COVER
The current global outbreak of influenza A (H1N1) in humans appears to have originated in Mexico from infected pigs. The cover portrait is of “Patient Zero” from La Gloria, Veracruz, who is now well. Fraser et al. (page 1557) report on an initial epidemiological analysis and offer baseline estimates for transmissibility while acknowledging the prevailing uncertainties at this early stage of the epidemic.

REVIEW
1530  Graphene: Status and Prospects
        A. K. Geim

BREVIA
1535  Sexual Intercourse Involving Giant Sperm in Cretaceous Ostracode
        R. Matzke-Karasz et al.
        Giant ostracode sperm date back at least 100 million years ago.

RESEARCH ARTICLE
1536  Synapse- and Stimulus-Specific Local Translation During Long-Term Neuronal Plasticity
        D. O. Wang et al.
        Live-cell microscopy reveals local translation during long-term facilitation of Aplysia sensory-motor synapses.
        >> Perspective p. 1527

REPORTS
1540  Solar-Like Oscillations in a Massive Star
        K. Belkacem et al.
        A huge star has been discovered that shows a variety of regular patterns of pulsation.
1542  Colloidal Quantum-Dot Photodetectors Exploiting Multielectron Generation
        V. Sukhovatkin et al.
        Decay of multiple electron-hole pairs, a hindrance in photovoltaic design, proves a boon to sensitivity in a photoconductive detector.
1545  Aggregation-Induced Dissociation of HCl(H2O)4 Below 1 K: The Smallest Droplet of Acid
        A. Gutberlet et al.
        Just four water molecules are sufficient to dissolve the acid HCl into a charged ion pair of proton and chloride.
        >> Perspective p. 1522
1548  Beryllium Dimer—Caught in the Act of Bonding
        J. M. Merritt et al.
        High-resolution spectroscopy maps out the unusual ground state electronic potential of the beryllium dimer.
        >> Perspective p. 1526
1551  Atmospheric Carbon Dioxide Concentration Across the Mid-Pleistocene Transition
        B. Hönisch et al.
        The concentration of CO2 in the atmosphere has been relatively stable over the past 2.1 million years and never as high as it is today.
1554  Fossil Plant Relative Abundances Indicate Sudden Loss of Late Triassic Biodiversity in East Greenland
        J. C. McElwain et al.
        Plant fossils from East Greenland record an abrupt decrease in abundance as CO2 levels increased.

1557  Pandemic Potential of a Strain of Influenza A (H1N1): Early Findings
        C. Fraser et al.
        An international collaborative effort has analyzed the initial dynamics of the swine flu outbreak.
1561  Rapid and Accurate Large-Scale Coestimation of Sequence Alignments and Phylogenetic Trees
        K. Liu et al.
        A step-wise algorithm iteratively wraps sequence alignment around a phylogenetic tree to reduce bias caused by errors.
        >> Perspective p. 1528
1565  Structure and Mechanism of an Amino Acid Antiporter
        X. Gao et al.
        The architecture of a membrane protein channel helps explain how Escherichia coli survive the acidic conditions of the stomach.
1569  IL-21 Is Required to Control Chronic Viral Infection
        H. Elsaesser et al.
        Interleukin-21 produced by CD4+ T cells helps CD8+ T cells control viral infection in a mouse model.
        >> Perspective p. 1525
1572  A Vital Role for Interleukin-21 in the Control of a Chronic Viral Infection
        J. S. Yi et al.
        The cytokine interleukin-21 has a profound impact on virus-specific T cell responses to chronic infections in mice.
        >> Perspective p. 1525
1576  IL-21R on T Cells Is Critical for Sustained Functionality and Control of Chronic Viral Infection
        A. Fröhlich et al.
        Thymus cells of the immune system require the cytokine interleukin-21 to control chronic viral infections.
        >> Perspective p. 1525
1580  Merkel Cells Are Essential for Light-Touch Responses
        S. M. Maricich et al.
        In the skin, special cells with specific properties endow their afferent nerves with the ability to resolve fine spatial details.
        >> Science Podcast
1583  Recruitment of an Area Involved in Eye Movements During Mental Arithmetic
        A. Knops et al.
        Addition and subtraction are encoded in the same part of the brain that is responsible for eye movements and spatial attention.

Response to Comments on "Experimental Test of Self-Shielding in Vacuum Ultraviolet Photodissociation of CO"
J. R. Lyons et al.

...Consistency Between Satellite-Derived and Modeled Estimates of the Direct Aerosol Effect
G. Myhre
... 
Observational data and modeling narrows the large range of uncertainty about how much aerosols influence climate.

Comment on "Experimental Test of Self-Shielding in Vacuum Ultraviolet Photodissociation of CO"
J. R. Lyons et al.

...Translocator Protein (18 kD) as Target for Side Effects
R. Rupprecht et al.
...Possible drug alternative for rapid treatment of anxiety disorders could replace benzodiazepines.

Comment on "Experimental Test of Self-Shielding in Vacuum Ultraviolet Photodissociation of CO"
S. R. Federman and E. D. Young

...Distinct anchoring proteins enable cAMP signaling to selectively modulate macrophage responses to pathogens.

PROTOCOL: Using a Microfluidic Device for High-Content Analysis of Cell Signaling
R. Cheong et al.
...This method for analyzing individual cells reveals differences in responses masked by averaging across the population.

Successful Conservation of a Threatened Maculinea Butterfly
J. A. Thomas et al.
...Prediction of population dynamics in relation to habitat requirements has led to a conservation success in the UK.

Penumbral Structure and Outflows in Simulated Sunspots
M. Rempel et al.
...Simulations of sunspots show that their structure and outflows can be understood in terms of convection in a magnetic field.

Consistency Between Satellite-Derived and Modeled Estimates of the Direct Aerosol Effect
G. Myhre
...Observational data and modeling narrows the large range of uncertainty about how much aerosols influence climate.

Comment on "Experimental Test of Self-Shielding in Vacuum Ultraviolet Photodissociation of CO"
S. K. Maji et al.

...Peptide and protein hormones are stored in secretory granules in a non-pathological amyloid conformation.

Functional Amyloids as Natural Storage of Peptide Hormones in Pituitary Secretory Granules
S. K. Maji et al.
...Peptide and protein hormones are stored in secretory granules in a non-pathological amyloid conformation.

Translocator Protein (18 kD) as Target for Anxiolytics Without Benzodiazepine-Like Side Effects
R. Rupprecht et al.
...Possible drug alternative for rapid treatment of anxiety disorders could replace benzodiazepines.

Comment on "Experimental Test of Self-Shielding in Vacuum Ultraviolet Photodissociation of CO"
S. R. Federman and E. D. Young

...Distinct anchoring proteins enable cAMP signaling to selectively modulate macrophage responses to pathogens.

RESEARCH ARTICLE: Suppression of LPS-Induced TNF-α Production in Macrophages by cAMP Is Mediated by PKA-APKAP95-p105
E. A. Wall et al.

...Perspective: Putting on the Brakes—Cyclic AMP as a Multipronged Controller of Macrophage Function
M. Peters-Golden
...Distinct anchoring proteins enable cAMP signaling to selectively modulate macrophage responses to pathogens.

PROTOCOL: Using a Microfluidic Device for High-Content Analysis of Cell Signaling
R. Cheong et al.
...This method for analyzing individual cells reveals differences in responses masked by averaging across the population.
