**Infectious Diseases & Biodefense**

Postdoctoral Fellowships

are available for U.S. citizens and permanent residents in the Interdisciplinary Biodefense and Infectious Diseases Training programs.

**Research Areas Include:**

- Anthrax cellular intoxication
- Tularemia pathogenesis and vaccines
- Ebola glycoprotein function
- Foxxirus immunology
- Entertics (Amebiasis, cryptosporidiosis, EHEC)
- Respiratory viruses (Influenza & RSV)
- Innate & Adaptive immunity

For more information please see our web page at:

www.healthsystem.virginia.edu/inf-diseases/
or contact us at medpg13@virginia.edu

The University of Virginia is an equal opportunity/affirmative action employer. Women and members of under-represented groups are encouraged to apply.

**Women’s Cancer Program**

Tenure-track faculty position in the area of breast cancer biology

**Fox Chase Cancer Center**

We seek outstanding applicants with a Ph.D. and/or M.D. degree for appointment in our Women’s Cancer Program. Collaborative researchers who complement our interests in breast cancer treatment and prevention, early detection and the role of cancer stem cells should apply. See: http://www.fccc.edu/research/areas/WomensCancer/index.html

Fox Chase, an NCI-designated Comprehensive Cancer Center, offers a highly interactive, multidisciplinary environment, with over 100 active research laboratories on the 17-acre Fox Chase campus in suburban Philadelphia. Researchers are supported by state-of-the-art core shared facilities, extramural and intramural postdoctoral training grants, a graduate training program, endowed fellowships, and an outstanding funding record for investigator-initiated grant applications. The laboratory of the successful candidate will be located in a new state-of-the-art biomedical research building on the Fox Chase campus.

Applications will be reviewed starting August 25, 2010. To apply, please send CV, description of research plans, and names and contact information for three individuals from whom letters of reference may be solicited to Ms. Rose Walsh, Fox Chase Cancer Center, 333 Cottman Avenue, Philadelphia, PA 19111 (rose.walsh@fccc.edu). Equal Opportunity Employer.

From technology specialists to patent attorneys to policy advisors, learn more about the types of careers that scientists can pursue and the skills needed in order to succeed in nonresearch careers.
Do you have a promising compound but lack resources or experienced collaborators? Collaborate with the new NIH Blueprint Neurotherapeutics Network—a “virtual pharma” with resources, expertise, and funding to advance promising compounds from chemical optimization through phase I clinical testing. The Network is open to novices and experienced drug developers at universities, non-profit research organizations, and companies, and is structured so that you will retain ownership of the intellectual property for drugs you develop.

To apply, go to http://neuroscienceblueprint.nih.gov/rfa/
The deadline is August 10, 2010.

For more information, visit www.neuroscienceblueprint.nih.gov.

Tenure-Track/Tenure-Eligible Investigator Position in Chemical Biology

The Chemical Biology Laboratory (CBL), Center for Cancer Research (CCR), National Cancer Institute (NCI), National Institutes of Health (NIH), Department of Health and Human Services (DHHS) is accepting applications for the position of Tenure Track/Tenure-Eligible Investigator to develop an independent research program addressing problems at the interface of chemistry and biology.

Ideal candidates will establish dynamic, collaborative programs that develop and apply chemical methods, tools and materials to define and manipulate the biological processes that impact cancer and/or AIDS. Additionally, Investigator is expected to establish an internationally recognized program and direct a research group composed of postdoctoral fellows and technicians. Of particular interest are chemists developing and implementing novel imaging tools; chemists controlling cell fate via small molecules; and synthetic chemists developing novel methodology to enable the preparation of complex biologically active molecules.

Candidates must possess a Ph.D. in Chemistry or related Physical Science. Although this search is directed at the tenure track level, outstanding candidates at the tenured level will also be considered. The position is located at the NCI campus in Frederick, MD. This location offers state-of-the-art Chemical Biology laboratories as well as core facilities including mass spectrometry; NMR spectroscopy; protein expression and proteomics; electron, optical and small animal imaging and other advanced technologies. The Incumbent will be provided with laboratory space, research equipment, staff support, and an annual supply budget.

