EDITORIAL
1474  Biodiversity Policy Changes
Harold Mooney and Georgina Mace
>> Policy Forums pp. 1502 and 1503

NEWS OF THE WEEK
1482  China First to Vaccinate Against Novel H1N1 Virus
1483  Laskers Honor Five Scientists and a Mayor
1484  Researcher, Two Universities Sued Over Validity of Prostate Cancer Test
1485  DuPont Scientist Accused of Stealing Company’s Trade Secrets
1485  From the Science Policy Blog
1486  Paper Retracted Following Genome Data Breach
1486  PNAS Nixes Special Privileges for (Most) Papers
1488  Revisions to AP Courses Expected to Have Domino Effect
1489  A Boost for Vaccine Development
1489  From Science’s Online Daily News Site

NEWS FOCUS
1490  A Cure for Euthanasia?
>> Science Podcast
1494  Scrambling to Read the Meaning of the Sky’s Most Ancient Flare

LETTERS
1496  Tenure: Where to Draw the Line
L. K. Su
Tenure: Expiration Time
K. R. Gordon
Tenure: Incentivize Faculty

1499  TECHNICAL COMMENT ABSTRACTS

BOOKS ET AL.
1500  Modern Nature
L. K. Nyhart, reviewed by M. Glaubrecht
1501  Birdscapes
J. Mynott, reviewed by D. Bennu

POLICY FORUM
1502  Biodiversity Conservation and the Millennium Development Goals
J. D. Sachs et al.
1503  Tracking Progress Toward the 2010 Biodiversity Target and Beyond
M. Walpole et al.
>> Editorial p. 1474

PERSPECTIVES
1505  Expanding Functionality Within the Looking-Glass Universe
S. R. Blanke
>> Report p. 1552
1506  Seeing the Big Picture on Microbe Distribution
D. J. Patterson
>> Reports pp. 1539 and 1541
1507  Itinerant Ferromagnetism with Ultracold Atoms
W. Zwerger
>> Report p. 1521
1509  How River Beds Move
P. Frey and M. Church
1510  The Super of Superradiance
M. O. Scully and A. A. Svidzinsky

CONTENTS continued >>
BREVIA

1512  Macroevolution of Complex Retroviruses
      A. Katzourakis et al.
      A sloth foamy virus sequence indicates that mammals have been infected since
      the Cretaceous.

REPORTS

1513  Gold Helix Photonic Metamaterial as Broadband Circular Polarizer
      J. K. Gansel et al.
      A three-dimensional array of gold nano-helices can polarize light over a wide range of wavelengths.

1515  Control of Spin Precession in a Spin-Injected Field Effect Transistor
      H. C. Koo et al.
      A field-effect transistor in which the spin current is controlled by a gate voltage is demonstrated.

1518  Memory Metamaterials
      T. Driscoll et al.
      A tunable metamaterial is demonstrated that can remember its switched state.

1521  Itinerant Ferromagnetism in a Fermi Gas of Ultracold Atoms
      G.-B. Jo et al.
      Ferromagnetic ordering forms spontaneously in an ensemble of ultracold fermionic atoms.

1525  An Anomalous Basaltic Meteorite from the Innermost Main Belt
      P. A. Bland et al.
      This meteorite’s composition and orbital properties are such that it cannot be traced to the parent asteroid.

1527  Evidence for Obliquity Forcing of Glacial Termination II
      R. N. Drysdale et al.
      Marine records suggest that the early onset of the penultimate deglaciation was due to changes in Earth’s obliquity.

1531  Cellular Basis of Itch Sensation
      Y.-G. Sun et al.
      Itch, but not pain sensation, is abolished by selective ablation of a small subpopulation of spinal neurons.

1534  Attitudes and Action: Public Opinion and the Occurrence of International Terrorism
      A. B. Krueger and J. Malečková
      Public opinion toward a country is associated with the occurrence of terrorism against that country.

1536  Highly Variable Spread Rates in Replicated Biological Invasions:
      Fundamental Limits to Predictability
      B. A. Melbourne and A. Hastings
      Replicated invasions in laboratory microcosms demonstrate inherent unpredictability due to randomness in biological processes.

1539  Controls on Diatom Biogeography in the Ocean
      P. Cermeño and P. G. Falkowski
      Fossil records show that the dispersal of diatoms from ocean plankton has not been constrained by geographical barriers.

1541  A Constant Flux of Diverse Thermophilic Bacteria into the Cold Arctic Seabed
      C. Hubert et al.
      Spore-forming bacteria adapted to the hot subsurface biosphere are continually deposited in polar marine sediments.

1544  Three-Dimensional Structural View of the Central Metabolic Network of Thermotoga maritima
      Y. Zhang et al.
      Protein structure and biochemical data generate a three-dimensional view of the metabolic network of a bacterial cell.

1549  Details of Insect Wing Design and Deformation Enhance Aerodynamic Function and Flight Efficiency
      J. Young et al.
      Measurements of locust wing kinematics validate a fluid dynamics model of the aerodynamic effects of wing deformation.

1552  D-Amino Acids Govern Stationary Phase Cell Wall Remodeling in Bacteria
      H. Lam et al.
      Bacteria produce D-amino acids to regulate their cell wall composition, structure, amount, and strength.

1555  Glucose Deprivation Contributes to the Development of KRAS Pathway Mutations in Tumor Cells
      J. Yun et al.
      Glucose deprivation can drive the acquisition of certain oncogenic mutations in human cancer cells.

CONTENTS continued >>
Four disfigured skulls are traced back into a forest. Could this help fight climate change? Simulations argue that turning the Sahara Forest a Desert, Cool the World.
