COVER
Corals such as this 150-million-year-old colony of Thecosmilia trichotoma (with oyster Actinostreon attached) from southern Germany formed reefs during most of the Phanerozoic eon. These reefs harbored tremendous biodiversity that was subsequently exported to non-reef habitats. See page 196.

**CONTENTS**

**BREVIA**

171 Punishers Benefit From Third-Party Punishment in Fish
N. J. Raihani et al.
In cleaner fish, punishment of foraging partners who cheat a client benefits punishers by increasing future cooperation.

**RESEARCH ARTICLES**

172 Phosphorylation of H2A by Bub1 Prevents Chromosomal Instability Through Localizing Shugoshin
S. A. Kawashima et al.
Phosphorylation of the chromatin protein histone H2A plays a critical role in chromosome segregation during cell division.  
>> Perspective p. 150

177 Quantum Criticality in an Ising Chain: Experimental Evidence for Emergent E8 Symmetry
R. Coldea et al.
A long-predicted hidden symmetry in spin ordering has been observed experimentally at temperatures near absolute zero.

181 Nematic Electronic Structure in the "Parent" State of the Iron-Based Superconductor Ca(Fe1−xCox)2As2
T.-M. Chuang et al.
Unusual electronic ordering was observed in surface measurements of an underdoped phase of a ferropnictide superconductor.  
>> Perspective p. 155

185 Energy-Conversion Properties of Vapor-Liquid-Solid–Grown Silicon Wire-Array Photocathodes
S. W. Boettcher et al.
The use of copper catalysts helps to increase charge-carrier mobilities in silicon microwire growth.

188 Two White Dwarfs with Oxygen-Rich Atmospheres
B. T. Gänsicke et al.
Two white dwarfs may have evolved from intermediate-mass stars that avoided exploding as supernovae.

190 E-Type Asteroid (2867) Steins as Imaged by OSIRIS on Board Rosetta
H. U. Keller et al.
Incident sunlight probably caused this asteroid to spin, which redistributed its mass and smoothed its surface.

193 Iron Partitioning and Density Changes of Pyrolite in Earth’s Lower Mantle
T. Infuie et al.
Increasing the compositional complexity of mantle samples causes an electronic spin transition to occur at lower pressures.

196 Reefs as Cradles of Evolution and Sources of Biodiversity in the Phanerozoic
W. Kiessling et al.
Analysis of fossil evidence indicates that reefs were disproportionally important in the origination of new species.

198 Therapeutic Silencing of MicroRNA-122 in Primates with Chronic Hepatitis C Virus Infection
R. E. Lanford et al.
Targeting a microRNA required for hepatitis C virus infection reduces disease symptoms in chimpanzees.

202 Topology Links RNA Secondary Structure with Global Conformation, Dynamics, and Adaptation
M. H. Bailor et al.
Topological constraints imposed by the secondary structure determine the global conformation ensemble sampled by RNA.

206 Structure of an RNA Polymerase II–TFIIB Complex and the Transcription Initiation Mechanism
X. Liu et al.
X-ray structures provide more details on the initiation of transcription.

210 A Transient Niche Regulates the Specification of Drosophila Intestinal Stem Cells
D. Mathur et al.
Intestinal stem cell progenitors use Notch signaling to specify a niche cell that remains undifferentiated until metamorphosis.

213 Essential Role of the Histone Methyltransferase G9a in Cocaine-Induced Plasticity
I. Maze et al.
Cocaine suppression of histone methylation in the nucleus accumbens mediates the drug’s ability to enhance reward.

217 Overexpression of Alpha2A-Adrenergic Receptors Contributes to Type 2 Diabetes
A. H. Rosengren et al.
Sequence variations in an adrenergic receptor gene cause reduced insulin secretion and contribute to type 2 diabetes.
