COVER

An ear of *Zea mays* (maize) shows color variation among kernels. Maize is one of the most important crop species worldwide, a vital source of food and fuel, and a valuable model organism for genetic research. Reports starting on pages 1112 and 1115 describe the genome sequences of the B73 and Palomero Toluqueño varieties. See also the related Report (p. 1118), Brevia (p. 1078), and Perspective (p. 1071).

BREVIA

1078 The Palomero Genome Suggests Metal Effects on Domestication

J.-P. Vielle-Calzada et al.

Genes involved in metal tolerance likely played a role in maize domestication.

>> *Perspective p. 1071; Reports pp. 1112, 1115, and 1118*

1079 Strengthening Individual Memories by Reactivating Them During Sleep

J. D. Rudoy et al.

During sleep, memories can be influenced in a specific and systematic manner.

>> *Science Podcast*

REPORTS

1080 Detection of Gamma Rays from a Starburst Galaxy

F. Acero et al.

Detection of our nearest starburst galaxy at very high energies confirms this galaxy type as a new class of gamma-ray emitter.

>> *News story p. 1047*

1083 Shape-Controlled Colloidal Interactions in Nematic Liquid Crystals

C. P. Lapointe et al.

Polygons dispersed in a liquid crystal solvent form either dipolar or quadrupolar interactions, thus driving self-assembly.

1086 Atmospheric Sulfur in Archean Komatiite-Hosted Nickel Deposits

A. Bekker et al.

The source of sulfur in economic iron-nickel sulfide deposits is primarily derived from the atmosphere.

1089 Geophysical Detection of Relict Metasomatism from an Archean (~3.5 Ga) Subduction Zone

C.-W. Chen et al.

Seismic profiles of the Slave craton in Canada suggest that subduction is responsible for its formation.

1091 Nanoplasmonic Probes of Catalytic Reactions

E. M. Larsson et al.

Reactant concentrations can be measured as plasmon frequency shifts for model catalysts grown on nanoscale gold disks.

1095 Microsecond Simulations of Spontaneous Methane Hydrate Nucleation and Growth

M. R. Walsh et al.

An extended simulation uncovers the intricate steps whereby methane can be trapped in ice.

>> *Perspective p. 1070*

1098 Aragonite Undersaturation in the Arctic Ocean: Effects of Ocean Acidification and Sea Ice Melt

M. Yamamoto-Kawai et al.

Surface waters in the Canada Basin were undersaturated with respect to aragonite in 2008, earlier than predicted.

1100 Pleistocene Megafaunal Collapse, Novel Plant Communities, and Enhanced Fire Regimes in North America

J. L. Gill et al.

The decline in Pleistocene megafauna led to the formation of novel plant communities and increased fire.

>> *Perspective p. 1072; Science Podcast*

1103 High Symbiont Relatedness Stabilizes Mutualistic Cooperation in Fungus-Growing Termites

D. K. Aanen et al.

In symbioses of independently reproducing partners, a genetically uniform population of symbionts excludes cheating variants.

1106 Epicontinental Seas Versus Open-Ocean Settings: The Kinetics of Mass Extinction and Origination

A. I. Miller and M. Foote

Three major mass extinctions affected organisms inhabiting open-ocean-facing coasts much more so than those inhabiting shallow seas.

1109 A Periplasmic Reducing System Protects Single Cysteine Residues from Oxidation

M. Depuydt et al.

A thioredoxin-like enzyme controls the oxidation state of the bacterial periplasm.

1112 The B73 Maize Genome: Complexity, Diversity, and Dynamics

P. S. Schnable et al.

The sequence of the maize genome reveals it to be the most complex genome known to date.

>> *Perspective p. 1071; Brevia p. 1078*

1115 A First-Generation Haplotype Map of Maize

M. A. Gore et al.

In maize, recombination in the genome has been a limiting factor affecting evolution and breeding efforts.

>> *Perspective p. 1071; Brevia p. 1078*

1118 Paternal Dominance of Trans-eQTL Influences Gene Expression Patterns in Maize Hybrids

R. A. Swanson-Wagner et al.

Gene expression variation in maize hybrids is influenced by distant DNA sequences subject to paternal genomic imprinting.

>> *Perspective p. 1071; Brevia p. 1078*

1120 Symbiotic Nitrogen Fixation in the Fungus Gardens of Leaf-Cutter Ants

A. A. Pinto-Tomás et al.

Leaf-cutting ants engage in a mutualism with nitrogen-fixing bacteria that help fertilize their fungus gardens.

1123 Structural Basis of Immune Evasion at the Site of CD4 Attachment on HIV-1 gp120

L. Chen et al.

Conformational variability in an HIV coat protein complicates the therapeutic targeting of HIV-1.

1127 The Schizophrenia Susceptibility Gene *dysbindin* Controls Synaptic Homeostasis

D. K. Dickman and G. W. Davis

The dysbindin protein is required for the modulation of presynaptic neurotransmitter release in *Drosophila*.

Phosphorylation of H2A by Bub1 Prevents Chromosomal Instability Through Localizing Shugoshin

S. A. Kawashima et al.

Phosphorylation of the chromatin protein histone H2A plays a critical role in chromosome segregation during cell division.

10.1126/science.1180189

Overexpression of Alpha2A-Adrenergic Receptors Contributes to Type 2 Diabetes

A. H. Rosengren et al.

Sequence variations in an adrenergic receptor gene cause reduced insulin secretion and contribute to type 2 diabetes.

10.1126/science.1176827

Gigahertz Dynamics of a Strongly Driven Single Quantum Spin

G. D. Fuchs et al.

Fast spin-flips are observed in the nitrogen vacancy centers in diamond.

10.1126/science.1181193

Universality in Three- and Four-Body Bound States of Ultracold Atoms

S. E. Pollack et al.

The interactions involved in the formation of few-body bound states can be probed in a cloud of ultracold atoms.

10.1126/science.1182840

Direct Imaging of Bridged Twin Protoplanetary Disks in a Young Multiple Star

S. Mayama et al.

An infrared image taken with the Subaru Telescope reveals young binary stars and their circumstellar environments.

The Signal Transduction Knowledge Environment

RESEARCH ARTICLE: *Trypanosoma cruzi* Targets Akt in Host Cells as an Intracellular Anti-Apoptotic Strategy

M. V. Chuenkova and M. PereiraPerrin

A surface protein of the intracellular parasite *T. cruzi* directly interacts with Akt to protect infected cells from pro-apoptotic stimuli.

RESEARCH ARTICLE: Tyrosine Phosphorylation Inhibits PKM2 to Promote the Warburg Effect and Tumor Growth

T. Hitosugi et al.

PERSPECTIVE: PKM2 Tyrosine Phosphorylation and Glutamine Metabolism Signal a Different View of the Warburg Effect

C. V. Dang

Aerobic glycolysis in cancer cells is associated with tyrosine phosphorylation of a metabolic enzyme.

PERSPECTIVE: Acetylation Goes Global—The Emergence of Acetylation Biology

K. L. Norris et al.

Proteomic analysis shows protein acetylation to be more prevalent than previously appreciated.
