Materials for Electronics

INTRODUCTION
1595 Looking Beyond Silicon

NEWS
1596 Nations Move to Head Off Shortages of Rare Earths
Mission: Irreplaceable?
1598 Nitrides Race Beyond the Light

PERSPECTIVES
1600 It’s Time to Reinvent the Transistor!
T. N. Theis and P. M. Solomon

1601 An Emergent Change of Phase for Electronics
H. Takagi and H. Y. Hwang

REVIEWS
1603 Materials and Mechanics for Stretchable Electronics
J. A. Rogers et al.
1607 Oxide Interfaces—An Opportunity for Electronics
J. Mannhart and D. G. Schlom

>> See related Science Careers and Science Translational Medicine articles on p. 1551

EDITORIAL
1554 Food Security for a Billion Poor
Uma Lele

NEWS OF THE WEEK
1562 Health Bill Backs Evidence-Based Medicine, New Drug Studies
1563 What’s Old Is New: 1918 Virus Matches 2009 H1N1 Strain
>> Science Express Report by R. Xu et al.; Science Translational Medicine Research Article by C.-J. Wei et al., p. 1551
1565 Latest Prize Bolsters Templeton’s Shift to Mainstream
1566 From Science’s Online Daily News Site
1566 Ancient DNA From Siberia Fingers a Possible New Human Lineage
1566 NIH Seeks Fresh Ideas on Diversity
1567 From the Science Policy Blog

NEWS FOCUS
1568 Restoration or Devastation?
A ‘Green’ Blessing Raises Questions
1571 Of Mice and Women:
The Bias in Animal Models
>> Science Podcast
1573 Immunology Uncaged
1574 Science Meets Politics Off California’s Coast

LETTERS
1576 Compelling Science Saves a River Valley
F. R. Hauer and C. C. Muhlfeld
Asian Test-Score Culture Thraws Creativity
W. K. Lim
Life in Science: Anaconda!
H. W. Greene
1577 CORRECTIONS AND CLARIFICATIONS

BOOKS ET AL.
1578 Natural Experiments of History
J. Diamond and J. A. Robinson, Eds., reviewed by J. Mahoney
1579 The Essential Engineer
H. Petroski, reviewed by D. E. Nye

POLICY FORUM
1580 The Future of Psychiatric Research:
Genomes and Neural Circuits
H. Akil et al.

PERSPECTIVES
1582 Fishing for the Universe
R. F. Lang
>> Report p. 1619
1583 A Green or a Prickly World?
P. A. Hambäck
>> Report p. 1642
1584 Less Costly Catalysts for Controlling Engine Emissions
J. E. Parks II
>> Report p. 1624
1586 Refugee Receptors Switch Sides
G. W. Dorn II
>> Report p. 1653
1587 Controlling Radiation Damage
G. Ackland
>> Report p. 1631

CONTENTS continued >>

## CONTENTS

### SCIENCE PRIZE ESSAY

1589 Addressing Science Teacher Needs  
N. P. Moreno and D. B. Erdmann

### BREVIA

1613 A Southern Tyrant Reptile  
R. B. J. Benson et al.  
Fossil evidence indicates that tyrannosaurs also inhabited the southern continents in the late Early Cretaceous period.

### RESEARCH ARTICLE

1614 Doc2b Is a High-Affinity Ca\(^{2+}\) Sensor for Spontaneous Neurotransmitter Release  
A. J. Groffen et al.  
Spontaneous synaptic vesicle fusion is triggered by soluble proteins that compete with synaptotagmins to induce membrane curvature.

1619 Dark Matter Search Results from the CDMS II Experiment  
The CDMS II Collaboration  
Details of possible, but unlikely, detection events produced by dark matter are reported.  
[>> Perspective p. 1582](#)

1621 Anomalous Expansion of Attractively Interacting Fermionic Atoms in an Optical Lattice  
L. Hackermüller et al.  
Thermodynamic effects cause an ultracold potassium gas to expand unexpectedly when the attraction between atoms is increased.

1624 Strontium-Doped Perovskites Rival Platinum Catalysts for Treating NO\(_x\) in Simulated Diesel Exhaust  
C. H. Kim et al.  
An inexpensive catalyst shows promise for mitigating pollutants from diesel exhaust without the use of precious metals.  
[>> Perspective p. 1584](#)

1627 Heme-Like Coordination Chemistry Within Nanoporous Molecular Crystals  
C. G. Bezzu et al.  
Metal-organic framework compounds expose iron atoms for reactions in a manner analogous to heme sites in proteins.

1631 Efficient Annealing of Radiation Damage Near Grain Boundaries via Interstitial Emission  
X. -M. Bai et al.  
Simulations show that grain boundaries store and annihilate radiation-induced defects in copper.  
[>> Perspective p. 1587](#)

1634 Nonepitaxial Growth of Hybrid Core-Shell Nanostructures with Large Lattice Mismatches  
J. Zhang et al.  
Chemical transformations create nanoparticles with large lattice mismatches between their metal cores and semiconductor shells.

1638 Shaping Development of Autophagy Inhibitors with the Structure of the Lipid Kinase Vps34  
S. Miller et al.  
Structural data might provide a foundation to develop specific inhibitors to this class of phosphoinositide 3-kinases.

1642 Evolutionary Trade-Offs in Plants Mediate the Strength of Trophic Cascades  
K. A. Mooney et al.  
The effect of herbivore predators on plant biomass depends on a trade-off between plant growth and resistance to herbivores.  
[>> Perspective p. 1583](#)

1644 A Peroxidase/Dual Oxidase System Modulates Midgut Epithelial Immunity in *Anopheles gambiae*  
S. Kumar et al.  
Bonding between cell-surface proteins forms a physical barrier in mosquito guts to prevent microbe invasion.

1648 A Self-Incompatibility System Explains High Male Frequencies in an Androdioecious Plant  
P. Saumitou-Laprade et al.  
Male flowers persist in the olive family because males can fertilize hermaphrodites belonging to two self-incompatible groups.

1650 The Wnt/β-Catenin Pathway Is Required for the Development of Leukemia Stem Cells in AML  
Y. Wang et al.  
The self-renewing cells that drive the growth of leukemia arise, in part, through activation of a well-known cell signaling pathway.

1653 β\(^2\)-Adrenergic Receptor Redistribution in Heart Failure Changes cAMP Compartmentation  
V. O. Nikolaev et al.  
A change in the distribution of a signaling molecule on the surface of heart muscle cells may contribute to heart failure.  
[>> Perspective p. 1586](#)

1657 Loss of Rap1 Induces Telomere Recombination in the Absence of NHEJ or a DNA Damage Signal  
A. Sfeir et al.  
The mammalian telomere protein Rap1 prevents the ends of chromosomes from undergoing unscheduled homologous recombination.
