in the brain striatum may explain the localized neurodegeneration observed in Huntington’s disease.

1330 Mechanoenzymatic Cleavage of the Ultralarge Vascular Protein von Willebrand Factor
X. Zhang et al.
Mechanical forces regulate the length of von Willebrand factor multimers and thus regulate thrombogenic potential.
>> Perspective p. 1278

1334 Halofuginone Inhibits Tα17 Cell Differentiation by Activating the Amino Acid Starvation Response
M. S. Sundrud et al.
Activation of the amino acid starvation response inhibits differentiation of a subset of inflammatory T cells.
>> Perspective p. 1282

1338 Endogenous Activation Patterns of Cdc42 GTPase Within Drosophila Embryos
D. Kamiyama and A. Chiba
Bioprobe imaging reveals precise patterns of activation for a signaling protein in the neurons of intact animals.

CONTENTS continued >>
A team suggests a way to prevent plant Armageddon. That Switches TNF-Induced Cell Death from Lysis to Necrosis

The protein kinase RIP3 mediates necrotic cell death, likely through regulation of metabolic enzymes.

A. Pushp et al. Scanning tunneling spectroscopy reveals strong electronic correlations in the insulating state of a cuprate superconductor.

PERSPECTIVE: Allosteric Effects Govern Nuclear Receptor Action—DNA Appears as a Player

H. Gronemeyer and W. Bourguet DNA sequences regulate glucocorticoid receptor activity.

NETWATCH: PANTHER

Explore a database of proteins classified by function; in Bioinformatic Resources.

NETWATCH: Inside Cancer

Learn about the cell biology of cancer through interactive multimedia resources; in Educator Sites.

SCIENCECAREERS

Science Policy News and Analysis

Jessica Gorman

Human origins, the origin of sexual reproduction, and the evolution of social behavior.

Supported by the American Association for the Advancement of Science (AAAS), Science is one of the world’s preeminent general-interest science journals. Science is a publication of the American Association for the Advancement of Science (AAAS). The title SCIENCE is a registered trademark of the AAAS. Domestic individual membership and subscription (51 issues): $835; Foreign postage extra: Mexico, Caribbean (surface mail) $55; other countries (air assist delivery) $85. First class, airmail, student, and emeritus rates on request. Canadian rates with GST available upon request, GST #1254 88122. Publica-
tions Mail Agreement Number 1069624. Printed in the U.S.A.

Change of address: Allow 4 weeks, giving old and new addresses and 8-digit account number. Postmaster: Send change of address to AAAS, P.O. Box 96378, Washington, DC 20090–6378. Single-copy sales: $10.00 current issue, $15.00 back issue prepaid plus surface postage, bulk rates on request. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that $12.00 per article is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923. The identifi-
cation code for Science is 0036-8075. Science is indexed in the Reader’s Guide to Period-
ical Literature and in several specialized indexes.
