COVER

The Coronado Bridge links the cities of San Diego and Coronado, California. The theme of the AAAS Annual Meeting in San Diego, 18 to 22 February 2010, acknowledges that the relevance of science, technology, and engineering as well as scientific literacy to the well-being of society is more profound than ever. The preliminary program begins on page 876.

REVIEW
812  Einstein’s Theory of Gravity and the Problem of Missing Mass
P. G. Ferreira and G. D. Starkman

BREVIA
816  Population Structure Mediates Sexual Conflict in Water Striders
O. T. Eldakar et al.
When water striders can disperse among groups, females select for reduced male aggression.

817  Genotype Analysis Identifies the Cause of the “Royal Disease”
E. I. Rogoiev et al.
DNA from historical specimens reveals the mutation causing the hemophilia that afflicted the royal families of Europe.

RESEARCH ARTICLE
818  Hematopoietic Stem Cell Gene Therapy with a Lentiviral Vector in X-Linked Adrenoleukodystrophy
N. Carter et al.
Lentiviral-mediated gene therapy of hematopoietic stem cells delays disease progression in patients with a fatal brain disorder.

REPORTS
823  Three-Color Entanglement
A. S. Coelho et al.
Three bright light beams of different colors can be entangled.

826  Electronic Structure Controls Reactivity of Size-Selected Pd Clusters Adsorbed on TiO₂ Surfaces
W. E. Kaden et al.
The activity of these model catalysts for carbon monoxide oxidation reflects changes in cluster electronic structure.

829  Dynamical Steering and Electronic Excitation in NO Scattering from a Gold Surface
N. Shenoy et al.
Theory accounts for the complex ways in which vibrations and rotations of nitric oxide molecules affect scattering from a surface.

832  Chemically Accurate Simulation of a Prototypical Surface Reaction: H₂ Dissociation on Cu(111)
C. Diaz et al.
The use of a fitting parameter produces a much-improved potential energy surface for describing a surface reaction.

835  Shifts in Lake N:P Stoichiometry and Nutrient Limitation Driven by Atmospheric Nitrogen Deposition
J. J. Elser et al.
Deposition of anthropogenically derived nitrogen can cause phosphorus to become the limiting nutrient of lake phytoplankton.

837  Abiotic Gas Formation Drives Nitrogen Loss from a Desert Ecosystem
C. K. McClellan and J. P. Sparks
In the Mojave Desert, high surface temperatures cause large amounts of nitrogen to be lost from the soil.

840  A Probable Pollination Mode Before Angiosperms: Eurasian, Long-Proboscid Scorpionflies
D. Ren et al.
Prior to the coevolution of angiosperms and pollinating insects, scorpionflies may have been pollinating gymnosperms.

847  Polymorphic Butterfly Reveals the Missing Link in Ecological Speciation
N. L. Chamberlain et al.
Mate selection based on preferences for polymorphic wing color patterns is generating reproductive isolation.

850  High Diversity of the Viral Community from an Antarctic Lake
A. Lopez-Bueno et al.
Virus populations in polar freshwater lakes show marked shifts in composition during ice melt.

853  Small-Molecule Activators of a Proenzyme
D. W. Wolan et al.
Small molecules that promote a procaspase conformation susceptible to activation by proteolysis have been identified.

858  A Single Peptide–MHC Complex Positively Selects a Diverse and Specific CD8 T Cell Repertoire
B. Wang et al.
Positive selection by a single peptide–MHC complex imparts exquisite specificity to developing T cells.
A low-cost sequencing technique advances us closer to the goal of the $1,000 human genome.

10.1126/science.1181498

RESEARCH ARTICLE: Activation of a Bacterial Virulence Protein by the GTPase RhoA
M. Christen et al.

An enzyme essential for the virulence of *Salmonella* in mammals is activated by the GTP-bound form of RhoA.

10.1126/science.1177877

An Unusually Fast-Evolving Supernova
D. Poznanski et al.

The distinctive properties of this supernova suggest that it is of a kind predicted by theory but not previously observed.

10.1126/science.1181709

>> Science Podcast

Bridging the Montreal-Kyoto Gap
J. Cohen et al.

10.1126/science.1176958

A Body Count for Two Man-Eating Lions
Infamous cats may have been responding to changes in their habitat.

Mission Improbable: A Concise and Precise Definition of P-Value
ScienceNOW engages in a heated debate about a controversial statistical term.

After the Fall of the Wall: Science Careers in Eastern Europe
Science Careers Staff

Eastern Europe is seeing returns from young scientists on a world without walls.

More Opportunities for International Collaborations in Eastern Europe
E. Pain

Eastern European scientists have more changes to benefit from international collaborations.

On Going Home: Succeeding in Science in Eastern Europe
E. Pain

Three early-career scientists discuss returning to their countries after spending time abroad.

>> News Focus stories pp. 788 and 792

RESEARCH ARTICLE: The Rfx4 Transcription Factor Modulates Shh Signaling by Regional Control of Ciliogenesis
A. M. Ashique et al.

Rfx4 regulates the formation of primary cilia, thereby playing a crucial role in central nervous system development.

10.1126/science.1177486

RESEARCH ARTICLE: Common Defects of ABCG2, a High-Capacity Urate Exporter, Cause Gout
H. Matsuo et al.

Common mutations cause gout in a Japanese population.

RESEARCH ARTICLE: Tetracyclines That Promote SMN2 Exon 7 Splicing as Therapeutics for Spinal Muscular Atrophy
M. Hastings et al.

A new class of compounds may be useful for the treatment of a leading genetic cause of infant mortality.
