CONTENTS

REVIEW
812 Einstein’s Theory of Gravity and the Problem of Missing Mass
  P. G. Ferreira and G. D. Starkman

BREVIA
816 Population Structure Mediates Sexual Conflict in Water Striders
  O. T. Eldakar et al.
  When water striders can disperse among groups, females select for reduced male aggression.

817 Genotype Analysis Identifies the Cause of the “Royal Disease”
  E. I. Rogaev et al.
  DNA from historical specimens reveals the mutation causing the hemophilia that afflicted the royal families of Europe.

RESEARCH ARTICLE
818 Hematopoietic Stem Cell Gene Therapy with a Lentiviral Vector in X-Linked Adrenoleukodystrophy
  N. Carter et al.
  Lentiviral-mediated gene therapy of hematopoietic stem cells delays disease progression in patients with a fatal brain disorder.

REPORTS
823 Three-Color Entanglement
  A. S. Coelho et al.
  Three bright light beams of different colors can be entangled.

826 Electronic Structure Controls Reactivity of Size-Selected Pd Clusters Adsorbed on TiO2 Surfaces
  W. E. Kaden et al.
  The activity of these model catalysts for carbon monoxide oxidation reflects changes in cluster electronic structure.

829 Dynamical Steering and Electronic Excitation in NO Scattering from a Gold Surface
  N. Shenvi et al.
  Theory accounts for the complex ways in which vibrations and rotations of nitric oxide molecules affect scattering from a surface.

832 Chemically Accurate Simulation of a Prototypical Surface Reaction: H2 Dissociation on Cu(111)
  C. Díaz et al.
  The use of a fitting parameter produces a much-improved potential energy surface for describing a surface reaction.

835 Shifts in Lake N:P Stoichiometry and Nutrient Limitation Driven by Atmospheric Nitrogen Deposition
  J. J. Elser et al.
  Deposition of anthropogenically derived nitrogen can cause phosphorus to become the limiting nutrient of lake phytoplankton.

837 Abiotic Gas Formation Drives Nitrogen Loss from a Desert Ecosystem
  C. K. McCalley and J. P. Sparks
  In the Mojave Desert, high surface temperatures cause large amounts of nitrogen to be lost from the soil.

840 A Probable Polination Mode Before Angiosperms: Eurasian, Long-Proboscid Scorpionflies
  D. Ren et al.
  Prior to the coevolution of angiosperms and pollinating insects, scorpionflies may have been pollinating gymnosperms.

847 Polymorphic Butterfly Reveals the Missing Link in Ecological Speciation
  N. L. Chamberlain et al.
  Mate selection based on preferences for polymorphic wing color patterns is generating reproductive isolation.

850 A Type I–Secreted, Sulfated Peptide Triggers XA21-Mediated Innate Immunity
  S.-W. Lee
  The bacterial trigger for a rice innate immune response is identified.

853 Small-Molecule Activators of a Proenzyme
  D. W. Wolan et al.
  Small molecules that promote a procaspase conformation susceptible to activation by proteolysis have been identified.

858 High Diversity of the Viral Community from an Antarctic Lake
  A. López-Bueno et al.
  Virus populations in polar freshwater lakes show marked shifts in composition during ice melt.

861 Viral Glycosphingolipids Induce Lytic Infection and Cell Death in Marine Phytoplankton
  A. Vardi et al.
  A specific virus encodes membrane components that broadcast cell death and population demise of its coccolithophore host.

865 Genome Sequence, Comparative Analysis, and Population Genetics of the Domestic Horse
  C. M. Wade et al.
  The horse genome reveals an evolutionary new centromere and conserved chromosomal sequences relative to other mammals.

867 MafB/c-Maf Deficiency Enables Self-Renewal of Differentiated Functional Macrophages
  A. Aziz et al.
  The absence of two transcription factors allows long-term propagation of a differentiated immune cell population that is nontumorigenic.

871 A Single Peptide–MHC Complex Positively Selects a Diverse and Specific CD8 T Cell Repertoire
  B. Wang et al.
  Positive selection by a single peptide–MHC complex imparts exquisite specificity to developing T cells.

