Masquerade: Camouflage Without Crypsis
J. Skelhorn et al.
Caterpillars masquerading as twigs are misidentified by chick predators as inanimate objects, rather than remaining undetected.
>> Science Podcast

Dendritic Mechanisms Underlying Rapid Synaptic Activation of Fast-Spiking Hippocampal Interneurons
H. Hu et al.
Potassium channel enrichment in the dendrites of hippocampal basket cells defines a mechanism of neural network function.

An Unusually Fast-Evolving Supernova
D. Poznanski et al.
The distinctive properties of this supernova suggest that it is of a kind predicted by theory but not previously observed.

Polarization-Induced Hole Doping in Wide-Band-Gap Uniaxial Semiconductor Heterostructures
J. Simon et al.
A compositional gradient of two semiconductors creates an electronic polarization that ionizes and activates dopant atoms.

Translocation of Single-Stranded DNA Through Single-Walled Carbon Nanotubes
H. Liu et al.
Transfer of DNA by electrophoresis through some carbon nanotubes is accompanied by giant current pulses.

Solid Nanoparticles That Catalyze Biofuel Upgrade Reactions at the Water/Oil Interface
S. Crossley et al.
Oxide nanoparticles bearing carbon nanotubes and functionalized with palladium act as both emulsifiers and catalysts.
>> Perspective p. 41

Unveiling the Transient Template in the Self-Assembly of a Molecular Oxide Nanowheel
H. N. Miras et al.
Use of a flow reactor reveals a key intermediate in the formation of a molybdenum oxide nanostructure.
>> Perspective p. 38
Gene in Meiotic Recombination Controls Activation of Mammalian Activation—A Potential Podcast to hear about

VOL 327 1 JANUARY 2010

CREDIT: YANA GREENMAN/SCIENCE

Women’s fingers are more sensitive, but that’s just Hand Size—Not Sex—Determines Sense of Touch of nausea at sea.

Changing your breathing pattern may delay the onset Seasick? Try Controlling Your Breathing mastery of fire.

Primates clear an important hurdle in humanlike When Fire Approaches, Chimps Keep Their Cool

within the genome.

in the determination of recombination loci

E. D. Parvanov et al.

Protein PRDM9 Is a Major Determinant of Meiotic Recombination Hotspots in Humans and Mice F. Baudat et al.

Drive Against Hotspot Motifs in Primates Implicates the PRDM9 Gene in Meiotic Recombination S. Myers et al. 10.1126/science.1182363

Pdrn9 Controls Activation of Mammalian Recombination Hotspots E. D. Parvanov et al.

A chromatin-modifying enzyme functions in the determination of recombination loci within the genome.
