### COVER

Dendritic cells of the immune system recognize and bind bacteria and other microbes by means of receptors expressed on the dendritic cell membrane and within the cell, thus triggering an immune response. Microbial sensing is associated with the innate arm of the immune system, and recent developments in this area are described in the special section starting on page 283.

## BREVIA

- 301 **Hungry Codons Promote Frameshifting in Human Mitochondrial Ribosomes**  
*R. Temperley et al.*  
During translation of mitochondrial genes, shifting the ribosome reading frame avoids unconventional arginine codons.

## RESEARCH ARTICLE

- 302 **Adaptive Evolution of Pelvic Reduction in Sticklebacks by Recurrent Deletion of a *Pitx1* Enhancer**  
*Y. F. Chan et al.*  
Loss of a tissue-specific enhancer explains multiple parallel losses of the pelvic girdle in stickleback populations.

## REPORTS

- 306 **Direct Imaging of Bridged Twin Protoplanetary Disks in a Young Multiple Star**  
*S. Mayama et al.*  
An infrared image taken with the Subaru Telescope reveals young binary stars and their circumstellar environments.
- 308 **How the Shape of an H-Bonded Network Controls Proton-Coupled Water Activation in HONO Formation**  
*R. A. Relph et al.*  
Vibrational spectroscopy uncovers the role of a surrounding water network in the mediating reaction of a solvated ion.  
>> *Perspective p. 280*
- 313 **Electrocatalytic CO<sub>2</sub> Conversion to Oxalate by a Copper Complex**  
*R. Angamuthu et al.*  
A copper complex can reductively couple carbon dioxide, even in the presence of oxygen.  
>> *News story p. 257; Science Podcast*
- 315 **Ligand-Enabled Reactivity and Selectivity in a Synthetically Versatile Aryl C–H Olefination**  
*D.-H. Wang et al.*  
A palladium-based catalyst eliminates the need for halogenated compounds for the formation of carbon-carbon bonds.
- 319 **Nanoporous Gold Catalysts for Selective Gas-Phase Oxidative Coupling of Methanol at Low Temperature**  
*A. Wittstock et al.*  
Leaching of gold-silver alloys creates a highly active catalyst for partial oxidation reactions.  
>> *Perspective p. 278*
- 322 **Large-Scale Controls of Methanogenesis Inferred from Methane and Gravity Spaceborne Data**  
*A. A. Bloom et al.*  
Satellite measurements allow the strength of wetland emissions of methane to be determined.

- 326 **Lower Predation Risk for Migratory Birds at High Latitudes**  
*L. McKinnon et al.*  
Egg predation rates measured at artificial nests along a 3000-kilometer transect decrease northwards.  
>> *Perspective p. 276*
- 328 **The Genetic Map of *Artemisia annua* L. Identifies Loci Affecting Yield of the Antimalarial Drug Artemisinin**  
*I. A. Graham et al.*  
A linkage map for an important medicinal crop plant points to breeding targets for enhancing drug production.  
>> *Perspective p. 279*
- 331 **Tetrathiomolybdate Inhibits Copper Trafficking Proteins Through Metal Cluster Formation**  
*H. M. Alvarez et al.*  
Complex formation between a copper chaperone and a metallo-drug prevents copper transfer to target enzymes.
- 335 **Global Analysis of Short RNAs Reveals Widespread Promoter-Proximal Stalling and Arrest of Pol II in *Drosophila***  
*S. Nechaev et al.*  
The initially transcribed sequence plays a key role in inducing polymerase stalling.
- 338 **Unidirectional Airflow in the Lungs of Alligators**  
*C. G. Farmer and K. Sanders*  
Crocodilian and bird lungs share patterns of air flow, indicating a common evolutionary origin.
- 340 **G Protein Subunit G $\alpha_{13}$  Binds to Integrin  $\alpha_{11b}\beta_3$  and Mediates Integrin “Outside-In” Signaling**  
*H. Gong et al.*  
Cell adhesion mediated by integrins is coupled to intracellular signaling by direct binding to G proteins.
- 343 **Functional and Evolutionary Insights from the Genomes of Three Parasitoid *Nasonia* Species**  
*The Nasonia Genome Working Group*  
The genomes of three parasitoid wasp species offer insights into speciation, insect evolution, and parasitoid biology.  
>> *News story p. 260*
- 348 **Zebrafish Behavioral Profiling Links Drugs to Biological Targets and Rest/Wake Regulation**  
*J. Rihel et al.*  
The effects of most neuroactive drugs are conserved and can be detected by behavioral screening.
