Special Section

Ardipithecus ramidus

Introduction

Light on the Origin of Man

Research Articles

Ardipithecus ramidus and the Paleobiology of Early Hominids
Tim D. White et al.

The Geological, Isotopic, Botanical, Invertebrate, and Lower Vertebrate Surroundings of Ardipithecus ramidus
Giday WoldeGabriel et al.

Taphonomic, Avian, and Small-Vertebrate Indicators of Ardipithecus ramidus Habitat
Antoine Louchart et al.

Macrovertebrate Paleontology and the Pliocene Habitat of Ardipithecus ramidus
Tim D. White et al.

The Ardipithecus ramidus Skull and Its Implications for Hominid Origins
Gen Suwa et al.

Paleobiological Implications of the Ardipithecus ramidus Dentition
Gen Suwa et al.

Careful Climbing in the Miocene: The Forelimbs of Ardipithecus ramidus and Humans Are Primitive
C. Owen Lovejoy et al.

The Pelvis and Femur of Ardipithecus ramidus: The Emergence of Upright Walking
C. Owen Lovejoy et al.

Combining Prehension and Propulsion: The Foot of Ardipithecus ramidus
C. Owen Lovejoy et al.

The Great Divides: Ardipithecus ramidus Reveals the Postcrania of Our Last Common Ancestors with African Apes
C. Owen Lovejoy et al.

Reexamining Human Origins in Light of Ardipithecus ramidus
C. Owen Lovejoy

Editorial

Understanding Human Origins
Bruce Alberts

News of the Week

Surprising AIDS Vaccine Success Praised and Pondered

Letters

Think Big, Eat Small
E. Dewailly and P. Rouja

Public Trust Doctrine: In Need of Integration
M. E. Portman

Response
M. Turnipseed et al.

Corrections and Clarifications

Contents Continued >>
116 Preferential Growth of Single-Walled Carbon Nanotubes with Metallic Conductivity
A. R. Harutyunyan et al.
Reactions conditions that alter catalyst particles can bias the chirality and electronic properties of nanotube products.

120 Chiral Organic Ion Pair Catalysts Assembled Through a Hydrogen-Bonding Network
D. Uraguchi et al.
A small cluster of hydrogen-bonded molecules acts as a highly selective asymmetric catalyst.

123 Nitrous Oxide (N₂O): The Dominant Ozone-Depleting Substance Emitted in the 21st Century
A. R. Ravishankara et al.
Nitrous oxide causes more stratospheric ozone destruction than any other ozone-depleting substance.

126 Enhanced Sulfur and Coking Tolerance of a Mixed Ion Conductor for SOFCs: BaZr₀.₁Ce₀.₇Y₀.₂₋ₓYbₓO₃₋δ
L. Yang et al.
A barium zirconate-cerate doped with yttrium and ytterbium can transport both protons and oxygen ions at high temperatures.

129 Rapid Resurgence of Marine Productivity After the Cretaceous-Paleogene Mass Extinction
J. Sepulveda et al.
Preserved lipids imply that primary production recovered perhaps within 50 years of the end-Cretaceous extinction.

132 Identification of Carboniferous (320 Million Years Old) Class Ic Amber
P. S. Bray and K. B. Anderson
Carboniferous amber has a chemistry similar to that of amber from angiosperms that evolved about 150 million years later.

134 Immune Activation by Life-Shortening Wolbachia and Reduced Filarial Competence in Mosquitoes
Z. Kambris et al.
A bacterial infection in mosquitoes impairs their capacity to transmit human pathogens.

137 Genetic Discontinuity Between Local Hunter-Gatherers and Central Europe’s First Farmers
B. Bramanti et al.
Skeletal DNA shows the relationship between Ice Age hunter-gatherers, the first farmers, and modern Europeans.

140 Ribosomal Protein S6 Kinase 1 Signaling Regulates Mammalian Life Span
C. Selman et al.
A signaling pathway in mice mediates the effects of caloric restriction that protect against age-related diseases.

144 Genome-Wide RNAi Screen Identifies Letm1 as a Mitochondrial Ca²⁺/H⁺ Antiporter
D. Jiang et al.
A nuclear-encoded protein is responsible for the uptake of calcium and the export of protons across the mitochondrial membrane.

147 Dissecting the Genetic Basis of Resistance to Malaria Parasites in Anopheles gambiae
S. A. Blandin et al.
Genome-wide mapping reveals the molecular basis of phenotypic variation in resistance to Plasmodium in mosquitoes.

150 Coat Variation in the Domestic Dog Is Governed by Variants in Three Genes
E. Cadieu et al.
Huge variations in the coats of purebred dogs can be explained by the combinatorial effects of only three genes.

153 JAK-STAT Signal Inhibition Regulates Competition in the Drosophila Testis Stem Cell Niche
M. Isigoun et al.
Suppression of transcription signaling in somatic stem cells prevents them from out-competing neighboring germine stem cells.
Sexual Conflict Resolved by Invasion of a Novel Sex Determiner in Lake Malawi Cichlid Fishes
R. B. Roberts et al.
A color phenotype that is advantageous to females is linked to a sex-determining gene locus in cichlids.
10.1126/science.1174705

CD4+ Regulatory T Cells Control T,17 Responses in a Stat3-Dependent Manner
A. Chaudhry et al.
Suppressor T cells regulate different classes of immune responses through induction of specific transcription factors.
10.1126/science.1172702

Two Chemoreceptors Mediate Developmental Effects of Dauer Pheromone in C. elegans
K. Kim et al.
Chemical signals that determine alternative nematode developmental programs act via two G protein–coupled receptors.
10.1126/science.1176331

Probing the Magnetic Field of Light at Optical Frequencies
M. Burresi et al.
A split-ring resonator coupled to a scanning probe is used to measure the weak magnetic component of light.
10.1126/science.1177096

A Population of Compact Elliptical Galaxies Detected with the Virtual Observatory
I. Chilingarian et al.
A sample of elliptical systems provides evidence that disruption of galaxies plays an important role in their evolution.
10.1126/science.1175930

Download the 2 October Science Podcast to hear about the most detailed snapshot of early hominid life, the origin of community structure, and your letters to Science.

RESEARCH ARTICLE: Leishmania GP63 Alters Host Signaling Through Cleavage-Activated Protein Tyrosine Phosphatases
M. A. Gomez et al.
The parasite protein GP63 triggers cleavage and activation of host protein tyrosine phosphatases to promote infection.

RESEARCH ARTICLE: Hippo Pathway–Dependent and –Independent Roles of RASSF6
M. Ikeda et al.
RASSF6 is both an inhibitor and a promoter of apoptosis, and its proapoptotic activity is regulated by the mammalian kinase MST2, a Hippo homolog.

PERSPECTIVE: Sending ROS on a Bullet Train
H. L. Wong and K. Shimamoto
Hydrogen peroxide is an auto-propagating, rapid systemic stress signal generated by RBOHD in Arabidopsis.

PERSPECTIVE: STAT3 Revs Up the Powerhouse
N. C. Reich
The transcription factor STAT3 stimulates mitochondria to augment Ras-dependent oncogenic transformation.

PERSPECTIVE: STAT3 Revs Up the Powerhouse
N. C. Reich
The transcription factor STAT3 stimulates mitochondria to augment Ras-dependent oncogenic transformation.
