PERSPECTIVES
672 Clean the Air, Heat the Planet?
A. Arneth et al.
>> Perspective p. 674; Report p. 716
673 The Basics of Zinc Activation
J. Marek
>> Report p. 708
674 Clean Air for Megacities
D. D. Parrish and T. Zhu
>> Perspective p. 672; Report p. 716
676 An Ancient Gauge for Iron
T. A. Rouault
>> Reports pp. 718 and 722
677 Leaps in Translational Elongation
A. Liljas
>> Research Articles pp. 688 and 694
678 Foundations of Societal Inequality
D. Acemoglu and J. Robinson
>> Research Article p. 682

BREVIA
681 10-GHz Self-Referenced Optical Frequency Comb
A. Bartels et al.
A laser that emits lines every 10 gigahertz can be used for frequency calibration in spectroscopy.

CONTENTS continued >>
RESEARCH ARTICLES

682  Intergenerational Wealth Transmission and the Dynamics of Inequality in Small-Scale Societies
M. Borgerhoff Mulder et al.
Some types of wealth are strongly inherited and, hence, contribute to long-term economic inequality.

688  The Crystal Structure of the Ribosome Bound to EF-Tu and Aminoacyl-tRNA
T. M. Schmeing et al.

694  The Structure of the Ribosome with Elongation Factor G Trapped in the Posttranslocational State
Y.-G. Gao et al.
Crystal structures of the ribosome bound to elongation factors provide insights into translocation and decoding.

REPORTS

699  High-Temperature Superconductivity in a Single Copper-Oxygen Plane
G. Logvenov et al.
Interfaces of oxide metals and insulators confine a superconducting state to one copper oxide plane.

702  Reconstruction of Molecular Orbital Densities from Photoemission Data
P. Puschnig et al.
Maps of photoelectron momentum can reveal the orbital geometries of aromatic molecules adsorbed on surfaces.

706  Synergic Sedation of Sensitive Anions: Alkali-Mediated Zincation of Cyclic Ethers and Ethene
A. R. Kennedy et al.
Tandem coordination by zinc and an alkali metal increases the reactivity of carbon-hydrogen bonds of organic molecules.

708  4D Nanoscale Diffraction Observed by Convergent-Beam Ultrafast Electron Microscopy
A. Yurtsever and A. H. Zewail
Focusing an ultrashort electron pulse enables dynamic structural probing of materials that have nanoscale heterogeneity.

713  A Late Archean Sulfidic Sea Stimulated by Early Oxidative Weathering of the Continents
C. T. Reinhard et al.
Before Earth’s atmosphere became oxidizing, the oceans may have been sulfide-rich while receiving periodic pulses of iron.

716  Improved Attribution of Climate Forcing to Emissions
D. T. Shindell et al.
Chemical interactions between atmospheric gases and aerosols modify the global warming impacts of emissions.

718  Control of Iron Homeostasis by an Iron-Regulated Ubiquitin Ligase
A. A. Vashisht et al.
An E3 Ligase Possessing an Iron-Responsive Hemerythrin Domain Is a Regulator of Iron Homeostasis
A. A. Salahudeen et al.
A vertebrate hemerythrin domain in an E3 ubiquitin ligase complex senses and regulates cellular iron levels.

722  Quantifying the Impact of Immune Escape on Transmission Dynamics of Influenza
A. W. Park et al.
Modeling equine influenza reveals how epidemics originate in amino acid evolution to escape immunity.

726  The Transmissibility and Control of Pandemic Influenza A (H1N1) Virus
Y. Yang et al.
A detailed picture of the pandemic potential of swine-origin influenza offers guidance for effective mitigation strategies.

734  Hemagglutinin Receptor Binding Avidity Drives Influenza A Virus Antigenic Drift
S. E. Hensley et al.
Viruses escape antibody responses by changing surface protein structures to increase the strength of binding to host cells.

CONTENTS continued >>
A Simple Cipher Governs DNA Recognition by TAL Effectors
M. J. Moscow and A. J. Bogdanove
Xanthomonas bacteria use an amino acid–based code to target effector molecules to specific DNA sequences.
10.1126/science.1178811

Structure of Monomeric Yeast and Mammalian Sec61 Complexes Interacting with the Translating Ribosome
T. Becker et al.
A single copy of a protein-conducting channel molecule provides a conduit for polypeptide translocation across membranes.
10.1126/science.1178535

Induced Chromosomal Proximity and Gene Fusions in Prostate Cancer R.-S. Mari et al.
Androgen signaling facilitates the formation of an oncogenic fusion gene in prostate cancer cells.
10.1126/science.1178124

Pandemic H1N1 and the 2009 Hajj S. H. Ebrahim et al.
10.1126/science.1183210

Reduced Carbon Emissions, One Household at a Time
Researchers find that energy-efficiency measures also curb carbon footprints.

Hope for Lung Transplant Recipients M. Cypel et al.
Local induction of IL-10 promotes recovery of function in human lung explants deemed not suitable for transplantation.
