| IL1RA | TARC/CCL17 |
| IL2 | TNF alpha |
| IL3 | TPO |
| IL4 | VEGF |

Recombinant mouse proteins

- CXCL2
- CXCL16
- EGF
- FGF2
- GM-CSF
- IFN gamma
- IL2
- IL3
- IL4
- IL11
- IL33
- LIX/CXCL5
- MCP2
- Noggin
- SDF-1 beta
- SF20
- TNF alpha
- VEGF

Recombinant rat proteins

- EGF
- FGF2
- IFN gamma
- SDF-1a/CXCL12
- SDF-1b/CXCL12

Other recombinant proteins

- Protein A/G
- Staphylokinase
- Streptokinase

Offer good for any combination of three items on the list above. Products are for research use only. Not for human use. Not for use in diagnostic or therapeutic procedures.

BEYOND THE KNOCKOUT MOUSE

NEW OPPORTUNITIES FOR GENETIC ENGINEERING IN ANIMALS

WEBINAR

September 15, 2010

12 noon ET, 9 am PT, 4 pm GMT

PARTICIPATING EXPERTS

Carl Lupica, Ph.D.

National Institutes of Health
Baltimore, MD

Kerry Ressler, M.D., Ph.D.

Yerkes National Primate
Research Center
Atlanta, GA

Rosalba Sacca, Ph.D.

Pfizer, Inc.
Groton, CT

REGISTER NOW!

Sign Up At:

www.sciencemag.org/webinar

Until recently, transgenic and knockout models for disease have been limited almost exclusively to mice. Although useful, these models do not always accurately reflect the physiology and pathology of human disease. Now, advances in genetic engineering technology have extended the spectrum of species available beyond mice, enabling the creation of targeted knockouts and knock-ins in rats, rabbits, and zebrafish, with the prospect of achieving precise gene targeting in larger animals, including livestock and nonhuman primates.

Life Science researchers are now presented with an unprecedented opportunity to choose the model system that will best reflect the biology or human disease state being studied. During this Webinar, three expert guests will discuss cutting edge genetic engineering technologies and the opportunities to develop more relevant translational animal models beyond knockout mice.

WEBINAR VIEWERS WILL:

- Learn about current state-of-the-art genetic engineering methodologies
- Obtain an overview of new animal models for research
- Gain insight into the future direction of transgenic animals that have greater translational value for ADMET and disorders related to the metabolic, immune, cardiovascular, and central nervous systems
- Have questions answered live by the panel of experts

Drop. Measure. Done.

NanoVue™ Plus: intelligent performance across all spectrophotometer applications

It's all the convenience you want in a spectrophotometer, packaged in a portable, ergonomic device. NanoVue Plus features a new hydrophobic, gold-colored sample plate coating that delivers outstanding results for sub-microliter amounts of proteins and nucleic acids. It operates without a PC and does not require time-consuming third-party path length recalibration.

NanoVue Plus enables easy protocol selection using advanced software that includes intuitive drop-down lists for the full range of CyDye™ fluorescent dyes, as well as lists for common fluors. Results can be exported using a USB cable or Bluetooth™ connections for print via computer (PVC) or stored using the new SD card option. An integrated printer is also available.

- Swift, accurate analysis of 0.5 µl samples of nucleic acids and proteins
- Practical drop and measure mechanism
- Outstanding sample recovery
- Reliable and reproducible measurements
- Automatic self-calibration on start up
- Path length recalibration kit available as accessory

Experience the NanoVue Plus first hand.

ARE YOU ON TRACK?

Investment guidance for higher education professionals

Unsure of how to get and keep your retirement on track?
We're ready to help. Together, we can:

- **Analyze your portfolio.** We'll help you bring your total financial picture—both workplace and personal savings—into focus.
- **Review your plan.** We can help you prepare for up and down markets.
- **Choose investments.** We'll help you choose low-cost investments, from bonds and annuities to no-load mutual funds.

**SET UP YOUR COMPLIMENTARY
ONE-ON-ONE CONSULTATION TODAY.**

RELAX. YOU'VE GOT ENDNOTE X4.

Take a deep breath and RELAX while Thomson Reuters EndNote is hard at work connecting you to high quality resources, simplifying your collaboration with colleagues and removing the reference stress from all your research projects.

For efficiently gathering references and full text, no other solution delivers the rich support found in EndNote X4. Simply point EndNote toward your PDF files and folders to create new references without typing or searching. Or, let EndNote save you time locating and attaching full text PDF files for your existing references. Either way you'll have more time on your hands.

With the Web you can share EndNote reference groups and even manage your personal publication list for the free ResearcherID author community. Imagine a simple way to present your work publicly along with citation metrics delivered by the Web of Knowledge.SM

Learn about more new features in EndNote X4. You just can't RELAX without it.

AAAS is here – helping educators make informed decisions.

