COVER

Scanning electron micrograph of the fruit fly *Drosophila melanogaster* (magnification 80 \times , eyes pseudo-colored). Sestrin, an evolutionarily conserved protein, helps protect fruit flies from age-related pathologies, including fat accumulation, muscle degeneration, and heart failure. See page 1223.

REVIEW

- 1214 The Chicxulub Asteroid Impact and Mass Extinction at the Cretaceous-Paleogene Boundary
P. Schulte et al.

RESEARCH ARTICLES

- 1219 Contributions of Stratospheric Water Vapor to Decadal Changes in the Rate of Global Warming
S. Solomon et al.
Decreases in stratospheric water vapor after the year 2000 slowed the rate of increase in global surface temperature.
- 1223 Sestrin as a Feedback Inhibitor of TOR That Prevents Age-Related Pathologies
J. H. Lee et al.
Sestrin proteins protect fruit flies from the tissue degeneration and disruption of metabolic homeostasis that accompany aging.
>> *Perspective p. 1210*

REPORTS

- 1228 Symmetric Inertial Confinement Fusion Implosions at Ultra-High Laser Energies
S. H. Glenzer et al.
- 1231 Charged-Particle Probing of X-ray-Driven Inertial-Fusion Implosions
C. K. Li et al.
Laser-driven temperatures and implosion symmetry are close to the requirements for inertial-fusion ignition.
>> *Perspective p. 1208*
- 1235 Deglacial Meltwater Pulse 1B and Younger Dryas Sea Levels Revisited with Boreholes at Tahiti
E. Bard et al.
A coral-based record of sea level from Tahiti defines changes in the rate of sea-level rise between 14,000 and 9000 years ago.
- 1238 Geodynamo, Solar Wind, and Magnetopause 3.4 to 3.45 Billion Years Ago
J. A. Tarduno et al.
Analysis of ancient silicate crystals indicates that Earth's magnetic field existed 3.40 to 3.45 billion years ago.
>> *Perspective p. 1206*
- 1241 Calibrating the Cryogenian
F. A. Macdonald et al.
A volcanic tuff dated to 716.5 million years ago calibrates the timing of a global glaciation event and eukaryotic survival.
>> *News story p. 1186*
- 1243 The Role of Sulfuric Acid in Atmospheric Nucleation
M. Sipilä et al.
Gas-phase sulfuric acid and water react fast enough to account for the concentration of atmospheric sulfuric acid particles.
- 1246 Extensive Methane Venting to the Atmosphere from Sediments of the East Siberian Arctic Shelf
N. Shakhova et al.
Methane emissions from this region of sub-sea permafrost are comparable to previous estimates for the world ocean.
>> *Perspective p. 1211; Science Podcast*
- 1250 Hippocampal Short- and Long-Term Plasticity Are Not Modulated by Astrocyte Ca^{2+} Signaling
C. Agulhon et al.
Previous reports of glial cell activity may reflect the pharmacological approaches used, and not endogenous activity.
>> *Perspective p. 1212*
- 1254 RTEL-1 Enforces Meiotic Crossover Interference and Homeostasis
J. L. Youds et al.
Crossing over between homologous chromosomes in meiosis is controlled in part by an anti-recombination enzyme.
- 1258 Spatially Ordered Dynamics of the Bacterial Carbon Fixation Machinery
D. F. Savage et al.
Tight control of the spatial arrangement of carboxysome organelles optimizes carbon fixation in cyanobacterial cells.
- 1261 Retromer Is Required for Apoptotic Cell Clearance by Phagocytic Receptor Recycling
D. Chen et al.
An intracellular membrane-sorting machinery participates in cellular corpse clearance.

Highlights From Our Daily News Coverage

Early Polar Bear Discovered in Arctic Tundra

Researchers say fossil represents one of the first members of the species.

Appetite Suppressor Could Be an Alternative to Insulin

Hunger-regulating hormone leptin helps diabetic mice control blood sugar.

Global Warming Didn't Kill the Golden Toad

Researchers find more mundane explanation for demise of colorful amphibian.

SCIENCE SIGNALING

www.sciencesignaling.org

The Signal Transduction Knowledge Environment

RESEARCH ARTICLE: Polycomb Group Proteins as Epigenetic Mediators of Neuroprotection in Ischemic Tolerance

M. Stapels et al.

Polycomb group proteins protect neurons from injury through a mechanism involving decreased potassium channel function.

RESEARCH ARTICLE: Characterization of a Domain that Transiently Converts Class 2 DYRKs into Intramolecular Tyrosine Kinases

R. Kinstrie et al.

An N-terminal region of a dual-specificity kinase temporarily enables it to phosphorylate a tyrosine rather than a serine or threonine residue.

RESEARCH ARTICLE: Crystal Structure of the α -Kinase Domain of *Dictyostelium* Myosin Heavy Chain Kinase

Q. Ye et al.

Structural analysis identifies features of atypical serine-threonine kinases that may account for their different activities when compared to those of conventional kinases.

PERSPECTIVE: Allosteric Protein Kinase Regulation by Pseudokinases—Insights from STRAD

T. Rajakulendran and F. Sicheri

A kinase becomes activated when it binds as the "substrate" of a pseudokinase.

GLOSSARY

Find out what CD4, TEM8, and SLK mean in the world of cell signaling.
