TECHNICAL COMMENT ABSTRACTS

BOOKS ET AL.
1517  Sustainable Energy
   D. MacKay, reviewed by M. Hoffert
1518  First Peoples in a New World
   D. J. Meltzer, reviewed by T. Flannery

POLICY FORUM
1519  Nutrient Imbalances in Agricultural Development
   P. M. Vitousek et al.

PERSPECTIVES
1521  No Place Too Cold
   J. Laybourn-Parry
   >> Perspective p. 1523
1522  Squeezing the Water Out of HCI(aq)
   T. S. Zwier
   >> Report p. 1545
1523  Thriving in Salt
   A. Boettius and S. Joye
   >> Perspective p. 1521
1525  A Chronic Need for IL-21
   L. D. S. Johnson and S. C. Jameson
   >> Reports pp. 1569, 1572, and 1576
1526  Extracting Potentials from Spectra
   P. F. Bernath
   >> Report p. 1548
1527  Bridging the Gap and Staying Local
   M. Korte
   >> Research Article p. 1536
1528  Uniting Alignments and Trees
   A. Lüötyynoja and N. Goldman
   >> Report p. 1561

REVIEW
1530 Graphene: Status and Prospects
A. K. Geim

BREVIA
1535 Sexual Intercourse Involving Giant Sperm in Cretaceous Ostracode
R. Matzke-Karasz et al.
Giant ostracode sperm date back at least 100 million years ago.

RESEARCH ARTICLE
1536 Synapse- and Stimulus-Specific Local Translation During Long-Term Neuronal Plasticity
D. O. Wang et al.
Live-cell microscopy reveals local translation during long-term facilitation of Aplysia sensory-motor synapses.

REPORTS
1540 Solar-Like Oscillations in a Massive Star
K. Belkacem et al.
A huge star has been discovered that shows a variety of regular patterns of pulsation.

1542 Colloidal Quantum-Dot Photodetectors Exploiting Multielectron Generation
V. Sukhovatkin et al.
Decay of multiple electron-hole pairs, a hindrance in photovoltaic design, proves a boon to sensitivity in a photoconductive detector.

1545 Aggregation-Induced Dissociation of HCl(H_2O)_4 Below 1 K: The Smallest Droplet of Acid
A. Gutberlet et al.
Just four water molecules are sufficient to dissolve the acid HCl into a charged ion pair of proton and chloride.

1548 Beryllium Dimer—Caught in the Act of Bonding
J. M. Merritt et al.
High-resolution spectroscopy maps out the unusual ground state electronic potential of the beryllium dimer.

1551 Atmospheric Carbon Dioxide Concentration Across the Mid-Pleistocene Transition
B. Hönisch et al.
The concentration of CO_2 in the atmosphere has been relatively stable over the past 2.1 million years and never as high as it is today.

1554 Fossil Plant Relative Abundances Indicate Sudden Loss of Late Triassic Biodiversity in East Greenland
J. C. McElwain et al.
Plant fossils from East Greenland record an abrupt decrease in abundance as CO_2 levels increased.

1557 Pandemic Potential of a Strain of Influenza A (H1N1): Early Findings
C. Fraser et al.
An international collaborative effort has analyzed the initial dynamics of the swine flu outbreak.

1561 Rapid and Accurate Large-Scale Coestimation of Sequence Alignments and Phylogenetic Trees
K. Liu et al.
A step-wise algorithm iteratively wraps sequence alignment around a phylogenetic tree to reduce bias caused by errors.

1565 Structure and Mechanism of an Amino Acid Antiporter
X. Gao et al.
The architecture of a membrane protein channel helps explain how Escherichia coli survive the acidic conditions of the stomach.

1569 IL-21 Is Required to Control Chronic Viral Infection
H. Elsaesser et al.
Interleukin-21 produced by CD4^+ T cells helps CD8^+ T cells control viral infection in a mouse model.

1572 A Vital Role for Interleukin-21 in the Control of a Chronic Viral Infection
J. S. Yi et al.
The cytokine interleukin-21 has a profound impact on virus-specific T cell responses to chronic infections in mice.

1576 IL-21R on T Cells Is Critical for Sustained Functionality and Control of Chronic Viral Infection
A. Fröhlich et al.
Thymus cells of the immune system require the cytokine interleukin-21 to control chronic viral infections.

1580 Merkel Cells Are Essential for Light-Touch Responses
S. M. Maricich et al.
In the skin, special cells with specific properties endow their afferent nerves with the ability to resolve fine spatial details.

1583 Recruitment of an Area Involved in Eye Movements During Mental Arithmetic
A. Knops et al.
Addition and subtraction are encoded in the same part of the brain that is responsible for eye movements and spatial attention.