Consideration of applicants will begin August 16, 2010 and will continue until the position is filled. Salary is competitive and is commensurate with experience and full benefits (including retirement, health insurance, life insurance, and a Thrift Savings plan). This position is not restricted to U.S. citizens.

To apply, please submit a cover letter, curriculum vitae, description of research plans (~ 5 pages), and arrange to have 3 letters of recommendation sent to: Ms. Deanna Dougherty, Administrative Officer, NCI-Frederick, P.O. Box B, Bldg. 578/6, Frederick, MD 21702-1201, Tel. 301-846-5199, Fax 301-846-6053, E-mail: dougherd@mail.nih.gov. PDF files are encouraged. This position is subject to a background investigation. The NIH is dedicated to building a diverse community in its training and employment programs.

DHHS, NIH and NCI are Equal Opportunity Employers

The NIH Director's Wednesday Afternoon Lecture Series

Biomedical scientists around the world are invited to join us online to hear leading investigators present their latest results to the NIH Intramural Research community. Lectures may be viewed live at 3:00 p.m., EST (20:00 GMT) on Wednesdays, from September through June. Live webcasts can be viewed under “Today’s Events” at: <http://videocast.nih.gov/>

The current schedule of lectures is available at: <http://wals.od.nih.gov>

Special Summer Lecture:

July 26, 2010: George Daley, Children’s Hospital Boston, “Induced Pluripotent Stem Cells for Disease Modeling”
Tenure/Tenure-Track Position in Viral Disease Immunology

Laboratory of Virology

The National Institute of Allergy and Infectious Diseases (NIAID), Division of Intramural Research (DIR), Laboratory of Virology (LV), part of NIAID’s Rocky Mountain Laboratories (RML) in Hamilton, MT, seeks applicants for a tenure/tenure-track position (associate/assistant professor equivalent) to conduct independent research on viral agents requiring high or maximum containment.

LV conducts high-impact, innovative scientific research on viral agents requiring high or maximum containment, including arenaviruses, bunyaviruses, filoviruses, flaviviruses, and paramyxoviruses, with the goal of developing diagnostics, vaccines, and therapeutics. Research includes studies of vector/reservoir transmission, pathogenesis, pathophysiology, and host immune responses to high containment viral pathogens. RML’s state-of-the-art facilities include an operational BSL-3 facility, a BSL-4 laboratory, and a BSL-4 animal facility that can accommodate work with both small animal and nonhuman primate models. RML also has core facilities for genomics, electron microscopy, and flow cytometry. Other RML research programs focus on prions, retroviruses, numerous pathogenic prokaryotic organisms, and pathogen transmission by arthropod vectors. RML is located in the scenic Bitterroot Valley of western Montana within easy access to some of the finest outdoor recreational opportunities in North America.

Key Requirements

- Candidates must be able to develop an independent research program in viral disease immunology, supervise staff and fellows, and collaborate with RML/DIR researchers working on other infectious diseases. A preference will be given to candidates with experience in high containment work, as outlined in CDC/NIAID Biosafety in Microbiological and Biomedical Laboratories (BMBL), 5th Edition. An interest in and commitment to animal model studies in a biosafety level (BSL)-4 environment is essential.
- Candidates must hold a Ph.D., D.V.M., or M.D., and have a minimum of three years of relevant postdoctoral experience.
- Applicants must be U.S. citizens, resident aliens, or nonresident aliens with or eligible to obtain a valid employment-authorizing visa.
- Applicants must be able to fulfill, acquire, and maintain a favorable Access National Agency Check and Inquiries (ANACI) background investigation, Select Agent clearance, and other NIH biosecurity requirements.

