COVER
Fluorescence microscopy image showing fragmentation of chromosomal DNA (green) during programmed cell death or apoptosis in a Caenorhabditis elegans embryo. Chromosomes are stained blue and nuclear envelopes red. During apoptosis, the ribonuclease Dicer, known for its role in gene silencing, is converted to a deoxyribonuclease and initiates this DNA fragmentation process. See page 327.

REVIEW
321 Extending Healthy Life Span—From Yeast to Humans
L. Fontana et al.

RESEARCH ARTICLE
327 Caspase-Dependent Conversion of Dicer Ribonuclease into a Death-Promoting Deoxyribonuclease
A. Nakagawa et al.
An enzyme that chops up RNA can be switched to DNA fragmentation and can trigger programmed cell death in worms. >> Perspective p. 314

REPORTS
334 Detection of a Large-Scale Structure of Intracluster Globular Clusters in the Virgo Cluster
M. G. Lee et al.
Extensive regions of mass have been located between the galaxies of the Virgo cluster.

337 Three-Dimensional Invisibility Cloak at Optical Wavelengths
T. Ergin et al.
A structured photonic crystal can be used to cloak an object at optical wavelengths and over a wide viewing angle.

339 Dilithioplumbole: A Lead-Bearing Aromatic Cyclopentadienyl Analog
M. Saito et al.
Lead can participate in the delocalized electron network of an aromatic carbon ring.

342 A Fast Soluble Carbon-Free Molecular Water Oxidation Catalyst Based on Abundant Metals
Q. Yin et al.
Bulky polytungstate ligands stabilize a cobalt-based catalyst highly active for splitting water. >> Perspective p. 315

345 Oxoboryl Complexes: Boron–Oxygen Triple Bonds Stabilized in the Coordination Sphere of Platinum
H. Braunschweig et al.
A mild synthetic method yields a boron analog of the widely studied carbon monoxide ligand.

347 A Younger Age for ALH84001 and Its Geochemical Link to Shergottite Sources in Mars
T. J. Lapen et al.
The oldest known martian meteorite is younger than previously thought, precluding it from sampling primeval martian crust.

351 Evolution of an Expanded Sex-Determining Locus in Volvox
P. Ferris et al.
Mating loci among green algae show conserved gene order, but also have many unique features that may explain gamete size differences.

354 Resolving Mechanisms of Competitive Fertilization Success in Drosophila melanogaster
M. K. Manier et al.
Fluorescently labeled sperm allow direct visualization of their activity within the female reproductive tract of flies.

357 Structural Basis of Preexisting Immunity to the 2009 H1N1 Pandemic Influenza Virus
R. Xu et al.
An epitope conserved between the 1918 and 2009 pandemic flu viruses explains age-related immunity to the 2009 virus.

360 Divided Representation of Concurrent Goals in the Human Frontal Lobes
S. Charron and E. Koechlin
The human brain is limited to accurately negotiate the pursuit of two concurrent goals at the same time. >> Science Podcast

363 Cbln1 Is a Ligand for an Orphan Glutamate Receptor δ2, a Bidirectional Synapse Organizer
K. Matsuda et al.
A signaling complex serves as a synapse organizer that acts bidirectionally on both pre- and postsynaptic components.

368 Rapid Diversification of Cell Signaling Phenotypes by Modular Domain Recombination
S. G. Peisajovich et al.
Systematic swapping of modular protein domains verifies a mechanism for generation of phenotypic diversity in yeast.

372 Protein Kinase C-θ Mediates Negative Feedback on Regulatory T Cell Function
A. Zanin-Zhorov et al.
Suppressive T cells repurpose inflammatory signaling pathways to promote their suppressive functions.

SCIENCE TRANSLATIONAL MEDICINE
www.sciencetranslationalmedicine.org
Integrating Medicine and Science

Perspective: Optimal Control of Blood Glucose—The Diabetic Patient or the Machine?
L. Brown and E. R. Edelman
Diabetic patients may benefit from a device that uses a computer algorithm to deliver proper amounts of insulin and glucagon.

Perspective: Challenges in Using Stem Cells for Cardiac Repair
C. L. Mummery et al.
Stem cell–derived cardiomyocytes offer promise for treating damage caused by heart attacks.

Research: A Bi-Hormonal Closed-Loop Artificial Pancreas for Type 1 Diabetes
F. H. El-Khatib et al.
An algorithm continuously delivers appropriate insulin and glucagon doses to diabetic patients, maintaining their blood glucose at normal values, even after high-carbohydrate meals.

T. Janowitz and D. K. Menon
The methods and devices used in the clinical management of neurological patients can provide data to facilitate progress in treating brain trauma.
