COVER
“Branching Morphogenesis,” an installation made from more than
75,000 interconnected cable zip ties, illustrates the predicted forces
generated by human lung endothelial cells as they form networks
within an extracellular matrix over time. Winners of the 2009
Science/NSF International Science & Engineering Visualization
Challenge are featured in a special section starting on page 945.

Image: Jenny E. Sabin; installation: Peter Lloyd Jones, Jenny E. Sabin,
Andrew Lucia, Annette Fierro/Sabin+Jones LabStudio, University
of Pennsylvania

RESEARCH ARTICLE

N-Terminal Acetylation of Cellular Proteins Creates Specific Degradation Signals  
C.-S. Hwang et al.  
In vivo protein stoichiometries are regulated through N-terminally acetylated degrons.  
>> Perspective p. 966

REPORTS

Kepler Planet-Detection Mission: Introduction and First Results  
W. J. Borucki et al.  
Initial observations confirm the existence of planets with densities lower than those predicted for gas giant planets.

Tuning the Dimensionality of the Heavy Fermion Compound CeIn₃  
H. Shishido et al.  
A quantum phase transition is achieved by varying the dimension of a heavy fermion superlattice.  
>> Perspective p. 969

The Silicate-Mediated Formose Reaction: Bottom-Up Synthesis of Sugar Silicates  
J. B. Lambert et al.  
Sugar growth and stabilization catalyzed by silicate ions is a possible prebiotic synthetic pathway.  
>> Science Podcast

Asymmetric Cooperative Catalysis of Strong Brønsted Acid–Promoted Reactions Using Chiral Ureas  
H. Xu et al.  
A chiral co-catalyst complements acid to raise selectivity at the expense of speed in organic coupling reactions.  
>> Perspective p. 965

100-Million-Year Dynasty of Giant Planktivorous Bony Fishes in the Mesozoic Seas  
M. Friedman et al.  
The extinction of widespread large plankton-eating fish led to the emergence of whales in the Cenozoic.

Climate, Critters, and Cetaceans: Cenozoic Drivers of the Evolution of Modern Whales  
F. G. Marx and M. D. Uhen  
The diversity of whales during the Cenozoic varied in response to the diversity of diatoms and ocean temperatures.  
>> Perspective p. 968

Regulation of Alternative Splicing by Histone Modifications  
R. F. Luco et al.  
Histone modifications regulate alternative splicing through physical cross talk with the splicing machinery.

Regulation of Cellular Metabolism by Protein Lysine Acetylation  
S. Zhao et al.  
Regulation of enzymes by acetylation controls metabolic function in human liver cells.

Acetylation of Metabolic Enzymes Coordinates Carbon Source Utilization and Metabolic Flux  
Q. Wang et al.  
Reversible acetylation of metabolic enzymes helps bacteria adjust to changes in food resources.  
>> Perspective p. 964

Significant Acidification in Major Chinese Croplands  
J. H. Guo et al.  
Intensifying agriculture in China in the past 30 years is the major contributor to soil acidification at the regional scale.

Peptidomimetic Antibiotics Target Outer-Membrane Biogenesis in Pseudomonas aeruginosa  
N. Srinivas et al.  
A synthesized antibiotic targets a protein involved in outer-membrane biogenesis to selectively kill Pseudomonas pathogens.

NMR Structure Determination for Larger Proteins Using Backbone-Only Data  
S. Raman et al.  
Protein structures can be determined by using the limited nuclear magnetic resonance information obtainable for larger proteins.

Limits of Predictability in Human Mobility  
C. Song et al.  
Analysis of the trajectories of people carrying cell phones reveals that human mobility patterns are highly predictable.  
>> Science Podcast

CONTENTS continued >>
The pathogen Porphyromonas gingivalis evades the innate immune system by initiating signaling cross talk.

SCIENCE CAREERS
www.sciencecareers.org/career_magazine
Free Career Resources for Scientists

Tooling Up: The Applications Scientist Career Track
D. Jensen
An "applications scientist" job can link the bench to other industry careers.

Protecting Poland’s Rapeseed Crop
A. Curry
Malgorzata Jedryczka’s system for detecting crop pathogens has become a national industry-sponsored program.

Perspective: Audacity Is Overrated
E. Diamond
The audacious approach to science is not the best approach, especially for scientists in training.

SCIENCE TRANSLATIONAL MEDICINE
www.sciencetranslationalmedicine.org
Integrating Medicine and Science

COMMENTARY: Ten Years of the Immune Tolerance Network—An Integrated Clinical Research Organization
J. A. Bluestone et al.
New insights from old programs yield the equation for a successful research program.

COMMENTARY: Medical Education Research as Translational Science
W. C. McGaghie et al.
Early incorporation of translational science in physician education will improve patient care.

RESEARCH ARTICLE: Long-Term Thermostabilization of Live Poxviral and Adenoviral Vaccine Vectors at Supraphysiological Temperatures in Carbohydrate Glass
R. Alcock et al.
A sucrose-trehalose glass film dried onto a filter can preserve the activity of vaccine viral vectors.

RESEARCH ARTICLE: S-Nitrosylation from GSNOR Deficiency Impairs DNA Repair and Promotes Hepatocarcinogenesis
W. Wei et al.
An enzyme that removes harmful marks from cellular proteins guards against liver cancer.