To apply: E-mail curriculum vitae, bibliography, and a two- to three-page description of your proposed research program to Felicia Braunstein at lvsearch@mail.nih.gov. In addition, three letters of recommendation must be sent directly from the referees to Dr. Kim Hasenkrug, Chair, NIAID Search Committee, c/o Felicia Braunstein at lvsearch@mail.nih.gov or 10 Center Drive, MSC 1356, Building 10, Room 4A30, Bethesda, MD 20892-1356. E-mail is preferred. The selected candidate may be asked for additional references.

Applications will be reviewed starting August 31, 2010, and will be accepted until the position is filled. Please refer to ad #30 on all correspondence. For additional information on this position, contact Dr. Heinz Feldmann at feldmannh@niaid.nih.gov.

More information about LV is available at www.niaid.nih.gov/labs/aboutlabs/LV. Find out more about DIR laboratories at www.niaid.nih.gov/about/organization/dir and about working at NIAID at www.niaid.nih.gov/careers/CTTS.

National Institute of Allergy and Infectious Diseases
In its tenth year of operation Jacobs University Bremen adapts its leadership structure to the future challenges and is seeking applications and nominations for the newly established position of

**Provost/Vice President Education and Research**

Reporting directly to the President the Provost provides academic and administrative leadership and takes budgetary responsibility for Jacobs University’s schools and research centers. As a member of the University’s Management Board, the Provost interacts closely with the Chief Operating Officer/Vice President Students and Business, who takes responsibility for the general university administration including the university’s finances.

In close cooperation with the relevant faculty boards the Provost plays a major role in establishing and directing the university’s academic agenda and advancing its profile in research and teaching.

The successful candidate must have a record of significant academic achievements and contributions sufficient to justify the appointment to the academic rank of full professor, a minimum of ten years of progressively responsible experience in higher education and research, expertise in higher education financial operations, experience in and solid knowledge of the Anglo-American as well as the European university systems, a strong commitment to teamwork, and exceptional leadership and communication skills.

The successful candidate is expected to have a strong commitment to the university’s principles of excellence, transdisciplinarity, diversity, global citizenship, environmental responsibility, entrepreneurship and lifelong learning. It is our intention to have the new provost in office in Fall 2011.

Applications and nominations will be accepted until the position is filled. Review of applications starts on September 20, 2010.

Applications or nominations should be sent to the following address:

Jacobs University Bremen | Attn. Kirsten Mussel | Campus Ring 1 | 28759 Bremen | Germany

Jacobs University is an equal opportunity employer and is certified “Family Friendly” by the Hertie Stiftung.
The Faculty of Biology of the LMU and the Helmholtz Zentrum München (German Research Center for Environmental Health) together invite applications for a

**Head of Institute and Full Professorship (W3) for Genetics of the Hematopoietic System**

Both institutions are seeking an outstanding leader in the field to complement the HighTech Campus Martinsried/Großhadern, one of Europe’s largest centers for life science research. Special consideration is given to scientists who have a strong basic research program and excellent track record related to responses of the hematopoietic system to microbiotic stresses and signals. Candidates focusing on the genetic and epigenetic basis of hematopoietic differentiation from stem to effector cells are equally encouraged. The successful candidate is expected to teach in Genetics in the Faculty of Biology. A private law contract of employment will be closed with the Helmholtz Zentrum München.

Prerequisites for this position are a university degree, a doctoral degree, teaching skills at university level and a post-doctoral degree (Habilitation) or equivalent qualifications that may have been acquired outside the university or during a junior professorship.

Candidates for this position should not be over 52 years of age at the time of appointment. Exceptions thereto may be considered in the case of outstanding candidates.

The Helmholtz Zentrum München and the University of Munich are equal opportunity employers and aim to increase the number of female faculty members. Therefore, applications from female candidates are explicitly encouraged. Both institutions support dual career couples. Disabled candidates with essentially equal qualifications will be given preference.

Information concerning the scientific scope of the position can be obtained from Prof. Wolfgang Hammerschmidt, Helmholtz Zentrum München (hammerschmidt@helmholtz-muenchen.de, phone +49 89 3187-1506) or Prof. Michael Boshart, Ludwig-Maximilians-Universität München (boshart@lmu.de, phone +49 89 2180-74600).

