VIEWPOINT
948 How Telomeres Solve the End-Protection Problem
T. de Lange

BREVIA
953 Widespread Occurrence of Self-Cleaving Ribozymes
C.-H. T. Webb et al.
Once thought to be an oddity, small catalytic RNAs have been found in a wide range of organisms.

COVER
The Interstellar Boundary Explorer (IBEX) spacecraft has returned the first global images of the interaction of our heliosphere with the local interstellar medium. IBEX observations show a ribbon of energetic neutral atoms (reds to greens), snaking between the positions of the two Voyager spacecraft (white dots). This ribbon marks the region where the galactic magnetic field (gray lines) wraps most tightly around the heliosphere’s boundary. See the series of Reports starting on page 959.

RESEARCH ARTICLE

954  Starvation Protects Germline Stem Cells and Extends Reproductive Longevity in C. elegans
G. Angelo and M. R. Van Gilst
During starvation, germline stem cells are saved for regeneration when food is restored.
>> Perspective p. 944

REPORTS

959  Global Observations of the Interstellar Interaction from the Interstellar Boundary Explorer (IBEX)
D. J. McComas et al.

962  Width and Variation of the ENA Flux Ribbon Observed by the Interstellar Boundary Explorer
S. A. Fuselier et al.

964  Structures and Spectral Variations of the Outer Heliosphere in IBEX Energetic Neutral Atom Maps
H. O. Funsten et al.

966  Comparison of Interstellar Boundary Explorer Observations with 3D Global Heliospheric Models
N. A. Schwadron et al.
Observations by the Interstellar Boundary Explorer have revealed surprising features in the interaction between the heliosphere and the interstellar medium.

969  Direct Observations of Interstellar H, He, and O by the Interstellar Boundary Explorer
E. Möbius et al.
Detection of H, He, and O flowing into the heliosphere from the interstellar medium tells us about our local interstellar environment.

971  Imaging the Interaction of the Heliosphere with the Interstellar Medium from Saturn with Cassini
S. M. Krimigis et al.
Observations by Cassini show that some of the features revealed by IBEX extend to high energies.

974  Observation of the Role of Subcritical Nuclei in Crystallization of a Glassy Solid
B.-S. Lee et al.
Fluctuation transmission electron microscopy images nanoscale nuclei and their influence on subsequent crystallization.
>> Perspective p. 942

980  CD4+ Regulatory T Cells Control T17 Responses in a Stat3-Dependent Manner
A. Chaudhry et al.
Suppressor T cells regulate different classes of immune responses through induction of specific transcription factors.

984  Sexual Conflict Resolved by Invasion of a Novel Sex Determiner in Lake Malawi Cichlid Fishes
R. B. Roberts et al.
A color phenotype that is advantageous to females is linked to a sex-determining gene locus in cichlids.

986  Two Chemoreceptors Mediate Developmental Effects of Dauer Pheromone in C. elegans
K. Kim et al.
Chemical signals that determine alternative nematode developmental programs act via two G protein–coupled receptors.
>> Perspective p. 944

991  A Spindle Assembly Checkpoint Protein Functions in Prophase I Arrest and Prometaphase Progression
H. Homer et al.
A protein vital for correct segregation of chromosomes in mitosis is also needed to complete meiosis in mouse oocytes.

994  Observation of Half-Quantum Vortices in an Exciton-Polariton Condensate
K. G. Lagoudakis et al.
Evidence is presented for the existence of half-quantum vortices in exciton-polariton condensates.

998  A Strain-Driven Morphotropic Phase Boundary in BiFeO3
R. J. Zeches et al.
Growth of epitaxial films of BiFeO3 on various substrates may provide a route toward making lead-free ferroelectric devices.

999  A Strain-Driven Morphotropic Phase Boundary in BiFeO3
R. J. Zeches et al.
Growth of epitaxial films of BiFeO3 on various substrates may provide a route toward making lead-free ferroelectric devices.

999  A Strain-Driven Morphotropic Phase Boundary in BiFeO3
R. J. Zeches et al.
Growth of epitaxial films of BiFeO3 on various substrates may provide a route toward making lead-free ferroelectric devices.

1002  Mutations in Two Independent Pathways Are Sufficient to Create Hermaphroditic Nematodes
C. Baldi et al.
Female nematode worms can be turned into hermaphrodites through the modification of two genes.
>> Science Podcast

1005  Amyloid-β Dynamics Are Regulated by Orexin and the Sleep-Wake Cycle
J.-E. Kang et al.
Sleep patterns can influence amyloid plaque formation in a mouse model of Alzheimer’s disease.
REAL-TIME OBSERVATION OF CARBONIC ACID FORMATION IN AQUEOUS SOLUTION
K. Adamczyk et al.
The use of a photoacid enables the long-sought characterization of the conjugate acid of bicarbonate.
10.1126/science.1180060

TWO WHITE DWARFS WITH OXYGEN-RICH ATMOSPHERES
B. T. Gänscicke et al.
Two white dwarfs may have evolved from intermediate-mass stars that exploded as supernovae.
10.1126/science.1180228

STRUCTURE OF AN RNA POLYMERASE II–TFII B COMPLEX AND THE TRANSCRIPTION INITIATION MECHANISM
X. Liu et al.
X-ray structures provide more details on the initiation of transcription.
10.1126/science.1182015

THE FANCONI ANEMIA PATHWAY PROMOTES REPLICATION-DEPENDENT DNA INTERSTRAND CROSS-LINK REPAIR
P. Knipscheer et al.
Insertion of a nucleotide during the repair of a complex lesion in DNA requires tagging of a lysine residue.
10.1126/science.1182372

REPRODUCIBILITY DISTINGUISHES CONSCIOUS FROM NONCONSCIOUS NEURAL REPRESENTATIONS
A. Schurger et al.
Analysis of functional magnetic resonance imaging data reveals that neural activation patterns are more reproducible for seen versus unseen objects.
10.1126/science.1180029
