COVER
Among the contrasts in scale between academic and industrial chemistry is the latter field’s use of raw materials by the trainload. This week’s special section, beginning on page 691, elaborates on the challenges and opportunities in industrial chemistry as the field embarks on its second century of development.

BREVIA

709  Kepler’s Optical Phase Curve of the Exoplanet HAT-P-7b
W. J. Borucki et al.
The Kepler mission is performing at the level required to detect Earth-size planets orbiting solar-type stars.

RESEARCH ARTICLES

710  The Last Glacial Maximum
P. U. Clark et al.
Regional patterns are presented of the timing of ice-sheet and mountain-glacier maxima near the end of the last ice age.

714  The Genetic Architecture of Maize Flowering Time
E. S. Buckler et al.
Assaying nearly a million plants reveals that maize flowering time is not controlled by a large effect at any single locus.
>> Perspective p. 688

REPORTS

719  Measuring the Cosmic-Ray Acceleration Efficiency of a Supernova Remnant
E. A. Helder et al.
The pressure induced by cosmic rays produced by the explosion of a star exceeds the thermal pressure behind the shock wave.
>> Perspective p. 683

722  Emulation of a Quantum Spin with a Superconducting Phase Qudit
M. Neeley et al.
A multilevel superconducting device is used to emulate the manipulation of quantum spin systems.
>> Perspective p. 689

725  Folding DNA into Twisted and Curved Nanoscale Shapes
H. Dietz et al.
Site-directed insertions and deletions of base pairs direct twist and curvature in crystal-like DNA arrays.
>> Perspective p. 685; Science Podcast

730  Unexpected Epoxide Formation in the Gas-Phase Photooxidation of Isoprene
F. Paulot et al.
The oxidation of isoprenes in the absence of nitric oxide produces epoxides that can facilitate the formation of organic aerosols.
>> Perspective p. 687

733  Phylogenetic Conservatism of Extinctions in Marine Bivalves
K. Roy et al.
Extinction rates of fossil bivalves tended to be higher in certain lineages and were influenced by prior events.

737  Genetic Properties of the Maize Nested Association Mapping Population
M. D. McMullen et al.
Outcrossing vigor in maize is most likely due to retained variability in regions around the centromeres.
>> Perspective p. 688

741  Multiscale Mechanics of Fibrin Polymer: Gel Stretching with Protein Unfolding and Loss of Water
A. E. X. Brown et al.
Protein unfolding in stretched fibrin blood clots creates porous gels that can withstand high strains.

744  The C-Ala Domain Brings Together Editing and Aminoacylation Functions on One tRNA
M. Guo et al.
Many alanyl–transfer RNA synthetases contain a domain that promotes aminoacylation and editing of transfer RNA.

747  Generalized Models Reveal Stabilizing Factors in Food Webs
T. Gross et al.
Analysis of several billion replicates of food webs reveals universal topological rules affecting their stability.

750  C3PO, an Endoribonuclease That Promotes RNAi by Facilitating RISC Activation
Y. Liu et al.
Reconstitution of RNA interference reveals that Slicer activity is enhanced by the protein C3PO.

753  Effects of Antibiotics and a Proto-Oncogene Homolog on Destruction of Protein Translocator SecY
J. van Stelten et al.
Antibiotics promote the destruction of a vital protein translocation complex in bacteria.
>> Perspective p. 684

756  Synaptic Integration in Tuft Dendrites of Layer 5 Pyramidal Neurons: A New Unifying Principle
M. E. Larkum et al.
Thin tuft and basal dendrites of pyramidal neurons use N-methyl-D-aspartate spikes to sum up synaptic inputs in semi-independent compartments.

760  Spinal Endocannabinoids and CB2 Receptors Mediate C-Fiber–Induced Heterosynaptic Pain Sensitization
A. J. Pernía-Andrade et al.
Noxious stimulation releases endocannabinoids in the spinal cord that may promote, rather than inhibit, the perception of pain.

An Alternative DNA Structure Is Necessary for Pilin Antigenic Variation in Neisseria gonorrhoeae
L. A. Cahoon and H. S. Seifert
A guanine quartet DNA structure regulates antigenic variation in Neisseria gonorrhoeae.
