BREVIA
916 Land-Level Changes Produced by the Mw 8.8 2010 Chilean Earthquake
M. Farias et al.
The 2010 Mw 8.8 Chilean earthquake ruptured ~500 kilometers and vertically displaced over 3 meters.

CONTENTS continued >>

COVER
Immuno–electron micrograph of a plastid-dividing ring (diameter ~500 nm), a structure required for chloroplast division, isolated from the unicellular alga Cyanidioschyzon merolae. Immunogold particles (black dots) indicate localization of the glycosyltransferase protein PDR1 (protein dividing ring 1), which forms a ring with carbohydrates that constricts to physically divide the chloroplast. See page 949.

RESEARCH ARTICLE

PTIP Promotes Chromatin Changes Critical for Immunoglobulin Class Switch Recombination
J. A. Daniel et al.
A factor that regulates chromatin accessibility and recombination during immunoglobulin rearrangements is identified.

>> Perspective p. 914

REPORTS

Cosmological Constraints from Strong Gravitational Lensing in Clusters of Galaxies
E. Jullo et al.
Light from distant sources bends around massive intervening objects and helps to reveal the properties of dark energy.

Dual Jets from Binary Black Holes
C. Palenzuela et al.
Simulations show that merging black holes may produce a detectable electromagnetic signature.

Unidirectional Emission of a Quantum Dot Coupled to a Nanoantenna
A. G. Curto et al.
An antenna designed for optical wavelengths is used to control the direction of the light emitted from a quantum dot.

Ceria Maintains Smaller Metal Catalyst Particles by Strong Metal-Support Bonding
J. A. Farmer and C. T. Campbell
The stability of cerium oxide surfaces allows deposited silver nanoparticles to maintain a small size distribution.

Evidence of Recent Thrust Faulting on the Moon Revealed by the Lunar Reconnaissance Orbiter Camera
T. R. Watters et al.
The relatively young age of the faults and their distribution suggest global, late-stage contraction of the Moon.

Drought-Induced Reduction in Global Terrestrial Net Primary Production from 2000 Through 2009
M. Zhao and S. W. Running
Terrestrial biomass declined during the hot past decade, reversing the trend of the previous 20 years.

Loss of DNA Replication Control Is a Potent Inducer of Gene Amplification
B. M. Green et al.
Re-replication of DNA and homologous recombination between repetitive elements can cause genome instability.

The Legionella Effector Protein DrrA AMPylates the Membrane Traffic Regulator Rab1b
M. P. Müller et al.
An intracellular bacterial pathogen interferes with host cell membrane trafficking.

Chloroplasts Divide by Contraction of a Bundle of Nanofilaments Consisting of Polyglucan
Y. Yoshida et al.
Enzymatic transfer of simple sugars is essential for the formation of the chloroplast-division machinery.

Conserved Fungal LysM Effector Ecp6 Prevents Chitin-Triggered Immunity in Plants
R. de Jonge et al.
A fungal protein binds to a host cell wall component to allow the fungus to escape immune responses.

Linear Arrays of Nuclear Envelope Proteins Harness Retrograde Actin Flow for Nuclear Movement
G. W. G. Luxton et al.
An actin-dependent mechanism is involved in moving nuclei so that they are properly positioned for cell migration.

mTOR-Dependent Synapse Formation Underlies the Rapid Antidepressant Effects of NMDA Antagonists
N. Li et al.
Ketamine, an anesthetic and recreational drug, rapidly increases synaptic signaling and antidepressant behavioral responses.

Females Use Multiple Mating and Genetically Loaded Sperm Competition to Target Compatible Genes
S. R. Pryke et al.
Female birds that have multiple mates favor fertilization by the most genetically compatible father.

Cell Lineage Reconstruction of Early Zebrafish Embryos Using Label-Free Nonlinear Microscopy
N. Olivier et al.
Time-lapse recording characterizes the rhythm and cleavage pattern of the embryo during early stages of development.

>> Science Podcast
Plastic Accumulation in the North Atlantic Subtropical Gyre
K. L. Law et al.
The amount of plastic debris in the surface waters of the western North Atlantic Ocean has plateaued over the past 22 years.
10.1126/science.1192321
A Red-Shifted Chlorophyll
M. Chen et al.
A natural chlorophyll is found to absorb further in the infrared than other light-harvesting chromophores in its class.
10.1126/science.1191127
A Vibrio Effector Protein Is an Inositol Phosphatase and Disrupts Host Cell Membrane Integrity
C. A. Broberg et al.
Altering the homeostasis of membrane-bound signaling molecules allows a bacterial pathogen to corrupt cell function.
10.1126/science.1192850
A Unifying Genetic Model for Facioscapulohumeral Muscular Dystrophy
R. J. L. F. Lemmers et al.
Sequence variants shared by patients with a genetically complex form of muscular dystrophy explain how the disease arises.
10.1126/science.1189044
