REVIEW
656 Development of Monocytes, Macrophages, and Dendritic Cells
F. Geissmann et al.

BREVIA
662 100-GHz Transistors from Wafer-Scale Epitaxial Graphene
Y.-M. Lin et al.
The maximum switching frequency of these devices exceeds that of silicon transistors with similar gate-electrode dimensions.

REPORTS

663  Detection of Gamma-Ray Emission from the Vela Pulsar Wind Nebula with AGILE
A. Pellizzoni et al.
Pulsar wind nebulae could account for some of the yet unidentified galactic gamma-ray sources.

665  Visualizing Critical Correlations Near the Metal-Insulator Transition in Ga$_{1-x}$Mn$_x$As
A. Richardella et al.
Scanning tunneling microscopy reveals the import role of electron-electron interactions in a dilute magnetic semiconductor.

669  A Coherent Beam Splitter for Electronic Spin States
J. R. Petta et al.
A series of electrical pulses is used to demonstrate quantum control of a double quantum dot system.

672  Water Freezes Differently on Positively and Negatively Charged Surfaces of Pyroelectric Materials
D. Ehre et al.
Supercooled water on a surface can freeze upon heating in response to surface charge switching from negative to positive.

676  Effect of Ocean Acidification on Iron Availability to Marine Phytoplankton
D. Shi et al.
Ocean acidification caused by anthropogenic carbon dioxide is changing the chemistry and bioavailability of iron in seawater.

679  Gradual Adaptation Toward a Range-Expansion Phenotype Initiated the Global Radiation of Toads
I. Van Bocxlaer et al.
The range expansions and species radiations of toads required the evolution of an optimal dispersal phenotype.

682  Flight Orientation Behaviors Promote Optimal Migration Trajectories in High-Flying Insects
J. W. Chapman et al.
Radar reveals that insects use high-altitude winds and correct for crosswind drift during long-range migrations.

685  Conformational Spread as a Mechanism for Cooperativity in the Bacterial Flagellar Switch
F. Bai et al.
The behavior of the bacterial flagellar switch is modeled by probabilistic conformational coupling of the protein.

689  Cryo-EM Model of the Bullet-Shaped Vesicular Stomatitis Virus
P. Ge et al.
The structure of a negative-strand RNA virus suggests how bullet-shaped rhabdoviruses assemble.

693  Abundance of Ribosomal RNA Gene Copies Maintains Genome Integrity
S. Ide et al.
In eukaryotes, multiple copies of ribosomal DNA protect it from transcription-induced replication damage.

697  Evolutionary Dynamics of Complex Networks of HIV Drug-Resistant Strains: The Case of San Francisco
R. J. Smith et al.
Modeling of data from the U.S. indicates the potential for an epidemic wave of antiretroviral-resistant HIV.

701  Optimal Localization by Pointing Off Axis
Y. Yovel et al.
Echolocating Egyptian fruit bats do not center their sonar clicks on a target, thereby maximizing localization of the target.

704  Axon Extension Occurs Independently of Centrosomal Microtubule Nucleation
M. Stiess et al.
Neuronal polarization and axon regeneration depend on decentralized microtubule assembly rather than a functional centrosome.

CONTENTS continued >>
How Carnations Conquered Europe
Rapid diversification of flower suggests continent may have been an evolutionary hot spot.

RESEARCH ARTICLE: Noncoding RNA Gas5
Is a Growth Arrest–and Starvation-Associated Repressor of the Glucocorticoid Receptor
T. Kino and et al.
Gas5 is a noncoding RNA that acts as a decoy glucocorticoid response element to inhibit glucocorticoid-mediated transcription.

MEETING REPORT: BMPs—From Bone to Body Morphogenetic Proteins
D. Obradovic Wagner and et al.
Discussion at a meeting in Berlin, Germany, showed that BMPs have essential functions in organs and tissues besides bone.

CD32, a molecule specifically found in human leukemia stem cells, is a promising target for therapy.

RESEARCH ARTICLE: Inducing CTLA-4–Dependent Immune Regulation by Selective CD28 Blockade Promotes Regulatory T Cells in Organ Transplantation
N. Poirier and et al.
An improved method of immunosuppression enhances the survival of transplanted organs in nonhuman primates.
