COVER
Among the contrasts in scale between academic and industrial chemistry is the latter field’s use of raw materials by the trainload. This week’s special section, beginning on page 691, elaborates on the challenges and opportunities in industrial chemistry as the field embarks on its second century of development.

Unexpected Epoxide Formation in the Gas-Phase Photooxidation of Isoprene
F. Paulot et al.
The oxidation of isoprene in the absence of nitric oxide produces epoxides that can facilitate the formation of organic aerosols.  
>> Perspective p. 687

Phylogenetic Conservatism of Extinctions in Marine Bivalves
K. Roy et al.
Extinction rates of fossil bivalves tended to be higher in certain lineages and were influenced by prior events.  

Genetic Properties of the Maize Nested Association Mapping Population
M. D. McMullen et al.
Outcrossing vigor in maize is most likely due to retained variability in regions around the centromeres.  
>> Perspective p. 688

Multiscale Mechanics of Fibrin Polymer: Gel Stretching with Protein Unfolding and Loss of Water
A. E. X. Brown et al.
Protein unfolding in stretched fibrin blood clots creates porous gels that can withstand high strains.  

The C-Ala Domain Brings Together Editing and Aminoacylation Functions on One tRNA
M. Guo et al.
Many alanyl–transfer RNA synthetases contain a domain that promotes aminoacylation and editing of transfer RNA.  

Generalized Models Reveal Stabilizing Factors in Food Webs
T. Gross et al.
Analysis of several billion replicates of food webs reveals universal topological rules affecting their stability.  

Spinal Endocannabinoids and CB$_1$ Receptors Mediate C-Fiber–Induced Heterosynaptic Pain Sensitization
A. J. Pernía-Andrade et al.
Noxious stimulation releases endocannabinoids in the spinal cord that may promote, rather than inhibit, the perception of pain.  

An Alternative DNA Structure Is Necessary for Pilin Antigenic Variation in Neisseria gonorrhoeae
L. A. Cahoon and H. S. Seifert
A guanine quartet DNA structure regulates antigenic variation in Neisseria gonorrhoeae.

Entropy Landscape of Phase Formation Associated with Quantum Criticality in Sr$_3$Ru$_2$O$_7$

A. W. Rost et al.
The thermodynamic properties of strongly correlated electron systems can be probed near their quantum critical point.

Complete Methods Set for Scalable Ion Trap Quantum Information Processing

J. P. Home et al.
Coupling of different ions creates states that are insensitive to stray magnetic fields and more robust for quantum computing.

Six Risks of Climate Engineering

G. C. Hegerl and S. Solomon
Observations indicate that attempts to limit climate warming by reducing incoming shortwave radiation risk major precipitation changes.

Cellular Basis of Itch Sensation

Y.-G. Sun et al.
Itch, but not pain sensation, is abolished by selective ablation of a small subpopulation of spinal neurons.

Glucose Deprivation Contributes to the Development of KRAS Pathway Mutations in Tumor Cells

J. Yun et al.
Glucose deprivation can drive the acquisition of certain oncogenic mutations in human cancer cells.

Poly(ADP-ribose)−Dependent Regulation of DNA Repair by the Chromatin Remodeling Enzyme ALC1

D. Ahel et al.
A chromatin remodeling complex targeted by poly(ADP ribosylation plays a role in DNA repair.

The Ups and Downs of Doing a Postdoc in Europe

L. Laursen
A postdoc abroad can mean logistical hurdles, but also a rewarding experience.

About the Postdoc Mess

L. Laursen
A postdoc abroad can mean logistical hurdles, but also a rewarding experience.

Two new initiatives seek to prepare postdocs

but also a rewarding experience.

A postdoc abroad can mean logistical hurdles,
but also a rewarding experience.
