COVER

Sergey Nenov gives thanks at a church in Odessa, Ukraine. HIV, tuberculosis, and injecting drug use are tightly linked in Eastern Europe, the only region in the world with a growing HIV/AIDS epidemic. Nenov is one of the few people with access to treatment for both infections and opiate dependency. See the special section on HIV/AIDS beginning on page 159 and at www.sciencemag.org/special/aids2010/.

DEPARTMENTS

- 118 This Week in *Science*
- 121 Editors' Choice
- 122 *Science* Staff
- 125 Random Samples
- 234 New Products
- 235 *Science* Careers

- 155 Closing In on Models of Wall Turbulence
R. J. Adrian
>> *Report p. 193*
- 157 Retrospective: Martin Gardner (1914–2010)
D. Richards

BREVIA

- 181 Firefly Synchrony: A Behavioral Strategy to Minimize Visual Clutter
A. Moiseff and J. Copeland
Female fireflies are more likely to respond to simulated male flashes that are synchronized than to unsynchronized flashes.
>> *Science Podcast*

RESEARCH ARTICLE

- 182 Structure of the Human BK Channel Ca^{2+} -Activation Apparatus at 3.0 Å Resolution
P. Yuan et al.
A tetramer of two regulatory domains forms a gating ring that regulates calcium ion activation.
>> *Perspective p. 151*

REPORTS

- 187 Capture of the Sun's Oort Cloud from Stars in Its Birth Cluster
H. F. Levison et al.
Some Oort cloud comets may have originated in the protoplanetary disk of stars other than the Sun.
- 190 Mesoscopic Percolating Resistance Network in a Strained Manganite Thin Film
K. Lai et al.
Microwave microscopy is used to image the phase separation of spin- and charge-ordered domains in magnetic thin films.
- 193 Predictive Model for Wall-Bounded Turbulent Flow
I. Marusic et al.
A nonlinear relationship is developed for turbulent flow past an object.
>> *Perspective p. 155*
- 197 Step-Growth Polymerization of Inorganic Nanoparticles
K. Liu et al.
The self-assembly of inorganic nanoparticles exhibits quantifiable behavior similar to step-growth polymerization.
- 200 Deepwater Formation in the North Pacific During the Last Glacial Termination
Y. Okazaki et al.
The Atlantic was not the only ocean in the Northern Hemisphere in which deep water formed during the last deglaciation.
- 204 Explaining the Structure of the Archean Mass-Independent Sulfur Isotope Record
I. Halevy et al.
Modeling suggests that volcanic output and microorganisms created a distinctive profile of sulfur isotopes on early Earth.

- 207 Contrasting Décollement and Prism Properties over the Sumatra 2004–2005 Earthquake Rupture Boundary
S. M. Dean et al.
A plate boundary fault reflector suggests different rupture styles in the last two major Sumatran earthquakes.

- 210 Seismic Evidence for Active Underplating Below the Megathrust Earthquake Zone in Japan
H. Kimura et al.
Microearthquakes correlated to seismic data reveal the real-time dynamics of a subduction zone.
>> *Perspective p. 152*

- 212 Adaptation via Symbiosis: Recent Spread of a *Drosophila* Defensive Symbiont
J. Jaenike et al.
A bacterium protects fruit flies against a sterilizing worm parasite.
>> *Science Podcast*

- 216 Gamete Recognition in Mice Depends on the Cleavage Status of an Egg's Zona Pellucida Protein
G. Gahlay et al.
The cleavage status of the egg protein ZP2 regulates the recognition of sperm and prevents adherence of sperm to the two-cell embryo.

- 219 Ku70 Corrupts DNA Repair in the Absence of the Fanconi Anemia Pathway
P. Pace et al.
A specific pathway protects damaged DNA from error-prone repair.

- 223 Genomic Analysis of Organismal Complexity in the Multicellular Green Alga *Volvox carteri*
S. E. Prochnik et al.
Comparison of the *Chlamydomonas* and *Volvox* genomes show few differences, despite their divergent life histories.
>> *News story p. 128*

- 226 A Molecular Clock for Malaria Parasites
R. E. Ricklefs and D. C. Outlaw
Relative rates of nucleotide substitution between host and parasite cytochrome b set the molecular clock for malaria.

- 229 An Autophagy-Enhancing Drug Promotes Degradation of Mutant α_1 -Antitrypsin Z and Reduces Hepatic Fibrosis
T. Hidvegi et al.
A mouse model of a human liver disease can be treated using a drug known to be well tolerated.
>> *Perspective p. 154*