Applications including curriculum vitae, list of publications, a brief summary of present and future research interests, proof of teaching experience and copies of relevant documents need to be sent as hard copy to Prof. Dr. Günther Wess, CEO and President, Helmholtz Zentrum München, Ingolstädter Landstr. 1, D-85764 Neuherberg and at the same time the full application as electronic file (together with the completed submission form on the website http://www.biologie.uni-muenchen.de/fakultaet/organisation/dekanat/index.html) before **August 22, 2010** to the Email-address: dekanat19@lmu.de

www.helmholtz-muenchen.de
**President, The Scripps Research Institute**

The Scripps Research Institute (TSRI), one of the world’s largest independent non-profit research organizations, has always stood at the forefront of basic biomedical science, focused on comprehending the most fundamental processes of life. In just three decades, TSRI has established a substantial and enduring track record of major contributions to the betterment of health and the human condition through uniquely positioning itself at the intersection of biology and chemistry. This powerful synergy has enabled TSRI investigators to move discoveries fluidly from the bench to applications that hold extraordinary potential to improve human health and well-being.

The President of TSRI will provide not only scientific vision, but full fiduciary responsibility for all aspects of both biomedical research campuses in La Jolla, California, and Jupiter, Florida. He/she will build on the strengths of the Institute through an astute understanding of the opportunities inherent in emerging breakthroughs, the recruitment of biomedical leaders who can capitalize on these fruitful areas, and provision of appropriate cutting-edge technologies. In guiding TSRI’s scientific direction, it is critical that he/she builds on its strengths and invests in new capabilities bolstered by improved strategic planning. With the current constraints on the federal budget and limitations on the investment capacity of industry, the new President will need to provide not only vision, but discipline in helping TSRI’s scientists and Board work closely together in setting priorities that will promote success and innovation.

The new President of The Scripps Research Institute will bring:
• A well-established national and international reputation as a scientist in any of the key TSRI disciplines such as structural biology, chemistry, cell biology, etc.
• A record of progressively responsible management of programs of considerable scale and complexity.

The Scripps Research Institute is an Equal Opportunity/Affirmative Action Employer.

---

**Assistant Professor in Bioinformatic Analysis of Biological and Disease Mechanisms**

The Department of Pathology at Stanford University School of Medicine seeks an outstanding investigator with research interests in bioinformatic analysis of biological and disease mechanisms for a tenure-track appointment as Assistant Professor in the University Tenure Line Professoriate. The predominant criterion for appointment in the University Tenure Line is a major commitment to research and teaching.

Applicants must have a Ph.D., M.D., or M.D./Ph.D. degree. The successful candidate is expected to establish a high quality, independent research program with a focus on basic and/or applied bioinformatics, which may include areas such as algorithm development, high-throughput analysis of physiological and pathological processes, structural genomics and biology, structure prediction and modeling, as well as biological and disease databases and applications.

Scholarship and teaching (and in some cases, clinical care activities) are the critical components of faculty appointments in the University Tenure Line (UTL). Individuals appointed as Assistant Professors in the UTL will have completed housestaff training (where applicable) and, additionally, one or two years of postdoctoral research experience. Their accomplishments during graduate and postgraduate training should already have stamped them as creative and promising investigators. If these individuals have not had formal teaching experience, they should have demonstrated during their postdoctoral training a commitment to develop the skills necessary for first-rate teaching. The successful candidate must have demonstrated true distinction (or the promise of achieving true distinction) in research, and the capability of sustaining first-rate performance (or the promise of this) in teaching, and excellence in patient care (if applicable) appropriate to the programmatic need upon which the appointment is based.

To apply, print a copy of vacancy announcement ARS-X10W-0204 from the ARS Careers Website at http://www.afm.ars.usda.gov/divisions/hrd/index.html and follow the application directions provided. For questions about this position, call Dr. Edwin Civerolo, at 559-596-2702 or E-Mail: Edwin.civerolo@ars.usda.gov. Applications must be received by August 20, 2010.

