REVIEW

1098  Mechanisms Underlying Lineage Commitment and Plasticity of Helper CD4+ T Cells
       J. J. O’Shea and W. E. Paul

REPORTS

1103  Gamma-Ray Emission from the Shell of Supernova Remnant W44 Revealed by the Fermi LAT
       A. A. Abdo et al.
       Satellite observations suggest that protons are accelerated in the shell of a supernova remnant.

1106  Ferroelectric Control of Spin Polarization
       V. Garcia et al.
       Ferroelectric tunnel junctions control the spin polarization of electrons emitted from iron electrodes.

1110  Integrated Catalytic Conversion of γ-Valerolactone to Liquid Alkenes for Transportation Fuels
       J. Q. Bond et al.
       A biomass-derived compound is transformed into hydrocarbon fuels and a CO₂ stream amenable to sequestration.
       >> Science Podcast

1114  Reconstructing Past Seawater Mg/Ca and Sr/Ca from Mid-Ocean Ridge Flank Calcium Carbonate Veins
       R. M. Coggon et al.
       Calcium carbonate veins from the ocean crust can be used to reconstruct past ocean cation ratios.
       >> Perspective p. 1092

1117  Climate-Modulated Channel Incision and Rupture History of the San Andreas Fault in the Carrizo Plain
       L. Grant Ludwig et al.

1119  Slip in the 1857 and Earlier Large Earthquakes Along the Carrizo Plain, San Andreas Fault
       O. Zielke et al.
       The historical behavior of the San Andreas Fault may have been dominated by smaller, more frequent slip events.
       >> Books p. 1082; Perspective p. 1089

1122  Plant Peptides Govern Terminal Differentiation of Bacteria in Symbiosis
       W. Van de Velde et al.

1126  A Nodule-Specific Protein Secretory Pathway Required for Nitrogen-Fixing Symbiosis
       D. Wang et al.
       Products encoded by the leguminous plant Medicago direct the differentiation of the bacterial partner in symbiosis.

1129  Individuals and the Variation Needed for High Species Diversity in Forest Trees
       J. S. Clark
       Within-species variation in response to environmental conditions may explain the coexistence of forest tree species.

1132  Generating a Prion with Bacterially Expressed Recombinant Prion Protein
       F. Wang et al.
       Recombinant prion protein recapitulates the characteristics of the infectious agent in prion disease.
       >> Perspective p. 1091

1135  Inhibition of NF-κB Signaling by A20 Through Disruption of Ubiquitin Enzyme Complexes
       N. Shembade et al.
       The multifunctional A20 protein can act in diverse ways to limit receptor-induced inflammatory signaling.
       >> Perspective p. 1093

1139  Photorhabdus luminescens Toxins ADP-Ribosylate Actin and RhoA to Force Actin Clustering
       A. E. Lang et al.
       A bacterial toxin targets and modifies the actin cytoskeleton in insect larvae.

1142  Noise Can Induce Bimodality in Positive Transcriptional Feedback Loops Without Bistability
       T.-L. To and N. Maheshri
       Noise induced by multiple binding sites, rather than deterministic bistability, may cause bimodal gene expression in yeast.
       >> Perspective p. 1088

1145  Cortical Plasticity Induced by Inhibitory Neuron Transplantation
       D. G. Southwell et al.
       Plasticity in the mouse brain’s visual cortex can be re-induced by neurons embedded by an earlier transplantation.
