MAX-PLANCK-GESELLSCHAFT

Generalverwaltung

The Max Planck Society for the Advancement of Science (MPG) is seeking an exceptionally qualified and experienced

Head of the Max Planck Digital Library

The Max Planck Digital Library (MPDL; <http://mpdl.mpg.de>) is a scientific service unit. Its tasks are to develop software infrastructure and applications in the domain of scholarly communication and to provide the scientists of the Max Planck Institutes with all relevant electronic information resources.

The head of the MPDL is responsible for all system-wide information services and the strategic positioning of the MPG in the arena of eResearch, scientific information management and scholarly communication services.

For further information, please refer to <http://www.mpdl.mpg.de/newhead>. The MPG will begin reviewing applications by June 15, 2010.

The Max Planck Society seeks to increase the number of women in those areas where they are underrepresented and therefore explicitly encourages women to apply. The Max Planck Society is committed to employing more handicapped individuals and especially encourages them to apply.

Faculty Positions
Center for Translational Research in Neurodegenerative Disease
College of Medicine
University of Florida, Gainesville, Florida

The University of Florida (UF), College of Medicine, seeks outstanding candidates to join the newly formed Center for Translational Research in Neurodegenerative Disease (CTRND). Up to 6 tenure accruing positions are available with level of appointment (Professor, Associate Professor, and Assistant Professor) commensurate with qualifications. The positions offer a highly dynamic, collaborative, and entrepreneurial academic environment, an attractive benefits package, competitive salary, and outstanding resources. Faculty will be appointed within relevant Departments (e.g., Neuroscience, Neurology, Pathology...) and will report to both **Dr. Todd Golde**, Director of the CTRND, and the Chair of the Department of primary appointment.

The CTRND's mission is to play a major role in developing and evaluating future treatments and diagnostics for degenerative central nervous system diseases including but not limited to investigation of Alzheimer's disease (AD) and Parkinson's disease (PD). To fulfill this mission we seek outstanding faculty candidates who are committed to translational research in the neurodegenerative disease field by moving basic discovery towards clinical applications. Candidates involved in target identification, animal model development, and therapeutic or biomarker discovery are encouraged to apply.

Candidates must possess a PhD, MD, or MD/PhD and must have proven experience in translational neurodegenerative disease research. A strong track record of funding by the NIH or equivalent is desired, though we will consider applicants who have led research programs in industry or other settings, where NIH funding was not required. All candidates must have demonstrated evidence for ability to work in a highly collaborative fashion. They will also be expected to participate in the educational mission of the College. Salaries and start up are negotiable and will be commensurate with experience and rank of appointment.

Applicants should submit curriculum vitae, a brief description of research interest, and the names and contact information of three references by email to **Ms. Patricia Joy**, administrative assistant for the CTRND (patricia.joy@mbi.ufl.edu). Please include **Attn: Dr. Stephen Sugrue, Senior Associate Dean Research Affairs, CTRND Search Committee Chair**, in the subject line. Review of applications will begin **June 15th, 2010** and will continue until all positions have been filled.

The University of Florida is an Equal Opportunity Institution dedicated to building a broadly diverse and inclusive faculty and staff. Minorities, women and those from other underserved groups are encouraged to apply.
