CONTENTS

REVIEW

812 Einstein’s Theory of Gravity and the Problem of Missing Mass
P. G. Ferreira and G. D. Starkman

BREVIA

816 Population Structure Mediates Sexual Conflict in Water Striders
O. T. Eldakar et al.
When water striders can disperse among groups, females select for reduced male aggression.

817 Genotype Analysis Identifies the Cause of the “Royal Disease”
E. I. Rogaev et al.
DNA from historical specimens reveals the mutation causing the hemophilia that afflicted the royal families of Europe.

RESEARCH ARTICLE

818 Hematopoietic Stem Cell Gene Therapy with a Lentiviral Vector in X-Linked Adrenoleukodystrophy
N. Carter et al.
Lentiviral-mediated gene therapy of hematopoietic stem cells delays disease progression in patients with a fatal brain disorder.

819 Shifts in Lake N:P Stoichiometry and Nutrient Limitation Driven by Atmospheric Nitrogen Deposition
J. J. Elser et al.
Deposition of anthropogenically derived nitrogen can cause phosphorus to become the limiting nutrient of lake phytoplankton.

837 Abiotic Gas Formation Drives Nitrogen Loss from a Desert Ecosystem
C. K. McCalley and J. P. Sparks
In the Mojave Desert, high surface temperatures cause large amounts of nitrogen to be lost from the soil.

840 A Probable Pollination Mode Before Angiosperms: Eurasian, Long-Proboscid Scorpionflies
D. Ren et al.
Prior to the coevolution of angiosperms and pollinating insects, scorpionflies may have been pollinating gymnosperms.

REPORTS

823 Three-Color Entanglement
A. S. Coelho et al.
Three bright light beams of different colors can be entangled.

826 Electronic Structure Controls Reactivity of Size-Selected Pd Clusters Adsorbed on TiO2 Surfaces
W. E. Kaden et al.
The activity of these model catalysts for carbon monoxide oxidation reflects changes in cluster electronic structure.

829 Dynamical Steering and Electronic Excitation in NO Scattering from a Gold Surface
N. Shen et al.
Theory accounts for the complex ways in which vibrations and rotations of nitric oxide molecules affect scattering from a surface.

832 Chemically Accurate Simulation of a Prototypical Surface Reaction: H2 Dissociation on Cu(111)
C. Diaz et al.
The use of a fitting parameter produces a much-improved potential energy surface for describing a surface reaction.

835 High Diversity of the Viral Community from an Antarctic Lake
A. López-Bueno et al.
Virus populations in polar freshwater lakes show marked shifts in composition during ice melt.

836 Viral Glycosphingolipids Induce Lytic Infection and Cell Death in Marine Phytoplankton
A. Vardi et al.
A specific virus encodes membrane components that broadcast cell death and population demise of its coccolithophore host.

867 MafB/c-Maf Deficiency Enables Self-Renewal of Differentiated Functional Macrophages
A. Aziz et al.
The absence of two transcription factors allows long-term propagation of a differentiated immune cell population that is nontumorigenic.

871 A Single Peptide–MHC Complex Positively Selects a Diverse and Specific CD8 T Cell Repertoire
B. Wang et al.
Positive selection by a single peptide–MHC complex imparts exquisite specificity to developing T cells.

SCIENCE ONLINE

RESEARCH ARTICLE: Activation of a Bacterial Virulence Protein by the GTPase RhoA
M. Christen et al.
An enzyme essential for the virulence of Salmonella in mammals is activated by the GTP-bound form of RhoA.

PERSPECTIVE: In with the TRP Channels—Intracellular Functions for TRPM1 and TRPM2
S. Patel and R. Docampo
Cationic channels of the TRP melastatin family are involved in pigmentation and oxidative stress responses.

MEETING REPORT: The Hippo Tumor Suppressor Pathway—A Brainstorming Workshop
G. Blandino et al.
Researchers of flies and mammals met to discuss components of the Hippo signaling pathway.

E-LETTER: Innovators Award
Science Signaling Editors
Science Signaling authors E. S. Emamian and A. Abdi received an Innovators Award from the New Jersey Inventors Hall of Fame.

NETWATCH: Cancer Gene Census
Browse a collection of genes implicated in human cancers; in Bioinformatics Resources.

NETWATCH: Developmental Therapies Program
Access a variety of reagents and services for identifying compounds with antitumor activity; in Bioinformatics Resources.

SCIENCE CAREERS
www.sciencecareers.org/career_magazine
Free Career Resources for Scientists

After the Fall of the Wall: Science Careers in Eastern Europe
Science Careers Staff
Eastern Europe is seeing returns from young scientists on a world without walls.

More Opportunities for International Collaborations in Eastern Europe
E. Pain
Eastern European scientists have more chances to benefit from international collaborations.

On Going Home: Succeeding in Science in Eastern Europe
E. Pain
Three early-career scientists discuss returning to their countries after spending time abroad.

SCIENCE TRANSLATIONAL MEDICINE
www.sciencetranslationalmedicine.org
Integrating Medicine and Science

COMMENTARY: Translational Medicine—An Engine of Change for Bringing New Technology to Community Health
C.-P. Milne and K. Katin
A patient-centered focus in R&D should lead to improvements in medical care.

COMMENTARY: A Translational Research Niche for SBIR Grants
K. D. Handelsman
Funding from the Small Business Innovation Research (SBIR) program can be part of the health care solution.

RESEARCH ARTICLE: Common Defects of ABCG2, a High-Capacity Urate Exporter, Cause Gout
H. Matsuo et al.
Common mutations cause gout in a Japanese population.

RESEARCH ARTICLE: Tetracyclines That Promote SMN2 Exon 7 Splicing as Therapeutics for Spinal Muscular Atrophy
M. Hastings et al.
A new class of compounds may be useful for the treatment of a leading genetic cause of infant mortality.

RESEARCH ARTICLE: Serum Amyloid P Inhibits Fibrosis Through FcγR-Dependent Monocyte-Macrophage Regulation in Vivo
A. Castano et al.
Therapeutic administration of human serum amyloid P inhibits fibrosis progression in the mouse kidney.
