RESEARCH ARTICLE

N-Terminal Acetylation of Cellular Proteins Creates Specific Degradation Signals  
C.-S. Hwang et al.  
In vivo protein stoichiometries are regulated through N-terminally acetylated degrons.  
>> Perspective p. 966

REPORTS

Kepler Planet-Detection Mission: Introduction and First Results  
W. J. Borucki et al.  
Initial observations confirm the existence of planets with densities lower than those predicted for gas giant planets.

Tuning the Dimensionality of the Heavy Fermion Compound CeIn$_3$  
H. Shishido et al.  
A quantum phase transition is achieved by varying the dimension of a heavy fermion superlattice.  
>> Perspective p. 969

The Silicate-Mediated Formose Reaction: Bottom-Up Synthesis of Sugar Silicates  
J. B. Lambert et al.  
Sugar growth and stabilization catalyzed by silicate ions is a possible prebiotic synthetic pathway.  
>> Science Podcast

Asymmetric Cooperative Catalysis of Strong Brønsted Acid–Promoted Reactions Using Chiral Ureas  
H. Xu et al.  
A chiral co-catalyst complements acid to raise selectivity at the expense of speed in organic coupling reactions.  
>> Perspective p. 965

100-Million-Year Dynasty of Giant Planktivorous Bony Fishes in the Mesozoic Seas  
M. Friedman et al.  
The extinction of widespread large plankton-eating fish led to the emergence of whales in the Cenozoic.

Climate, Critters, and Cetaceans: Cenozoic Drivers of the Evolution of Modern Whales  
F. G. Marx and M. D. Uhen  
The diversity of whales during the Cenozoic varied in response to the diversity of diatoms and ocean temperatures.  
>> Perspective p. 968

Regulation of Alternative Splicing by Histone Modifications  
R. F. Luco et al.  
Histone modifications regulate alternative splicing through physical cross talk with the splicing machinery.

Regulation of Cellular Metabolism by Protein Lysine Acetylation  
S. Zhao et al.  
Regulation of enzymes by acetylation controls metabolic function in human liver cells.

Acetylation of Metabolic Enzymes Coordinates Carbon Source Utilization and Metabolic Flux  
Q. Wang et al.  
Reversible acetylation of metabolic enzymes helps bacteria adjust to changes in food resources.  
>> Perspective p. 964

Significant Acidification in Major Chinese Croplands  
J. H. Guo et al.  
Intensifying agriculture in China in the past 30 years is the major contributor to soil acidification at the regional scale.

Peptidomimetic Antibiotics Target Outer-Membrane Biogenesis in Pseudomonas aeruginosa  
N. Srinivas et al.  
A synthesized antibiotic targets a protein involved in outer-membrane biogenesis to selectively kill Pseudomonas pathogens.

NMR Structure Determination for Larger Proteins Using Backbone-Only Data  
S. Raman et al.  
Protein structures can be determined by using the limited nuclear magnetic resonance information obtainable for larger proteins.

Limits of Predictability in Human Mobility  
C. Song et al.  
Analysis of the trajectories of people carrying cell phones reveals that human mobility patterns are highly predictable.

SCIENCEONLINE

SCIENCEEXPRESS  www.scienceexpress.org
Design of Polymethine Dyes with Large Third-Order Optical Nonlinearities and Loss Figures of Merit
J. M. Hales et al.
Nonlinear optical materials are designed and characterized for potential applications in all-optical switching.
10.1126/science.1185117

SCIENCENOW  www.sciencenow.org
Highlights From Our Daily News Coverage
Is That Elephant Running? Don’t Bet on It
New study argues that, regardless of their speed, elephants don’t actually run.

What Doesn’t Kill Microbes, Makes Them Stronger
Low levels of antibiotics trigger mutations that cause resistance.

Ancient Human Sequenced for First Time
Strands of hair paint detailed picture of 4000-year-old Greenlander.

