CONTENTS

SPECIAL SECTION

Innate Immunity

INTRODUCTION

283 Recognizing the First Responders

PERSPECTIVE

284 RIgorous Detection: Exposing Virus Through RNA Sensing
J. Rehwinkel and C. Reis e Sousa

REVIEWS

286 How the Noninflammasome NLRs Function in the Innate Immune System
J. P. Y. Ting et al.

EDITORIAL

249 New Approaches in Immunotherapy
Paul G. Thomas and Peter C. Doherty

NEWS OF THE WEEK

254 An Indefatigable Debate Over Chronic Fatigue Syndrome
255 Neandertal Jewelry Shows Their Symbolic Smarts
256 NIST Grants Help Schools Build for Tomorrow’s Research
257 Catalyst Offers New Hope for Capturing CO2 on the Cheap

COVER

Dendritic cells of the immune system recognize and bind bacteria and other microbes by means of receptors expressed on the dendritic cell membrane and within the cell, thus triggering an immune response. Microbial sensing is associated with the innate arm of the immune system, and recent developments in this area are described in the special section starting on page 283.

Published by AAAS
BREVIA
301 Hungry Codons Promote Frameshifting in Human Mitochondrial Ribosomes
R. Temperley et al.
During translation of mitochondrial genes, shifting the ribosome reading frame avoids unconventional arginine codons.

RESEARCH ARTICLE
302 Adaptive Evolution of Pelvic Reduction in Sticklebacks by Recurrent Deletion of a Pitx1 Enhancer
Y. F. Chan et al.
Loss of a tissue-specific enhancer explains multiple parallel losses of the pelvic girdle in stickleback populations.

REPORTS
306 Direct Imaging of Bridged Twin Protoplanetary Disks in a Young Multiple Star
S. Mayama et al.
An infrared image taken with the Subaru Telescope reveals young binary stars and their circumstellar environments.

308 How the Shape of an H-Bonded Network Controls Proton-Coupled Water Activation in HONO Formation
R. A. Relph et al.
Vibrational spectroscopy uncovers the role of a surrounding water network in the mediating reaction of a solvated ion.

313 Electrocatalytic CO₂ Conversion to Oxalate by a Copper Complex
R. Angamuthu et al.
A copper complex can reductively couple carbon dioxide, even in the presence of oxygen.

315 Ligand-Enabled Reactivity and Selectivity in a Synthetically Versatile Aryl C–H Olefination
D. H. Wang et al.
A palladium-based catalyst eliminates the need for halogenated compounds for the formation of carbon-carbon bonds.

319 Nanoporous Gold Catalysts for Selective Gas-Phase Oxidative Coupling of Methanol at Low Temperature
A. Wittstock et al.
Leaching of gold-silver alloys creates a highly active catalyst for partial oxidation reactions.

322 Large-Scale Controls of Methanogenesis Inferred from Methane and Gravity Spaceborne Data
A. A. Bloom et al.
Satellite measurements allow the strength of wetland emissions of methane to be determined.

326 Lower Predation Risk for Migratory Birds at High Latitudes
L. McKinnon et al.
Egg predation rates measured at artificial nests along a 3000-kilometer transect decrease northwards.

328 The Genetic Map of Artemisia annua L. Identifies Loci Affecting Yield of the Antimalarial Drug Artemisinin
I. A. Graham et al.
A linkage map for an important medicinal crop plant points to breeding targets for enhancing drug production.

331 Tetraethylomolybdate Inhibits Copper Trafficking Proteins Through Metal Cluster Formation
H. M. Alvarez et al.
Complex formation between a copper chaperone and a metallo-drug prevents copper transfer to target enzymes.

335 Global Analysis of Short RNAs Reveals Widespread Promoter-Proximal Stalling and Arrest of Pol II in Drosophila
S. Nechaev et al.
The initially transcribed sequence plays a key role in inducing polymerase stalling.

338 Unidirectional Airflow in the Lungs of Alligators
C. G. Farmer and K. Sanders
Crocodilian and bird lungs share patterns of air flow, indicating a common evolutionary origin.

340 G Protein Subunit Gα₁₃B Binds to Integrin αIIbβ₃ and Mediates Integrin “Outside-In” Signaling
H. Gong et al.
Cell adhesion mediated by integrins is coupled to intracellular signaling by direct binding to G proteins.

343 Functional and Evolutionary Insights from the Genomes of Three Parasitoid Nasonia Species
The Nasonia Genome Working Group
The genomes of three parasitoid wasp species offer insights into speciation, insect evolution, and parasitoid biology.

348 Zebrafish Behavioral Profiling Links Drugs to Biological Targets and Rest/Wake Regulation
J. Rihel et al.
The effects of most neuroactive drugs are conserved and can be detected by behavioral screening.
RESEARCH ARTICLE: Quantitative Phosphoproteomics Reveals Widespread Full Phosphorylation Site Occupancy During Mitosis
J. V. Olsen et al.
Protein phosphorylation during the cell cycle may be an all-or-none process in many instances.

PERSPECTIVE: Cyclic Nucleotides Converge on Brown Adipose Tissue Differentiation
P. S. Amies and G. S. McKnight
cGMP-mediated signaling pathways are required for the differentiation and function of brown adipocytes.

REVIEW: Basal Release of ATP—An Autocrine-Paracrine Mechanism for Cell Regulation
R. Corrden and P. A. Insell
Responses to ATP play an important role in regulating the signaling and function of a diverse array of cells and tissues.

GLOSSARY
Discover what RANKL and RANK mean in the world of signaling.

RESEARCH ARTICLE: Extensive Crosstalk Between O-GlcNAcylation and Phosphorylation Regulates Cytokinesis
Z. Wang et al.
Protein O-GlcNAcylation regulates cell division.

RESEARCH ARTICLE: Uncovering Residual Effects of Chronic Sleep Loss on Human Performance
D. A. Cohen et al.
Sleep loss may be lost forever.

RESEARCH ARTICLE: Intermittent Prophylaxis with Oral Truvada Protects Macaques from Rectal SHIV Infection
J. G. Garcia-Lerma et al.
Treating monkeys with an antiretroviral drug before and after exposure to SHIV provides protection against infection.

SCIENCEEXPRESS
www.sciencexpress.org
A Genetic Variant BDNF Polymorphism Alters Extinction Learning in Both Mouse and Human
F. Soliman et al.
Commonly genetic variation in fear learning operates through the same pathways in mice and men. 10.1126/science.1183866

Evolutionary Dynamics of Complex Networks of HIV Drug-Resistant Strains: The Case of San Francisco
R. J. Smith et al.
Modeling of data from the U.S. indicates the potential for an epidemic wave of antiretroviral-resistant HIV. 10.1126/science.1180556

Ferroelectric Control of Spin Polarization
V. Garcia et al.
Ferroelectric tunnel junctions control the spin polarization of electrons emitted from iron electrodes. 10.1126/science.1184028

Effect of Ocean Acidification on Iron Availability to Marine Phytoplankton
D. Shi et al.
Ocean acidification caused by anthropogenic carbon dioxide is changing the chemistry and bioavailability of iron in seawater. 10.1126/science.1183517

Deglacial Meltwater Pulse 1B and Younger Dryas Sea Levels Revisited with Boreholes at Tahiti
E. Bard et al.
A coral-based record of sea level from Tahiti defines changes in the rate of sea-level rise between 14,000 and 9000 years ago. 10.1126/science.1180557
