REVIEW

1284 Disulfide Formation in the ER and Mitochondria: Two Solutions to a Common Process
J. Riemer et al.

BREVIA

1288 Anthropogenic Impacts on Nitrogen Isotopes of Ice-Core Nitrate
M. G. Hastings et al.
The isotopic composition of nitrogen in nitrate deposited in Greenland has changed markedly over the past 150 years.

RESEARCH ARTICLES

1289 Regulation of Hypoxia-Inducible Factor 2α Signaling by the Stress-Responsive Deacetylase Sirtuin 1
E. M. Dioum et al.
A deacetylase implicated in aging directly regulates a transcription factor that controls stress-responsive genes.

1293 Did Warfare Among Ancestral Hunter-Gatherers Affect the Evolution of Human Social Behaviors?
S. Bowles
Prehistoric conflict among humans could have favored the survival of groups containing altruists.

REPORTS

1298 Late Pleistocene Demography and the Appearance of Modern Human Behavior
A. Powell et al.
Population size and migration account for modern human behavior appearing in Africa about 90,000 years ago but much later across Europe.

1302 Pd-Pt Bimetallic Nanodendrites with High Activity for Oxygen Reduction
B. Lim et al.
The catalytic activity of platinum is enhanced through a growth process that creates nanocrystals with high surface area.

1306 Natural Quasicrystals
L. Bindi et al.
A sample of the mineral khatyrkite contains quasicrystals, which are ordered but lack the translational symmetry of crystals.

1309 Observation of Single Colloidal Platinum Nanocrystal Growth Trajectories
H. Zheng et al.
Transmission electron microscopy provides details of the growth mechanisms of platinum nanocrystals in solution.

1312 Large-Area Synthesis of High-Quality and Uniform Graphene Films on Copper Foils
X. Li et al.
Predominantly single-layer graphene films grow in a self-limited manner on copper and can be transferred to other substrates.

1314 Superconductivity at the Two-Dimensional Limit
S. Qin et al.
Superconductivity persists in lead films down to just two monolayers thick.

1318 Social Transmission of a Host Defense Against Cuckoo Parasitism
N. B. Davies and J. A. Welbergen
Social learning and predisposition explains why reed warblers mob parasitic cuckoos but not innocuous parrots.

1320 Epigenetic Temporal Control of Mouse Hox Genes in Vivo
N. Soshnikova and D. Duboule
A time-dependent transition in chromatin modifications parallels the sequential activation of genes involved in embryo organization.

1323 McsB Is a Protein Arginine Kinase That Phosphorylates and Inhibits the Heat-Shock Regulator CtsR
J. Fuhrmann et al.
A protein kinase can specifically target arginine residues in a transcription factor to regulate its DNA binding.

1327 Rhes, a Striatal Specific Protein, Mediates Mutant-Huntingtin Cytotoxicity
S. Subramaniam et al.
A small G protein localized in the brain striatum may explain the localized neurodegeneration observed in Huntington’s disease.

1330 Mechanoenzymatic Cleavage of the Ultralarge Vascular Protein von Willebrand Factor
X. Zhang et al.
Mechanical forces regulate the length of von Willebrand factor multimers and thus regulate thrombogenic potential.

1334 Halofuginone Inhibits Th17 Cell Differentiation by Activating the Amino Acid Starvation Response
M. S. Sundrud et al.
Activation of the amino acid starvation response inhibits differentiation of a subset of inflammatory T cells.

1338 Endogenous Activation Patterns of Cdc42 GTPase Within Drosophila Embryos
D. Kamiyama and A. Chiba
Bioprobe imaging reveals precise patterns of activation for a signaling protein in the neurons of intact animals.

Amplified Trace Gas Removal in the Troposphere

A. Hofzumahaus et al.

A yet undescribed pathway for hydroxyl radical production is needed to account for reaction rates of highly polluted air.

10.1126/science.1164566

Extending Universal Nodal Excitations Optimizes Superconductivity in Bi$_2$Sr$_2$CaCu$_2$O$_{8+\delta}$

A. Pushp et al.

Scanning tunneling spectroscopy reveals strong electronic correlations in the insulating state of a cuprate superconductor.

10.1126/science.1174338

Auxin-Dependent Patterning and Game Specification in the Arabidopsis Female Gametophyte

G. C. Pagnussat et al.

An auxin gradient is involved in cell fate specification of the female sex cells in flowering plants.

10.1126/science.1167324

IRAP Identifies an Endosomal Compartment Required for MHC Class I Cross-Presentation

L. Saveanu et al.

Immunological dendritic cells contain an endocytic compartment involved in the cross-presentation of internalized antigens.

10.1126/science.1172845

RIP3, an Energy Metabolism Regulator That Switches TNF-Induced Cell Death from Apoptosis to Necrosis

D.-W. Zhang et al.

The protein kinase RIP3 mediates necrotic cell death, likely through regulation of metabolic enzymes.

10.1126/science.1172308
