BOOKS ET AL.
784 The Language of Life
F. S. Collins, reviewed by T. Harris

782 The Coral Thief
R. Stott, reviewed by R. Milner

CONTENTS continued >>
Spin-Dependent Quantum Interference Within a Single Magnetic Nanostructure
H. Oka et al.
Magnetization modulation is observed on a cobalt nanoisland using spin-polarized scanning tunneling microscopy.

Multiple Functional Groups of Varying Ratios in Metal-Organic Frameworks
H. Deng et al.
The adsorption characteristics for mixed linkers can exceed that expected from just combining the single-linker compounds.

Break-Up of Stepped Platinum Catalyst Surfaces by High CO Coverage
F. Tao et al.
Stepped platinum surfaces break up into nanometer-scale clusters at high carbon monoxide surface coverages.

Quantum-State Controlled Chemical Reactions of Ultracold Potassium-Rubidium Molecules
S. Ospelkaus et al.
Reactions mediated by quantum mechanical tunneling are observed, even in a sample of molecules cooled almost to a standstill.

Low-Frequency Modes of Aqueous Alkali Halide Solutions: Glimpsing the Hydrogen Bonding Vibration
I. A. Heisler and S. R. Meech
An optical scattering technique is used to map the weak bonding interaction between water and dissolved halide ions.

Sea-Level Highstand 81,000 Years Ago in Mallorca
J. A. Dorale et al.
Measurements from the island of Mallorca indicate that past sea levels were much higher than had been assumed.

A Genetic Variant BDNF Polymorphism Alters Extinction Learning in Both Mouse and Human
F. Saliman et al.
A common genetic variation affecting fear learning and extinction operates through the same pathways in mice and men.

Vibrio cholerae VpsT Regulates Matrix Production and Motility by Directly Sensing Cyclic di-GMP
P. V. Kravets et al.
A bacterial signaling molecule induces the dimerization and activation of a biofilm-promoting transcription factor.

Darwinian Evolution of Prions in Cell Culture
J. Li et al.
When propagated in vitro, prion strains demonstrate adaptability and selection.

Repulsion of Superinfecting Virions: A Mechanism for Rapid Virus Spread
V. Doceul et al.
Early in infection, vaccinia virus exploits the actin cytoskeleton to promote rapid cell-to-cell spread.

Drive Against Hotspot Motifs in Primates Implicates the PRDM9 Gene in Meiotic Recombination
S. Myers et al.
Bioinformatics identifies a chromatin-modifying enzyme as a factor in determining recombination hotspots.

The Lmo2 Oncogene Initiates Leukemia in Mice by Inducing Thymocyte Self-Renewal
M. P. McCormack et al.
Expression of an oncogene confers self-renewal activity to committed T cells in the thymus long before disease onset.

A Composite of Multiple Signals Distinguishes Causal Variants in Regions of Positive Selection
S. R. Grossman et al.
Combining statistical methods detects signals of selection with increased sensitivity and a lower false-positive rate.

Highlights From Our Daily News Coverage
Australia, Antarctica Linked by Climate
Carbon dioxide emissions could be leading
to record drought and snowfalls.

Can Thin Mountain Air Make You Slim?
High living—in the topographical sense—
causes weight loss, a study suggests.

Better to React Than to Act
Legendary quantum physicist’s speculations about
Westerns inspire discovery about reaction speed.

SCIENCE SIGNALING
www.sciencesignaling.org

The Signal Transduction Knowledge Environment

RESEARCH ARTICLE: ARD1 Stabilization of TSC2 Suppresses Tumorigenesis Through the mTOR Signaling Pathway
H.-P. Kuo et al.
Acetylation by ARD1 of an inhibitor of mammalian
target of rapamycin may inhibit cancer growth.

RESEARCH ARTICLE: SUMOylation Mediates the Nuclear Translocation and Signaling of the IGF-1 Receptor
B. Sehat et al.
Attachment of SUMO lets insulin-like growth factor
receptors act as transcriptional regulators in the nucleus.

PERIODICALS:
Gluucocorticoid Receptor DNA Binding Decoy Is a Gas
M. J. Garabedian and S. K. Logan
By mimicking a DNA response element, a noncoding RNA inhibits glucocorticoid receptor activity.

SCIENCE CAREERS
www.sciencemag.org/career_magazine

Free Career Resources for Scientists

Plant Geneticist Cultivating a Future for Peanut Farming in Uganda
G. Vince
David Kalule Okello is one of Uganda’s weapons in the battle against hunger.

Careers in Food Security Span Several Disciplines
C. J. Janes
Feeding the planet is an urgent issue that needs scientists in many different fields.

Integrating Medicine and Science

PERIODICALS:
DNA Binding Decoy Is a Gas
M. J. Garabedian and S. K. Logan
By mimicking a DNA response element, a noncoding RNA inhibits glucocorticoid receptor activity.

Genetic Polymorphisms— A Cornerstone of Translational Biobehavioral Research
A. R. Harriri
Understanding common genetic variation can serve to explain individual behaviors.

COMMENTARY: Liberating Health Data for Clinical Research Applications
Jr. J. Norddor and G. J. Downing
Electronic health record systems represent important new strategies to improve health care.

RESEARCH ARTICLE: The Origins of Sexually Transmitted HIV Among Men Who Have Sex with Men
D. M. Butler et al.
A cell-free virus in semen is the origin of sexually transmitted HIV among men who have sex with men.

RESEARCH ARTICLE: A Monoclonal Antibody Against αVβ3 Integrin Inhibits Development of Atherosclerotic Lesions in Diabetic Pigs
L. A. Maile et al.
An antibody directed at the C terminal of an integrin subunit can prevent atherosclerosis in diabetic pigs.
