N. Fumio and K. Arnold, curators

POLICY FORUM
962 NIH Guidelines for Stem Cell Research and Gamete Donors
B. Lo et al.

PERSPECTIVES
964 Rise of the Rival
A. Norvell and S. B. McMahon
>> Reports pp. 1000 and 1004
965 Cooperativity Tames Reactive Catalysts
P. R. Schreiner
>> Report p. 986
966 When the Beginning Marks the End
A. Mogk and B. Bukau
>> Research Article p. 973
968 On Giant Filter Feeders
L. Cavin
>> Reports pp. 990 and 993
969 The Lowdown on Heavy Fermions
P. Coleman
>> Report p. 980

CONTENTS continued >>
Can We Understand Clouds Without Turbulence?
E. Bodenschatz et al.

P. Leder

N-Terminal Acetylation of Cellular Proteins Creates Specific Degradation Signals
C.-S. Hwang et al.
In vivo protein stoichiometries are regulated through N-terminally acetylated degrons.

>> Perspective p. 966

Kepler Planet-Detection Mission: Introduction and First Results
W. J. Borucki et al.
Initial observations confirm the existence of planets with densities lower than those predicted for gas giant planets.

>> Perspective p. 969

Tuning the Dimensionality of the Heavy Fermion Compound CeIn$_3$
H. Shishido et al.
A quantum phase transition is achieved by varying the dimension of a heavy fermion superlattice.

>> Science Podcast

The Silicate-Mediated Formose Reaction: Bottom-Up Synthesis of Sugar Silicates
J. B. Lambert et al.
Sugar growth and stabilization catalyzed by silicate ions is a possible prebiotic synthetic pathway.

>> Science Podcast

Asymmetric Cooperative Catalysis of Strong Brønsted Acid–Promoted Reactions Using Chiral Ureas
H. Xu et al.
A chiral co-catalyst complements acid to raise selectivity at the expense of speed in organic coupling reactions.

>> Perspective p. 965

100-Million-Year Dynasty of Giant Planktivorous Bony Fishes in the Mesozoic Seas
M. Friedman et al.
The extinction of widespread large plankton-eating fish led to the emergence of whales in the Cenozoic.

>> Perspective p. 968

Regulation of Alternative Splicing by Histone Modifications
R. F. Luco et al.
Histone modifications regulate alternative splicing through physical cross talk with the splicing machinery.

Regulation of Cellular Metabolism by Protein Lysine Acetylation
S. Zhao et al.
Regulation of enzymes by acetylation controls metabolic function in human liver cells.

Acetylation of Metabolic Enzymes Coordinates Carbon Source Utilization and Metabolic Flux
Q. Wang et al.
Reversible acetylation of metabolic enzymes helps bacteria adjust to changes in food resources.

>> Perspective p. 964

Significant Acidification in Major Chinese Croplands
J. H. Guo et al.
Intensifying agriculture in China in the past 30 years is the major contributor to soil acidification at the regional scale.

Peptidomimetic Antibiotics Target Outer-Membrane Biogenesis in Pseudomonas aeruginosa
N. Srinivas et al.
A synthesized antibiotic targets a protein involved in outer-membrane biogenesis to selectively kill Pseudomonas pathogens.

NMR Structure Determination for Larger Proteins Using Backbone-Only Data
S. Raman et al.
Protein structures can be determined by using the limited nuclear magnetic resonance information obtainable for larger proteins.

Limits of Predictability in Human Mobility
C. Song et al.
Analysis of the trajectories of people carrying cell phones reveals that human mobility patterns are highly predictable.

The pathogen
G. Hajishengallis and A. M. VanHook
PODCAST
and development in
Jasmonates regulate various aspects of physiology
A. Gfeller
Jasmonate Biochemical Pathway
A. Gfeller et al.
Jasmonates are potent physiological and developmental regulators synthesized from fatty acid precursors.

CONNECTIONS MAP: Arabidopsis Jasmonate Signaling Pathway
A. Gfeller et al.
Jasmonates regulate various aspects of physiology and development in Arabidopsis thaliana.

PODCAST
G. Hajishengallis and A. M. VanHook
The pathogen Porphyromonas gingivalis evades the innate immune system by initiating signaling cross-talk.

SCIENCE
VOL 327 19 FEBRUARY 2010

New study argues that, regardless of their speed, elephants don’t actually run.
What Doesn’t Kill Microbes, Makes Them Stronger
Low levels of antibiotics trigger mutations that cause resistance.
Ancient Human Sequenced for First Time
Strands of hair paint detailed picture of 4000-year-old Greenlander.

SIGNALING
Insight into an oral pathogen.
www.sciencesignaling.org

RESEARCH ARTICLE: Microbial Hijacking of Complement–Toll-Like Receptor Crosstalk
M. Wang et al.
Pathogen-instigated crosstalk between the complement C5a receptor and Toll-like receptor 2 disables innate immune function.

RESEARCH ARTICLE: Deciphering Protein Kinase Specificity Through Large-Scale Analysis of Yeast Phosphorylation Site Motifs
J. Mok et al.
A high-throughput peptide array approach reveals insight into kinase substrates and specificity.

CONNECTIONS MAP: Jasmonate Biochemical Pathway
A. Gfeller et al.
Jasmonates are potent physiological and developmental regulators synthesized from fatty acid precursors.
