Department of Health and Human Services
National Institutes of Health
National Institute on Aging
Intramural Research Program

Staff Scientist - Animal Program Director

The National Institute on Aging (NIA), a major research component of the National Institutes of Health (NIH) and Department of Health and Human Services (DHHS), is recruiting for a Staff Scientist-Facility Head who will serve as the Animal Program Director for the NIA Intramural Research Program (IRP). The incumbent will be responsible for an AAALAC accredited animal care and use program and for support of the animal research programs in the Institute, studying animal models of development and aging, and interventions to prevent or alleviate aging-related deficits. The supervisory and regulatory responsibilities of this position require the applicant to hold a veterinary degree (D.V.M., V.M.D., or equivalent degree) with certification or eligibility for board certification in laboratory animal medicine or veterinary pathology.

Applicants must have a proven record of management of an animal research program and demonstrated experience with the regulatory aspects of animal welfare. The expertise and experience should include, but not be limited to interaction and cooperation with scientific staff in a manner that promotes and facilitates their scientific programs. Duties will include cost-effective breeding and maintaining numerous transgenic and knockout lines (currently in excess of 600) including “difficult” lines, collaboration with scientific staff in effective production and import of new genetically manipulated lines, and, especially, in maintaining a current and accurate database on the colony status. The incumbent will take primary responsibility for the clinical aspects of the animal program and will oversee animal health surveillance and maintain both a barrier facility and a quarantine area. The incumbent will perform animal surgery and teach appropriate procedures to animal care and technical staff.

Salary is commensurate with experience and accomplishments. The salary range for Staff Scientists is \$87,000 - \$171,257. A full Civil Service package of benefits (including retirement, health, life and long term care insurance, Thrift Savings Plan, etc.) is available. Additional information regarding the NIA, IRP and the RRB is available at the following websites: <http://www.grc.nia.nih.gov> and <http://grc.nia.nih.gov/branches/rrb/rrb.htm>. To apply: Please send a cover letter, curriculum vitae, bibliography, statement of research interests, and three letters of recommendation to: Peggy Grothe, Intramural Program Specialist; Office of the Scientific Director; National Institute on Aging, 251 Bayview Boulevard, Suite 100-Room 04C232, Baltimore, MD 21224-6825. Position will remain open until filled; however, application reviews will begin **August 1, 2009**. Please include the following vacancy number in all correspondence: Vacancy # NIA-IRP-09-06. If additional information is needed, please call 410-558-8012 or email: grothep@mail.nih.gov.

DHHS and NIH are Equal Opportunity Employers

**Max Planck Institute
for Demographic Research**

Directors: Prof. James W. Vaupel – Prof. Joshua R. Goldstein

To synthesize insights from mathematical demography and evolutionary biology, the Max Planck Institute for Demographic Research is pursuing new initiatives in the

Quantitative Analysis of Age-Specific Life-History Evolution.

The institute is looking to recruit promising scientists from diverse disciplines at the

PhD, Post-Doc, and Research Scientist levels.

The successful candidates will join a thriving Laboratory of Evolutionary Biodemography, where they will interact across disciplines with 20 other scientists, all of whom are committed to understanding how evolution can shape age-specific patterns of mortality and fertility. The research program aims to tackle this common goal by combining insights from diverse fields, including demography, life history, biology, ecology, mathematics, statistics, and actuarial science. We foster the exchange of ideas between those working both theoretically and empirically, and we aim to cultivate a range of complementary studies which use field and lab data and are based on comparative and analytical approaches. To consider a wide range of possible evolutionary outcomes, we work with a broad selection of study organisms including mammals, birds, fish, invertebrates, and plants. We will consider flexible, open appointments for strong candidates with appropriate backgrounds and relevant interests. Further information can be found at www.demogr.mpg.de. Applications should include a CV with a statement of academic interests and relevant experience, details of all qualifications including grades, a list of any publications and the contact details of 3 referees.

Review of applications will begin on 15th June 2009. PhD positions will typically start in September or October 2009, and other positions will start as soon as possible after appointment. PhD and Postdoc appointments are made on doctoral and postdoctoral stipends respectively.

Research scientists will be employed up to salary level 15 on the basis of the German TVöD system according to the qualification of the candidate and in accordance with the rules of federal employees in Germany.

The Max Planck Society wishes to increase the share of women in areas where they are underrepresented, and strongly encourages women to apply.

The Max Planck Society is committed to employing more handicapped individuals and especially encourages them to apply.

Please send all materials (by e-mail) to Prof. James W. Vaupel, Director of the Max Planck Institute for Demographic Research, at: appl-evodemo@demogr.mpg.de.
