COVER
Substances deposited by a mother bird into her eggs influence how intensely her offspring beg for food after hatching. In canaries, these substances are effectively a prenatal signal of parental generosity. In contrast to the common assumption, they function primarily to serve the evolutionary interests of the offspring rather than the mother. See page 1373.

REVIEW
1341 Altruism, Spite, and Greenbeards
S. A. West and A. Gardner

RESEARCH ARTICLE
1345 Identification of a Primary Target of Thalidomide Teratogenicity
T. Ito et al.
Thalidomide exerts its damaging effects by binding to cereblon and blocking its activity in limb development.

REPORTS
1350 Variations in the Sun’s Meridional Flow over a Solar Cycle
D. H. Hathaway and L. Rightmire
Observed variations in the Sun’s poleward flow have consequences for models and predictions of the solar cycle.

1352 Cavity Quantum Electrodynamics with Anderson-Localized Modes
L. Sapienza et al.
Optical scattering is used to induce quantum coupling between light and an artificial atom.

1355 Light-Controlled Self-Assembly of Semiconductor Nanoparticles into Twisted Ribbons
S. Srivastava et al.
The photooxidation of cadmium sulfide nanoparticles within cadmium telluride nanoparticle ribbons causes surface stresses that lead to twisting.

1359 The Near-Tip Fields of Fast Cracks
A. Livne et al.
The linear and nonlinear elastic responses near a growing crack tip can reveal how materials fail.

1363 Imaging Local Electrochemical Current via Surface Plasmon Resonance
X. Shan et al.
The concentration of electrochemically active species on a gold electrode provides a local measurement of current density.

1367 Gravity Field, Shape, and Moment of Inertia of Titan
L. Iess et al.
Analysis of gravity data reveals that Saturn’s moon Titan has a partially differentiated internal structure.

1369 Plumage Color Patterns of an Extinct Dinosaur
Q. Li et al.
Comparison of melanosome shape and density between fossil feathers and modern ones reveals the appearance and color of a theropod.

1373 Parent-Offspring Conflict and Coadaptation
C. A. Hinde et al.
Prenatal hormonal signaling can match a mother bird’s capacity to provide food with her offsprings’ expectations.

1376 Toward Extracting All Phylogenetic Information from Matrices of Evolutionary Distances
S. Roch
Methods recently developed for taxonomic analysis are fast and do not compromise accuracy.

1380 Restriction of Receptor Movement Alters Cellular Response: Physical Force Sensing by EphA2
K. Salaita et al.
Mechanical forces acting on a cell-surface receptor affect the activation of a signaling pathway involved in breast cancer.

1385 Lgr6 Marks Stem Cells in the Hair Follicle That Generate All Cell Lineages of the Skin
H. J. Snippert et al.
Skin wounds can be repaired by primitive stem cells into fully differentiated tissue, complete with hairs and sebaceous glands.

1389 Structural Sources of Robustness in Biochemical Reaction Networks
G. Shinar and M. Feinberg
Models of metabolic regulation show how the stability of specific components is maintained within a varying environment.

1392 In Crystallo Posttranslational Modification Within a MauG/Pre–Methylamine Dehydrogenase Complex
L. M. R. Jensen et al.
Bacterial ammonia and formaldehyde production requires prior processing of a dehydrogenase to form a cofactor.
