Materials for Electronics

INTRODUCTION
1595 Looking Beyond Silicon

NEWS
1596 Nations Move to Head Off Shortages of Rare Earths
Mission: Irreplaceable?
1598 Nitrides Race Beyond the Light

PERSPECTIVES
1600 It’s Time to Reinvent the Transistor!
T. N. Theis and P. M. Solomon

EDITORIAL
1554 Food Security for a Billion Poor
Uma Lele

NEWS OF THE WEEK
1562 Health Bill Backs Evidence-Based Medicine, New Drug Studies
1563 What’s Old Is New: 1918 Virus Matches 2009 H1N1 Strain
>> Science Express Report by R. Xu et al.;
Science Translational Medicine Research Article by C.-J. Wei et al., p. 1551
1565 Latest Prize Bolsters Templeton’s Shift to Mainstream
1566 From Science’s Online Daily News Site
1566 Ancient DNA From Siberia Fingers a Possible New Human Lineage
1566 NIH Seeks Fresh Ideas on Diversity
1567 From the Science Policy Blog

NEWS FOCUS
1568 Restoration or Devastation?
A ‘Green’ Blessing Raises Questions
1571 Of Mice and Women:
The Bias in Animal Models
>> Science Podcast
1573 Immunology Uncaged
1574 Science Meets Politics Off California’s Coast

LETTERS
1576 Compelling Science Saves a River Valley
F. R. Hauer and C. M. Muhlfeld
Asian Test-Score Culture Thraws Creativity

SCIENCE PRIZE ESSAY
1589 Addressing Science Teacher Needs
N. P. Moreno and D. B. Erdmann

BREVIA
1613 A Southern Tyrant Reptile
R. B. J. Benson et al.
Fossil evidence indicates that tyrannosaurs also inhabited the southern continents in the late Early Cretaceous period.

RESEARCH ARTICLE
1614 Doc2b Is a High-Affinity Ca\textsuperscript{2+} Sensor for Spontaneous Neurotransmitter Release
A. J. Groffen et al.
Spontaneous synaptic vesicle fusion is triggered by soluble proteins that compete with synaptotagmins to induce membrane curvature.

REPORTS
1619 Dark Matter Search Results from the CDMS II Experiment
The CDMS II Collaboration
Details of possible, but unlikely, detection events produced by dark matter are reported.

1621 Anomalous Expansion of Attractively Interacting Fermionic Atoms in an Optical Lattice
L. Hackermüller et al.
Thermodynamic effects cause an ultracold potassium gas to expand unexpectedly when the attraction between atoms is increased.

1624 Strontium-Doped Perovskites Rival Platinum Catalysts for Treating NO\textsubscript{x} in Simulated Diesel Exhaust
C. H. Kim et al.
An inexpensive catalyst shows promise for mitigating pollutants from diesel exhaust without the use of precious metals.

1627 Heme-Like Coordination Chemistry Within Nanoporous Molecular Crystals
C. G. Bezzu et al.
Metal-organic framework compounds expose iron atoms for reactions in a manner analogous to heme sites in proteins.

1631 Efficient Annealing of Radiation Damage Near Grain Boundaries via Interstitial Emission
X.-M. Bai et al.
Simulations show that grain boundaries store and annihilate radiation-induced defects in copper.

1634 Nonepitaxial Growth of Hybrid Core-Shell Nanostructures with Large Lattice Mismatches
J. Zhang et al.
Chemical transformations create nanoparticles with large lattice mismatches between their metal cores and semiconductor shells.

1638 Shaping Development of Autophagy Inhibitors with the Structure of the Lipid Kinase Vps34
S. Miller et al.
Structural data might provide a foundation to develop specific inhibitors to this class of phosphoinositide 3-kinases.

1642 Evolutionary Trade-Offs in Plants Mediate the Strength of Trophic Cascades
K. A. Mooney et al.
The effect of herbivore predators on plant biomass depends on a trade-off between plant growth and resistance to herbivores.