CONTENTS continued >>
Bacterial Community Variation in Human Body Habitats Across Space and Time
E. K. Costello et al.
The composition of microbial communities on the human body is primarily determined by their location. 10.1126/science.1177486

An Unusually Fast-Evolving Supernova
D. Poznanski et al.
The distinctive properties of this supernova suggest that it is of a kind predicted by theory but not previously observed. 10.1126/science.1181709

A Body Count for Two Man-Eating Lions
Infamous cats may have been responding to changes in their habitat.

Mission Improbable: A Concise and Precise Definition of P-Value
ScienceNOW engages in a heated debate about a controversial statistical term.

A Little Fellatio Goes a Long Way
Fruit bats engage in oral sex—a behavior that may have important consequences.

RESEARCH ARTICLE: Activation of a Bacterial Virulence Protein by the GTPase RhoA
M. Christen et al.
An enzyme essential for the virulence of Salmonella in mammals is activated by the GTP-bound form of RhoA.

PERSPECTIVE: In with the TRP Channels—Intracellular Functions for TRPM1 and TRPM2
S. Patel and R. Docampo
Cationic channels of the TRP melastatin family are involved in pigmentation and oxidative stress responses.

MEETING REPORT: The Hippo Tumor Suppressor Pathway—A Brainstorming Workshop
G. Blandino et al.
Researchers of flies and mammals met to discuss components of the Hippo signaling pathway.

E-LETTER: Innovators Award
Science Signaling Editors
Science Signaling authors E. S. Emamian and A. Abdi received an Innovators Award from the New Jersey Inventors Hall of Fame.

NETWATCH: Cancer Gene Census
Browse a collection of genes implicated in human cancers; in Bioinformatics Resources.

NETWATCH: Developmental Therapeutics Program
Access a variety of reagents and services for identifying compounds with antitumor activity; in Bioinformatics Resources.

RESEARCH ARTICLE: Serum Amyloid P Inhibits Fibrosis Through FcRy-Dependent Monocyte-Macrophage Regulation in Vivo
A. Castano et al.
Therapeutic administration of human serum amyloid P inhibits fibrosis progression in the mouse kidney.

COMMENTARY: A Translational Research Niche for SBIR Grants
K. D. Handelsman
Funding from the Small Business Innovation Research (SBIR) program can be part of the health care solution.

RESEARCH ARTICLE: Common Defects of ABCG2, a High-Capacity Urate Exporter, Cause Gout
H. Matsuo et al.
Common mutations cause gout in a Japanese population.

RESEARCH ARTICLE: Tetracyclines That Promote SMN2 Exon 7 Splicing as Therapeutics for Spinal Muscular Atrophy
M. Hastings et al.
A new class of compounds may be useful for the treatment of a leading genetic cause of infant mortality.

SCIENCE (ISSN 0036-8075) is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1200 New York Avenue, NW, Washington, DC 20005. Periodicals Mail postage (publication No. 484460) paid at Washington, DC, and additional mailing offices. Copyright © 2009 by the American Association for the Advancement of Science. The title SCIENCE is a registered trademark of the AAAS. Domestic individual membership and subscription (15 issues): $46.16 (1974 allocated to subscription). Domestic institutional subscription (15 issues): $346.16. Foreign postage extra. Mexico, Caribbean surface mail 155; other countries (air assist delivery) 185. First class, airmail, student, and emeritus rates on request. Canadian rates with GST available upon request. GST #1254 88122. Publication Mail Agreement Number 1069624. Printed in the U.S.A. Change of address: Allow 4 weeks, giving old and new addresses and 8-digit account number. Postmaster: Send change of address to AAAS, P.O. Box 93579, Washington, DC 20090-4378. Single-copy sales: $30.00 current issue, $15.00 back issue prepaid includes surface postage, bulk rates on request. Authorization to photocopy material for internal or personal use, or use in internal or personal reference libraries, or for in-house reserve use, or by a similar fee for Scientists in 0036-8075. Science is indexed in the Reader’s Guide to Periodical Literature and in several specialized indexes.