USDA/ARS is an Equal Opportunity Employer and Provider.

---

**The Faculty of Science of the University of Fribourg/Switzerland and the Adolphe Merkle Institute (AMI)**

**invite applications for a tenure position of a Full Professor in Physics of Soft Matter**

Qualified applicants must have an outstanding track record of successful independent research in the field of soft nanomaterials.

The successful candidate is expected to develop a vigorous, internationally recognized research program that is sustained by a significant level of external funding. Close collaboration with the other members of the Institute and the Faculty of Science is expected. The candidate will contribute to the educational mission of the Faculty of Science by teaching at the graduate level. AMI offers highly competitive working conditions, an outstanding infrastructure, a generous start-up package, and a significant level of discretionary research funding.

The AMI is a recently established center of competence, focused on research in the field of soft nanomaterials science and technology. With the objective to stimulate innovation, AMI aims to combine fundamental and application-oriented research within an interdisciplinary setting.

More information about the application procedure (deadline 30.09.2010) as well as the AMI are available at: www.unifr.ch/science/positions

---

**USDA Agricultural Research Service**

**“The Future Grows Here”**

**SUPERVISORY RESEARCH ENTOMOLOGIST/ PLANT PHYSIOLOGIST/CHEMIST/ PLANT PATHOLOGIST/ OR PLANT BIOLOGIST**

**Commodity Protection and Quality Research Unit**

**Parlier, CA**

**GS14/15; Salary Range of $96,690 to $147,857.00**

The USDA, Agricultural Research Service (ARS) is seeking an outstanding research scientist for a permanent full-time Research Leader position. The incumbent will lead a multi-disciplinary team of scientists to develop effective postharvest commodity protection strategies to mitigate the effects of insect pests on horticultural crops including fresh or dried fruit/vegetables and nuts. The incumbent will develop an individual research program in postharvest entomology, plant pathology, plant physiology, microbiology, chemistry or biochemistry that contributes to the research objectives of the Unit to maintain and enhance postharvest commodity quality, including development of chemical and non-chemical alternatives to methyl bromide, improved insect pest and detection surveillance, and integrated postharvest pest management strategies. U.S. citizenship is required. A Ph.D. is highly desirable.

To apply, print a copy of vacancy announcement ARS-X10W-0204 from the ARS Careers Website at http://www.afm.ars.usda.gov/divisions/hrd/index.html and follow the application directions provided. For questions about this position, call Dr. Edwin Civerolo, at 559-596-2702 or E-Mail: Edwin.civerolo@ars.usda.gov. Applications must be received by August 20, 2010.
DEAN
College of Science and Technology, North Carolina Central University

North Carolina Central University invites nominations and applications for a visionary and innovative Dean to lead the College of Science and Technology (CST) to regional and national prominence. The new Dean will be coming to NCCU at a moment of tremendous opportunity, expressed in the university’s current prominence as the number one public HBCU and one of the top ten HBCUs in the country according to U.S. News & World Report. The College of Science and Technology is comprised of six departments: Biology, Chemistry, Environmental, Earth and Geospatial Sciences, Mathematics and Computer Sciences, Pharmaceutical Sciences, and Physics. Reflecting the university’s considerable investment in research infrastructure over the last ten years, the College is affiliated with numerous research centers at NCCU, including the Biomedical/Biotechnology Research Institute (JLC-BBRI, http://web.nccu.edu/Academics/BBRI/), the Biomanufacturing Research Institute and Technology Enterprise (BRITE, http://brite.nccu.edu/), and the NSF CREST Computational Center for Fundamental and Applied Science and Education (http://www.nccu.edu/Academics/institutesandcenters/crest/index.cfm). The new Mary M. Townes Science Complex houses the College of Science and Technology and offers 144,000 sq. ft. of state-of-the-art classrooms, teaching laboratories, equipment and technology. The NCCU campus is situated in Durham at the apex of the Research Triangle and benefits from the rich local environment of public and private research universities and government research organizations.

