RESEARCH ARTICLE
954 Starvation Protects Germline Stem Cells and Extends Reproductive Longevity in C. elegans
G. Angelo and M. R. Van Gilst
During starvation, germline stem cells are saved for regeneration when food is restored.
>> Perspective p. 944

REPORTS
959 Global Observations of the Interstellar Interaction from the Interstellar Boundary Explorer (IBEX)
D. J. McComas et al.
962 Width and Variation of the ENA Flux Ribbon Observed by the Interstellar Boundary Explorer
S. A. Fuselier et al.
964 Structures and Spectral Variations of the Outer Heliosphere in IBEX Energetic Neutral Atom Maps
H. O. Funsten et al.
966 Comparison of Interstellar Boundary Explorer Observations with 3D Global Heliospheric Models
N. A. Schwadron et al.
Observations by the Interstellar Boundary Explorer have revealed surprising features in the interaction between the heliosphere and the interstellar medium.
969 Direct Observations of Interstellar H, He, and O by the Interstellar Boundary Explorer
E. Möbius et al.
Detection of H, He, and O flowing into the heliosphere from the interstellar medium tells us about our local interstellar environment.
971 Imaging the Interaction of the Heliosphere with the Interstellar Medium from Saturn with Cassini
S. M. Krimigis et al.
Observations by Cassini show that some of the features revealed by IBEX extend to high energies.
974 Observation of Half-Quantum Vortices in an Exciton-Polariton Condensate
K. G. Lagoudakis et al.
Evidence is presented for the existence of half-quantum vortices in exciton-polariton condensates.
977 A Strain-Driven Morphotropic Phase Boundary in BiFeO₃
R. J. Zeches et al.
Growth of epitaxial films of BiFeO₃ on various substrates may provide a route toward making lead-free ferroelectric devices.
980 Observation of the Role of Subcritical Nuclei in Crystallization of a Glassy Solid
B.-S. Lee et al.
Fluctuation transmission electron microscopy images nanoscale nuclei and their influence on subsequent crystallization.
>> Perspective p. 944
984 Partitioning Recent Greenland Mass Loss
M. van den Broeke et al.
The major components of decay contributing to mass loss from the Greenland Ice Sheet can be quantified.
986 CD4⁺ Regulatory T Cells Control T₁₇ Responses in a Stat3-Dependent Manner
A. Chaudhry et al.
Suppressor T cells regulate different classes of immune responses through induction of specific transcription factors.
991 A Spindle Assembly Checkpoint Protein Functions in Prophase I Arrest and Prometaphase Progression
H. Homer et al.
A protein vital for correct segregation of chromosomes in mitosis is also needed to complete meiosis in mouse oocytes.
994 Two Chemoreceptors Mediate Developmental Effects of Dauer Pheromone in C. elegans
K. Kim et al.
Chemical signals that determine alternative nematode developmental programs act via two G protein–coupled receptors.
>> Perspective p. 944
998 Sexual Conflict Resolved by Invasion of a Novel Sex Determiner in Lake Malawi Cichlid Fishes
R. B. Roberts et al.
A color phenotype that is advantageous to females is linked to a sex-determining gene locus in cichlids.
1002 Mutations in Two Independent Pathways Are Sufficient to Create Hermaphroditic Nematodes
C. Baldi et al.
Female nematode worms can be turned into hermaphrodites through the modification of two genes.
>> Science Podcast
1005 Amyloid-β Dynamics Are Regulated by Orexin and the Sleep-Wake Cycle
J.-E. Kang et al.
Sleep patterns can influence amyloid plaque formation in a mouse model of Alzheimer’s disease.
CONTENTS continued >>
Science Translational Medicine

Aiming Straight for the Heart—Prolyl Hydroxylases Set the BAR
J. A. Garcia et al.

β2-adrenergic receptor density is regulated by oxygen availability.

Perspective: A New Mechanism of Phosphoregulation in Signal Transduction Pathways
K. Jung and H. Jung

A protein kinase phosphorylates arginine residues in a transcriptional factor during the bacterial heat shock response.

A Gluconeogenic Tryst in the Nucleus, with ER Stress as the Third Wheel
D. T. Rutkowski

A transcriptional co-regulator links gluconeogenesis and ER stress responses in the liver.

Perspective: FBXO31—A New Player in the Ever-Expanding DNA Damage Response Orchestra
Y. Shiloh et al.

FBXO31 is a damage-induced checkpoint protein that enhances cyclin D1 degradation in response to genotoxic stress.

Perspective: Nutrition-Minded Cell Cycle
K. Shiozaki

Cross talk between TOR and MAPK signaling pathways determines mitotic onset in fission yeast during nutrition stress.

Research Article: H2S Signals Through Protein S-Sulfhydration
A. K. Mustafa et al.

The gasotransmitter hydrogen sulfide signals by sulfhydrating target proteins.

Podcast
S. H. Snyder and A. M. VanHook

The gut microbiome contributes to human metabolic disease and may yield new targets for preventative treatments.

Science Podcast

Free Weekly Show

Download the 13 November Science Podcast to hear about climate change predictions, creating hemaphroditic worms, and more.

Science Careers

Free Career Resources for Scientists

A Recipe for Collaboration
L. Chiu

An unlikely collaboration resulted in a new technique for measuring hormone levels.

Taken for Granted: Shocked, Shocked! to Find Disappearance on Campus
B. L. Benderly

A new book takes a revealing look at careers in academic science.

A Scientist Finds a Niche
S. Gaidos

Dean Pearson overcame a slow start and made a difference by observing ecological communities.

Podcast

K. Adamczyk

The use of a photoacid enables the long-sought formation of the conjugate acid of bicarbonate.

Two White Dwarfs with Oxygen-Rich Atmospheres
B. T. Gänsicke et al.

Two white dwarfs may have evolved from intermediate-mass stars that avoided exploding as supernovae.

Structure of an RNA Polymerase II–TFIIB Complex and the Transcription Initiation Mechanism
X. Liu et al.

X-ray structures provide more details on the initiation of transcription.

Reproducibility Distinguishes Conscious from Nonconscious Neural Representations
A. Schurger et al.

Analysis of functional magnetic resonance imaging data reveals that neural activation patterns are more reproducible for seen versus unseen objects.

Nonconscious Neural Representations
Reproducibility Distinguishes Conscious from Nonconscious Neural Representations
A. Schurger et al.

Analysis of functional magnetic resonance imaging data reveals that neural activation patterns are more reproducible for seen versus unseen objects.

Phosphoregulation in Signal Transduction Pathways
K. Jung and H. Jung

A protein kinase phosphorylates arginine residues in a transcriptional factor during the bacterial heat shock response.
