1471 A Taste for Controversy

COVER
An aggressive storm that battered the coastal town of Blackpool, United Kingdom, in January 2007. Among other important changes now occurring in the marine environment, rising sea levels will create the need for increased protection from such severe storms. See the special section on our changing oceans beginning on page 1497.

1494  Paring MiRNAs Through Pairing
A. E. Pasquinelli
>> Research Article p. 1534; Report p. 1563

1495  HDL miR-ed Down by SREBP Introns
M. S. Brown et al.
>> Reports pp. 1566 and 1570

BREVIA
1529  Reassortment of Pandemic H1N1/2009 Influenza A Virus in Swine
D. Vijaykrishna et al.
Surveillance of pigs is important for tracking reassortment and emergence of influenza A viruses.
>> Science Podcast

RESEARCH ARTICLES
1530  Tropical Ocean Temperatures Over the Past 3.5 Million Years
T. D. Herbert et al.
Tropical sea surface temperatures were controlled more by atmospheric connections to glaciation cycles than by ocean circulation.
>> Perspective p. 1488; Report p. 1550

1534  Target RNA–Directed Trimming and Tailing of Small Silencing RNAs
S. L. Ameres et al.
Animal microRNAs have reduced complementarity to their targets to avoid their own degradation.
>> Perspective p. 1494; Report p. 1563

REPORTS
1540  Bose-Einstein Condensation in Microgravity
T. van Zoest et al.
Studies of atomic quantum states in free-fall conditions may provide ways to test predictions of general relativity.
>> Perspective p. 1491

1543  Hot-Electron Transfer from Semiconductor Nanocrystals
W. A. Tisdale et al.
Extraction of highly excited electrons formed in a light-absorbing material may make solar cells more efficient.

1547  Crossover from Single-Step Tunneling to Multistep Hopping for Molecular Triplet Energy Transfer
J. Vuru-Wei et al.
Ultrafast absorption spectroscopy reveals a change in mechanism when sites for electron transfer become more distant.

1550  Subpolar Link to the Emergence of the Modern Equatorial Pacific Cold Tongue
A. Martinez-Garcia et al.
The eastern Pacific Ocean cold tongue appeared as Earth’s climate cooled and subpolar waters expanded in the Pleistocene.
>> Perspective p. 1488; Research Article p. 1530

1554  Radiocarbon-Based Chronology for Dynastic Egypt
C. Bronk Ramsey et al.
Many radiocarbon dates from short-lived plant remains provide a long and accurate chronology for ancient Egypt.
>> Perspective p. 1489

1558  Evolutionary Novelty Is Concentrated at the Edge of Coral Species Distributions
A. F. Budd and J. M. Pandolfi
Caribbean coral morphology documents that most coral evolution did not occur at the center of diversity of a species’ range.

1561  Identification of Germline Stem Cells in the Ovary of the Teleost Medaka
S. Nakamura et al.
Ongoing follicle production is maintained by stem cells in an adult fish ovary.

1563  Down-Regulation of a Host MicroRNA by a Herpesvirus saimiri Noncoding RNA
D. Cazalla et al.
A viral noncoding RNA regulates the level of a complementary host-cell microRNA.
>> Perspective p. 1494; Research Article p. 1534

1566  MicroRNA-33 and the SREBP Host Genes Cooperate to Control Cholesterol Homeostasis
S. H. Najafi-Shoushtari et al.

1570  MiR-33 Contributes to the Regulation of Cholesterol Homeostasis
K. J. Rayner et al.
A small noncoding RNA helps regulate cholesterol levels in mice.
>> Perspective p. 1495

1573  Development of the Hippocampal Cognitive Map in Preweanling Rats
T. J. Wills et al.
Some aspects of spatial cognition develop very early and may be determined innately.

1576  Development of the Spatial Representation System in the Rat
R. F. Langston et al.
Space and direction are already represented in specific neurons when rat pups navigate a location for the first time.
>> Perspective p. 1487

CONTENTS continued >>

Published by AAAS
Biocatalytic Asymmetric Synthesis of Chiral Amines from Ketones Applied to Sitagliptin Manufacture
C. K. Savile et al.
An engineered enzyme offers substantial efficiency advantages in the production-scale synthesis of a drug.
10.1126/science.1188934

Probing the Superfluid–to–Mott-Insulator Transition at the Single-Atom Level
W. S. Bok et al.
Imaging of atoms that were optically trapped in lattice sites reveals local dynamics of a quantum phase transition.
10.1126/science.1192368

A Septin Diffusion Barrier at the Base of the Primary Cilium Maintains Ciliary Membrane Protein Distribution
Q. Hu et al.
Signaling proteins are retained in the cilium by a diffusion barrier created by a member of the septin family.
10.1126/science.1191054

Sfrp5 Is an Anti-Inflammatory Adipokine That Modulates Metabolic Dysfunction in Obesity
N. Ouchi et al.
Fat cells secrete an anti-inflammatory factor that has beneficial effects on metabolic health.
10.1126/science.1188280

Integrative Modeling Defines the Nova Splicing-Regulatory Network and Its Combinatorial Controls
C. Zhang et al.
Network modeling reveals an RNA splicing network in the brain and uncovers complex mechanisms of regulation.
10.1126/science.1191150

Sphingosine Kinase 1
L. A. J. O’Neill
Sphingosine kinase 1 might have great potential as a therapy for sepsis.

Changing Oceans: Viewing Coral Reefs Through a Cultural Lens
H. Fields
Human geographer Josh Cinner studies how people and coral reefs interact.

Tooling Up: Be the Candidate
D. Jensen
Your chances of finding a job improve if you are well prepared.

Psychologist Bridges Clinic and Lab to Untangle Schizophrenia’s Roots
B. Voxdag
Deanna Barch is developing neuroimaging tools to speed the development of schizophrenia treatments.

Sepsis and Inflammation
C. K. Savile
Understanding the underlying mechanisms of sepsis.

The Kinase NDR1 Functions as a Haploinsufficient Tumor Suppressor by Ensuring Proper Apoptotic Responses
H. Cornils et al.
The kinase NDR1 functions as a haploinsufficient tumor suppressor by ensuring proper apoptotic responses.

PROTOCOL: Analysis of Matrix-Dependent Cell Migration with a Barrier Migration Assay
S. Kroening and M. Goppelt-Stuhrbe
Removable plastic barriers allow quantification of cell migration without damaging either the surface proteins or the cells.

FUNDING SOURCES
Find opportunities to fund research and training in cell signaling.

GLOSSARY
Find out what ADPKD, CICR, and DHPR mean in the world of cell signaling.

Viewing Coral Reefs Through a Cultural Lens
H. Fields
Human geographer Josh Cinner studies how people and coral reefs interact.