CST seeks a leader who will build upon a record of success and continue to develop the College’s outstanding graduate and undergraduate science and mathematics programs. The Dean is responsible for the overall academic excellence of the College, recruitment and development of outstanding faculty and staff, promotion of pedagogical and curricular renewal, and improvement of educational effectiveness. The Dean is expected to foster a rich intellectual community, support faculty and student research, and effectively manage the administrative affairs of the College. The Dean also represents the CST to constituencies inside and outside the University and assists in obtaining external resources for the College and the University. Candidates for this position should have a minimum five year record of administrative accomplishment, exemplary teaching, and distinguished scholarship and grantmanship; be experienced in fiscal and personnel management; possess strong organizational and interpersonal skills, including those in communication, consensus-building, and problem-solving; be committed to affirmative action, equal opportunity, and diversity; demonstrate an ability to work effectively and collaboratively in a shared governance culture; display successful experience in fund-raising and grant-writing; and they must possess an earned doctorate and credentials commensurate with a tenured appointment at the rank of full professor.

Although the search will remain open until the position is filled, applicants are encouraged to submit application materials by October 1, 2010. Preliminary screening of potential candidates will begin November 1, 2010. Nominations and application materials, including C.V., cover letter, and the names, addresses, titles, phone numbers, and e-mail addresses of at least five (5) professional references, should be transmitted via email (in MS Word or pdf) to: Dr. Sandra L. White, Chair, CST Dean’s Search Committee, swhite@nccu.edu.

North Carolina Central University is a constituent institution of the University of North Carolina System and an Equal Opportunity, Affirmative Action Employer. NCCU complies with the Immigration Reform and Control Act of 1986.

---

The European Space Agency (ESA) is an intergovernmental organisation offering exceptional career opportunities for Europe’s highest calibre scientists, engineers and administrators. ESA has a clear mandate to promote cooperation among European States, for exclusively peaceful purposes, in Space Research and Technology.

The Agency is looking for a (m/f)

System Engineer

for its Astrophysics and Fundamental Physics section. As part of the Advanced Studies & Technology Preparation Division, based at ESTEC (Noordwijk, The Netherlands), this Section is responsible for studying future astrophysics and fundamental physics missions, assessing their feasibility via system studies for defining the mission space segment.

Applicants should have a university degree in engineering or applied physics, complemented by a number of years’ experience in spacecraft system engineering. A well developed system view and good understanding of the mission requirements imposed by science payload is very important. Knowledge of sensors, optics technologies and more generally instrumentation is considered as an asset. A background in space sciences, with specific reference to astrophysics and fundamental physics is considered as advantageous.

Candidates are expected to have a proactive attitude to problem-solving, be innovative and creative in their approach and have excellent planning & organisational skills. They should be self-motivated and able to work and communicate effectively within a multinational team involving the European science community and space industry.

Our competitive employment conditions and salaries take into account the particular needs of professionals and their families.

For a complete job description and on-line application guidelines visit our “Careers at ESA” section at http://www.esa.int and choose vacancy number: ESA/VN-ESTEC(2010)060.

The closing date for applications is 3 August 2010.
ASSISTANT PROFESSORSHIP

California State University, Northridge invites applications for two tenure-track positions in the Department of Biology, starting August 2011. Applicants must have a Ph.D. and postdoctoral experience. Each successful candidate shall develop a vigorous research program involving undergraduate and M.S. students, seek extramural research funding, and demonstrate teaching excellence.

EVLUTIONAL BIOLOGIST

Explaining patterns or processes of diversification among species or populations. Teaching options include a course on the diversity of a group of terrestrial organisms, molecular systematics, evolution, and introductory biology. Submit to e-mail: evosresearch@csun.edu.

MOLECULAR GENETICIST

Emphasizing genomic or proteomic approaches to problems in eukaryotic genetics. Teaching options include molecular genetics, genetics, introductory biology, and a specialized graduate course. Submit to e-mail: molsearch@csun.edu.