SCIENCE SIGNALING  www.sciencesignaling.org
The Signal Transduction Knowledge Environment
RESEARCH ARTICLE: Microbial Hijacking of Complement–Toll-Like Receptor Crosstalk
M. Wang et al.
Pathogen-instigated crosstalk between the complement C5a receptor and Toll-like receptor 2 disables innate immune function.

RESEARCH ARTICLE: Deciphering Protein Kinase Specificity Through Large-Scale Analysis of Yeast Phosphorylation Site Motifs
J. Mok et al.
A high-throughput peptide array approach reveals insight into kinase substrates and specificity.

CONNECTIONS MAP: Jasmonate Biochemical Pathway
A. Gfeller et al.
Jasmonates are potent physiological and developmental regulators synthesized from fatty acid precursors.

CONNECTIONS MAP: Arabidopsis Jasmonate Signaling Pathway
A. Gfeller et al.
Jasmonates regulate various aspects of physiology and development in Arabidopsis thaliana.

PODCAST
G. Hajishengallis and A. M. VanHook
The pathogen Porphyromonas gingivalis evades the innate immune system by initiating signaling cross talk.

SCIENCE CAREERS  www.sciencecareers.org/career_magazine
Free Career Resources for Scientists
Tooling Up: The Applications Scientist Career Track
D. Jensen
An "applications scientist" job can link the bench to other industry careers.

Protecting Poland’s Rapeseed Crop
A. Curry
Małgorzata Jedryczka’s system for detecting crop pathogens has become a national industry-sponsored program.

Perspective: Audacity Is Overrated
E. Diamandis
The audacious approach to science is not the best approach, especially for scientists in training.

SCIENCE TRANSLATIONAL MEDICINE  www.sciencetranslationalmedicine.org
Integrating Medicine and Science
COMMENTARY: Ten Years of the Immune Tolerance Network—An Integrated Clinical Research Organization
J. A. Bluestone et al.
New insights from old programs yield the equation for a successful research program.

COMMENTARY: Medical Education Research as Translational Science
W. C. McGaghie
Early incorporation of translational science in physician education will improve patient care.

RESEARCH ARTICLE: Long-Term Thermostabilization of Live Poxviral and Adenoviral Vaccine Vectors at Supraphysiological Temperatures in Carbohydrate Glass
R. Alcock et al.
A sucrose-trehalose glass film dried onto a filter can preserve the activity of vaccine viral vectors.

RESEARCH ARTICLE: S-Nitrosylation from GSNOR Deficiency Impairs DNA Repair and Promotes Hepatocarcinogenesis
W. Wei et al.
An enzyme that removes harmful marks from cellular proteins guards against liver cancer.

Science Policy News and Analysis

SCIENCE (ISSN 0036-8075) is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1200 New York Avenue, NW, Washington, DC 20005. Periodicals Mail postage (publication No. 484460) paid at Washington, DC, and additional mailing offices. Copyright © 2009 by the American Association for the Advancement of Science. The title SCIENCE is a registered trademark of the AAAS. Domestic individual membership and subscription (US issued): $148 ($174 allocated to subscriptions). Domestic institutional subscription (US issued): $1135. Foreign postage extra: Mexico, Caribbean Surface mail 155; other countries (air assist delivery) $585. First class, airmail, student, andemeritus rates on request. Canadian rates with GST available upon request, GST #12554 08122. Publications Mail Agreement Number 1069424. Printed in the U.S.A.
Change of address: Allow 4 weeks, giving old and new addresses and 8-digit account number. Postmaster: Send change of address to AAAS, P.O. Box 75310, Washington, DC 20090-0178. Single-copy sales: $10.00 current issue, $15.00 back issue prepaid includes surface postage, bulk rates on request. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that $20.00 per article is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923. The identification code for Science’s (0036-8075) Science is indexed in the Reader’s Guide to Periodical Literature and in several specialized indexes.