1644 A Peroxidase/Dual Oxidase System Modulates Midgut Epithelial Immunity in \textit{Anopheles gambiae}
S. Kumar et al.
Bonding between cell-surface proteins forms a physical barrier in mosquito guts to prevent microbe invasion.

1648 A Self-Incompatibility System Explains High Male Frequencies in an Androdioecious Plant
P. Saumitou-Laprade et al.
Male flowers persist in the olive family because males can fertilize hermaphrodites belonging to two self-incompatible groups.

1650 The Wnt/β-Catenin Pathway Is Required for the Development of Leukemia Stem Cells in AML
Y. Wang et al.
The self-renewing cells that drive the growth of leukemia arise, in part, through activation of a well-known cell signaling pathway.

1653 β\textsubscript{2}-Adrenergic Receptor Redistribution in Heart Failure Changes cAMP Compartmentation
V. O. Nikolaev et al.
A change in the distribution of a signaling molecule on the surface of heart muscle cells may contribute to heart failure.

1657 Loss of Rap1 Induces Telomere Recombination in the Absence of NHEJ or a DNA Damage Signal
A. Sfeir et al.
The mammalian telomere protein Rap1 prevents the ends of chromosomes from undergoing unscheduled homologous recombination.

CONTENTS continued >>
Induction of Lymphoidlike Stroma and Immune Escape by Tumors That Express the Chemokine CCL21

B. Alarcón and H. M. van Santen

RESEARCH ARTICLE: Specification of T cell lineage in the thymus is controlled by the timing and strength of signaling of the tyrosine kinase Zap70.

J. D. Shields

PERSPECTIVE: Two Receptors, Two Kinases, and T Cell Lineage Determination

B. Alarcón and H. M. van Santen

SPECIFICATION OF T CELL LINEAGE IN THE THYMUS ENABLES TEMPORAL SEPARATION OF CD4 AND CD8 REPertoire SELECTION AT DIFFERENT SIGNALING THRESHOLDS

M. Saini et al.

PERSPECTIVE: Two Receptors, Two Kinases, and T Cell Lineage Determination

B. Alarcón and H. M. van Santen

SPECIFICATION OF T CELLINEAGE IN THE THYMUS IS CONTROLLED BY THE TIMING AND STRENGTH OF SIGNALING OF THE TYROSINE KINASE ZAP70.

RESEARCH ARTICLE: Gain-of-Function Enhancement of IP3 Receptor Modal Gating by Familial Alzheimer’s Disease-Linked Presenilin Mutants in Human Cells and Mouse Neurons

K.-H. Cheung et al.

PERSPECTIVE: ER Calcium and Alzheimer’s Disease—In a State of Flux

M. P. Mattson

Mutations in presenilin 1 may exaggerate Ca2+ signaling in neurons, increasing their vulnerability.

RESEARCH ARTICLE: Regulation of Zap70 Expression During Thymocyte Development Enables Temporal Separation of CD4 and CD8 Repertoire Selection at Different Signaling Thresholds

M. Saini et al.

PERSPECTIVE: Two Receptors, Two Kinases, and T Cell Lineage Determination

B. Alarcón and H. M. van Santen

SPECIFICATION OF T CELLINEAGE IN THE THYMUS IS CONTROLLED BY THE TIMING AND STRENGTH OF SIGNALING OF THE TYROSINE KINASE ZAP70.

RESEARCH ARTICLE: Cross-Neutralization of 1918 and 2009 Influenza Viruses—Role of Glycans in Viral Evolution and Vaccine Design

C.-J. Wei et al.

PERSPECTIVE: H1N1—Can a Pandemic Cycle Be Broken?

E. C. Settembre et al.

Sites targeted by antibodies against both 1918 and 2009 influenza viruses are blocked by sugars, which could inform future vaccine design.

RESEARCH ARTICLE: A Conformal, Bio-Interfaced Class of Silicon Electronics for Mapping Cardiac Electrophysiology

J. Viventi et al.

Flexible electronics and sensors that stick to moving tissues can enable cardiac electrical activity mapping in animals.

>> Materials for Electronics section p. 1595

SCIENCEPODCAST
