393 CORRECTIONS AND CLARIFICATIONS

CONTENTS continued >>
Structural Origin of Circularly Polarized Iridescence in Jeweled Beetles
V. Sharma et al.
The cellular ordering in the exoskeleton of a beetle is analogous to the molecular ordering in cholesteric liquid crystals.
>> Perspective p. 398

Chiral Isotropic Liquids from Achiral Molecules
L. E. Hough et al.
Banana-shaped molecules lacking handedness form a macroscopically isotropic fluid that still has overall chirality.
>> Perspective p. 402

Heat Exchange from the Toucan Bill Reveals a Controllable Vascular Thermal Radiator
G. J. Tattersall et al.
Toucans alter blood flow to their massive bills according to ambient conditions.

Synchronous and Stochastic Patterns of Gene Activation in the Drosophila Embryo
A. N. Boettiger and M. Levine
Synchronous activation of genes with stalled RNA polymerase improves transcriptional coordination.

A Gene Network Regulating Lysosomal Biogenesis and Function
M. Sardiello et al.
Coordination of the genes that regulate lysosomal biogenesis occurs via a shared sequence motif and one transcription factor.

An ER-Mitochondria Tethering Complex Revealed by a Synthetic Biology Screen
B. Kornmann et al.
A protein complex zippers mitochondria to endoplasmic reticulum for phospholipid transfer.
>> Perspective p. 403

Anxiolytics Without Benzodiazepine-Like Side Effects
R. Rupprecht et al.
Possible drug alternative for rapid treatment of anxiety disorders could replace benzodiazepines.

>> Perspective p. 400

Translocator Protein (18 kD) as Target for Anxiolytics Without Benzodiazepine-Like Side Effects
R. Rupprecht et al.
Possible drug alternative for rapid treatment of anxiety disorders could replace benzodiazepines.

>> Perspective p. 403

Pathogenesis and Transmission of Swine-Origin 2009 (H1N1) Influenza Virus in Ferrets
V. J. Munster et al.
Animal experiments compare the dynamics and effects of the virus causing the 2009 flu outbreak to those of seasonal H1N1 flu.

Chlamydomonas Swims with Two "Gears"
in a Eukaryotic Version of Run-and-Tumble Locomotion
M. Polin et al.
Algal cilia beat synchronously for forward movement and asynchronously for turning.
>> Perspective p. 400

Transmission and Pathogenesis of Swine-Origin 2009 (H1N1) Influenza Viruses in Ferrets and Mice
T. R. Maines et al.
Animal experiments compare the dynamics and effects of the virus causing the 2009 flu outbreak to those of seasonal H1N1 flu.

Pathogenesis and Transmission of Swine-Origin 2009 (H1N1) Influenza Virus in Ferrets
V. J. Munster et al.
Animal experiments compare the dynamics and effects of the virus causing the 2009 flu outbreak to those of seasonal H1N1 flu.

ê-Ray Emission Region in the Central Engine of a Radio Galaxy
The VERITAS Collaboration et al.
Particles are accelerated to very high energies in close proximity to a super-massive black hole.
>> Perspective p. 399

Chiral Isotropic Liquids from Achiral Molecules
L. E. Hough et al.
Banana-shaped molecules lacking handedness form a macroscopically isotropic fluid that still has overall chirality.
>> Perspective p. 402
When decimated by humans, elephants turn in the Family Elephants Don’t Always Keep It adverse mental effects after hearing bad news.

High-speed videos reveal secret to raindrop size. Exploding Parachute How a Raindrop Is Like an