ASSOCIATE PROFESSOR/PROFESSOR NEUROPHARMACOLOGY

The Medical College of Georgia (MC) seeks an established investigator with outstanding research accomplishments in neuropharmacology and neuroscience to complement and enhance the diversity of basic and clinical neuroscience research strengths in our Department of Pharmacology and Toxicology and our institution. The Medical College of Georgia has an eminent, well-funded neuroscience research community across other departments including, Physiology, Cell Biology, Molecular Medicine, Psychiatry and Health Behavior, and Neurology. Members in our Department conduct research that is relevant to a range of neurological and psychiatric disorders including Alzheimer’s disease, Parkinson’s disease, drug abuse, schizophrenia, and mental retardation. Our Department also has considerable strength in cardiovascular studies. We seek applicants with an established record of productivity and an externally funded research program, particularly a program that complements the strengths in the Department and that can be translated to clinical problems. Applicants with expertise in drug discovery and development, systems neurobiology, or neurotoxicology are particularly encouraged to apply. We offer a generous startup package, excellent laboratory space, and additional core facilities for microarray technology, genetically modified animals, cell imaging, electron microscopy, small animal and nonhuman primate behavior, and clinical collaborations. The successful applicant will participate in teaching programs for professional and graduate students. Curriculum vitae, summary of professional and research goals, and the names of three references must be submitted along with an electronic application (ACH 60169, Requisition Number 41434) at website: http://www.mcg.edu/facultyjobs. Application review will begin August 1, 2010. Deadline for applications is August 15, 2010.

MC is an Equal Employment Opportunity/Affirmative Action/Equal Access Employer.

FACULTY POSITION

University of Saskatchewan, College of Medicine

Department of Microbiology and Immunology

The Department of Microbiology and Immunology, College of Medicine, University of Saskatchewan, invites applications for a tenure-track faculty position as an ASSISTANT PROFESSOR in the discipline of immunology. We are interested in an outstanding individual who will pursue a vigorous research program. Applicants must have a Ph.D. or equivalent, postdoctoral research experience, demonstrated research ability, and an interest in undergraduate and graduate education. We are seeking an individual with expertise in any field of immunology, either basic or related to medicine.

The successful applicant will have a broad range of interactive possibilities on campus with scientists in cognate departments, colleges, including the Saskatchewan Structural Sciences Centre, the synchrotron facility (Canadian Light Source) and the Vaccine and Infectious Disease Organization, plus a number of national and provincial research institutes. There is an active research park adjacent to campus dedicated to the commercialization of innovation. The Department is situated in the Health Sciences Building that is currently undergoing extensive renovation and expansion to become the Academic Health Sciences Complex.

The Department offers rigorous undergraduate and graduate programs. Its members are involved in basic and translational research and interact with colleagues across campus.

The University of Saskatchewan (website: http://www.usask.ca) is situated along a river in the vibrant city of Saskatoon (website: http://www.tourismsaskatoon.com), which is a hub of scientific research, the arts, resource development, and agriculture.

Applicants for the position should provide curriculum vitae, a statement of research interests and specific goals, and the names of three references to:

Dr. Peter Bretscher, Head

Department of Microbiology and Immunology

College of Medicine

University of Saskatchewan

107 Wiggins Road

Saskatoon, SK S7N 5E5 Canada

Review of applications will begin on August 15, 2010, and continue until a successful candidate is chosen.

Applicants are invited from qualified individuals regardless of their immigration status; however, Canadian or permanent residents will be given priority. The University of Saskatchewan is committed to Employment Equity. Members of Designated Groups (women, Aboriginal people, people with disabilities, and visible minorities) are encouraged to apply and identify themselves as belonging to a designated group.

A POSTDOCTORAL FELLOW position is available in the Division of Nephrology at the University of Utah. The research program concerns renal mechanisms of blood pressure regulation and is currently supported by multiple federal grants. Strong background in molecular biology and cardiorespiratory physiology is desirable. Please send curriculum vitae and contact information of three references to: Professor Tianxin Yang, Salt Lake City, UT. E-mail: tianxin.yang@hsc.utah.edu; telephone: 801-585-5570.
