Ardipithecus ramidus

INTRODUCTION

60 Light on the Origin of Man

RESEARCH ARTICLES

Ardipithecus ramidus and the Paleobiology of Early Hominids
Tim D. White et al.
Authors’ Summary p. 64, Full Text p. 75

The Geological, Isotopic, Botanical, Invertebrate, and Lower Vertebrate Surroundings of Ardipithecus ramidus
Giday WoldeGabriel et al.
Authors’ Summary p. 65, Full Text Online*

Taphonomic, Avian, and Small-Vertebrate Indicators of Ardipithecusramidus Habitat
Antoine Louchart et al.
Authors’ Summary p. 66, Full Text Online*

Macrovertebrate Paleontology and the Pliocene Habitat of Ardipithecusramidus
Tim D. White et al.
Authors’ Summary p. 67, Full Text p. 87

The Ardipithecusramidus Skull and Its Implications for Hominid Origins
Gen Suwa et al.
Authors’ Summary p. 68, Full Text Online*

Paleobiological Implications of the Ardipithecusramidus Dentition
Gen Suwa et al.
Authors’ Summary p. 69, Full Text p. 94

Careful Climbing in the Miocene: The Forelimbs of Ardipithecusramidus and Humans Are Primitive
C. Owen Lovejoy et al.
Authors’ Summary p. 70, Full Text Online*

The Pelvis and Femur of Ardipithecusramidus: The Emergence of Upright Walking
C. Owen Lovejoy et al.
Authors’ Summary p. 71, Full Text Online*

Combining Prehension and Propulsion: The Foot of Ardipithecusramidus
C. Owen Lovejoy et al.
Authors’ Summary p. 72, Full Text Online*

The Great Divides: Ardipithecusramidus Reveals the Postcrania of Our Last Common Ancestors with African Apes
C. Owen Lovejoy et al.
Authors’ Summary p. 73, Full Text p. 100

Reexamining Human Origins in Light of Ardipithecusramidus
C. Owen Lovejoy
Author’s Summary p. 74, Full Text Online*

>> Editorial p. 17; News Focus section pp. 36–43;
*Full text and related online content at

46 CORRECTIONS AND CLARIFICATIONS

CONTENTS continued >>
RESEARCH ARTICLE: Leishmania GP63 Alters Host Signaling Through Cleavage-Activated Protein Tyrosine Phosphatases
M. A. Gomez et al.
The parasite protein GP63 triggers cleavage and activation of host protein tyrosine phosphatases to promote infection.

RESEARCH ARTICLE: Hippo Pathway—Dependent and—Independent Roles of RASSF6
M. Ikeda et al.
RASSF6 is both an inhibitor and a promoter of apoptosis, and its proapoptotic activity is regulated by the mammalian kinase MST2, a Hippo homolog.

PERSPECTIVE: Sending ROS on a Bullet Train
H. L. Wong and K. Shimamoto
Hydrogen peroxide is an auto-propagating, rapid systemic stress signal generated by RBOHD in Arabidopsis.

PERSPECTIVE: STAT3 Revis Up the Powerhouse
N. C. Reich
The transcription factor STAT3 stimulates mitochondria to augment Ras-dependent oncogenic transformation.

REVIEW: Transduction of Redox Signaling by Electrophile-Protein Reactions
T. K. Rudolph and B. A. Freeman
Attachment of electrophilic products of redox reactions to proteins links cell function to changes in metabolic and inflammatory status.

SPECIAL FEATURE: Ardipithecus ramidus

Free Career Resources for Scientists

Flying High
S. Guidos
Cecilia Aragon lacked the confidence to be a scientist—and then she learned to fly.

Destigmatizing Depression
K. Hede
Physician-scientist trainees are often reluctant to admit to suffering from depression.

Taken for Granted: Is a New Model Needed for Breakthrough Science?
B. L. Benderly
Traditional PI-centered research cannot solve the big problems, a lab leader asserts.

EDITORIAL GUIDE: Focus Issue: The Long and Short of Redox Signaling
N. R. Gough
Reactive oxygen species mediate local and long-distance signals.
