COVER
Skeletons of turtle, chicken, and mouse. The turtle body plan is unusual in that the ribs are transformed into a carapace, and the scapula, situated outside the ribs in other animals, is found inside the carapace. A report on page 193 explains the evolutionary origin of this inside-out skeletal morphology.

Drawings: Hiroshi Nagashima

RESEARCH ARTICLE
167  Cell Growth and Size Homeostasis in Proliferating Animal Cells
A. Tzur et al.
Lymphoblasts grow slowly after mitosis, then reach a constant exponential rate, indicating an active size-control mechanism.
>> Perspective p. 158

REPORTS
171  Penumbral Structure and Outflows in Simulated Sunspots
M. Rempel et al.
Simulations of sunspots show that their structure and outflows can be understood in terms of convection in a magnetic field.
>> Perspective p. 155
174  Quantum Walk in Position Space with Single Optically Trapped Atoms
M. Karski et al.
A single cesium atom trapped in an optical lattice is used to illustrate a quantum walk.
178  Experimental Realization of a Three-Dimensional Topological Insulator, Bi$_2$Te$_3$
Y. L. Chen et al.
Bi$_2$Te$_3$ is identified as a three-dimensional topological insulator with a single metallic surface state.
181  Dynamics of Chemical Bonding Mapped by Energy-Resolved 4D Electron Microscopy
F. Carbone et al.
Femtosecond tracking of an electron probe beam reveals correlated electronic and nuclear motion in laser-heated graphite.
184  Manganese- and Iron-Dependent Marine Methane Oxidation
E. J. Beal et al.
Methane oxidation in marine sediments can be driven by electron acceptors like iron or manganese, not only by sulfate.
187  Consistency Between Satellite-Derived and Modeled Estimates of the Direct Aerosol Effect
G. Myhre
Observational data and modeling narrows the large range of uncertainty about how much aerosols influence climate.
>> Perspective p. 153
191  Nonvolcanic Tremor Evolution and the San Simeon and Parkfield, California, Earthquakes
R. M. Nadeau and A. Guilhem
Small repeating earthquakes increased and have become periodic on the San Andreas Fault near one end of a major historic rupture.

193  Evolution of the Turtle Body Plan by the Folding and Creation of New Muscle Connections
H. Nagashima et al.
The turtle body plan, unique among amniotes, is based on the folding of an ancestral pattern during embryogenesis.

197  Antigenic and Genetic Characteristics of Swine-Origin 2009 A(H1N1) Influenza Viruses Circulating in Humans
R. J. Garten et al.
Evolutionary analysis suggests a triple reassortant avian-to-pig origin for the 2009 influenza A(H1N1) outbreak.

201  Caloric Restriction Delays Disease Onset and Mortality in Rhesus Monkeys
R. J. Colman et al.
Age-associated death and onset of pathologies are delayed by controlled caloric restriction, thus prolonging life span.

204  Discovery of Swine as a Host for the Reston ebolavirus
R. W. Barrette et al.
Respiratory infections in pigs in the Philippines are associated with a cocktail of viruses, including a monkey filovirus.
>> Science Podcast

207  Induction of Synaptic Long-Term Potentiation After Opioid Withdrawal
R. Drdla et al.
Withdrawal from opioids in rats induces an increase in synaptic strength in pain pathways and thereby enhances pain sensitivity.

210  A Functional Role for Adult Hippocampal Neurogenesis in Spatial Pattern Separation
C. D. Clelland et al.
Disruption of neurogenesis in a neuron-forming site in the brain impairs spatial memory functions in mice.

213  IRAP Identifies an Endosomal Compartment Required for MHC Class I Cross-Presentation
L. Saveanu et al.
Immunological dendritic cells contain an endocytic compartment involved in the cross-presentation of internalized antigens.

217  Hematopoietic Cytokines Can Instruct Lineage Choice
M. A. Rieger et al.
Single-cell tracking proves that physiological cytokines determine the developmental fate of hematopoietic progenitor cells.