For many K-12 teachers and librarians, tight budgets mean every purchase needs to deliver maximum value in the classroom. With *Science Books & Films (SB&F)* AAAS provides educators a way to find the best resources and the best values. With hundreds of book and movie reviews *SB&F* helps science educators bring the best tools to their schools. As a AAAS member your dues support these efforts.

If you're not yet a AAAS member, join us. Together we can make a difference.

Introducing the New BD Influx Cell Sorter

2010

Introducing the new BD Influx

Choice. Flexibility. Control. The BD Influx™ cell sorter offers boundless adaptability to application and environmental requirements without sacrificing speed or accuracy. Available with up to 7 lasers, up to 6-way sorting, and a range of detection configurations, the instrument offers a combination of powerful technology and precision controls for flow cytometry as exacting as your research demands.

Innovative thinking is evident throughout the design of the new BD Influx, with a modular component architecture and hands-on controls that make it ready to adapt to your unique requirements.

bdbiosciences.com/influx

Class I (1) Laser Product.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.

BD, BD Logo and all other trademarks are property of Becton, Dickinson and Company. © 2010 BD 23-11743-00

Helping all people
live healthy lives

In addition, the new BD Influx software puts hundreds of parameters under your control with rich analysis capabilities to let you visualize experimental data in a meaningful way—from histograms to contour plots.

Find out how the innovation built in to the BD Influx can keep your lab in a perpetual state of the art at bdbiosciences.com/influx.

***Innovation is built in.
You can depend on it.***

SAMPLE COOLING/FREEZING

Thermo-conductive CoolRacks tubes, plates, and sample holders introduce critical reproducibility and instant organization into benchtop sample cooling and freezing. Precision-engineered and manufactured from novel thermo-adaptive alloy, CoolRacks standardize temperature control and quickly equilibrate all wells to within 0.1°C of the source temperature. The portable and versatile CoolRacks can be easily implemented in any procedure requiring ice, dry ice, liquid nitrogen, water bath, heat block, or any other laboratory temperature source. All samples are kept upright at exactly the same temperature regardless of well position, and racked samples can be moved from ice to water bath en masse, giving a rapid identical temperature shift for all samples. CoolRacks are available in a comprehensive range of formats for use with cryo tubes, microfuge tubes, PCR strips and plates, and many other consumables, and can be easily integrated into any process, diagnostic, or clinical kit.

BioCision

WATER PURIFICATION SYSTEM

The PURELAB Pulse Type II EDI (electrodeionization) water purification system, developed to produce consistently high-purity water at economical running costs, uniquely incorporates recirculation of purified water up to the dispense point—guaranteeing optimum purity. The Pulse technology integrates EDI, which combines ion-exchange resins and ion-selective membranes with direct current to efficiently remove ionized impurities from water. It is complemented by pretreatment, reverse osmosis, and a 254 nm ultraviolet lamp to produce Type II pure water that meets and exceeds ASTM D1193, ISO 3696 plus European, United States, and Japanese Pharmacopoeia standards. In addition, the PURELAB Pulse can be fitted with a point-of-use biofilter to deliver bacteria levels of less than 1 CFU/10 ml. The PURELAB Pulse has been designed to fit into any laboratory environment and is easy to operate and maintain. It can be wall or bench mounted for convenient access and can be fitted with ELGA's unique wraparound reservoir to save valuable space.

NIR PHOTOMETRIC LINEARITY REFERENCE SETS

Near-infrared (NIR) traceable photometric linearity reference sets are available to pharmaceutical quality assurance labs and customer support organizations looking to qualify their NIR systems. These reference sets offer operational qualification and performance qualification of the transmittance scale in the NIR using industry standard protocols. The sets are based on easy-to-handle, nonconsumable Certified Reference Materials for qualifying the NIR Transmittance scale. The wavelength range covered is 1,100 to 2,850 nm, with a %T (A) range of 1.5 %T (1.82 A) to 61 %T (0.21 A). Filters are produced in an ISO/IEC 17025 and ISO Guide 34 accredited environment and are certified traceable to National Research Council Canada.

TRYPsin-FREE CELL HARVESTING

SplitKits offer a gentle, efficient, contamination-free way to dissociate cells. The kits are the first specifically designed for use in both

serum-based and serum-free methodologies. Developed using a vegetable-based component rather than trypsin, SplitKits avoid any risk of contamination with either animal or human viruses or bacteria and are suitable for a wide variety of cell culture systems. The extremely gentle action of the vegetable-based enzyme gives higher cell yields and better cell growth recovery following detachment. In addition, surface epitopes and cell membranes remain unaltered and fully functional, making the kits ideal for use in flow cytometry. Each SplitKit is composed of the enzymatic reagent (SplitCells), AntiSplitCells, and SplitCells buffer to make a fully flexible cell dissociation system that can perform at ambient temperature. Three different formats are available, each optimized for use with specific cell types: SplitKit Strong for strongly adherent and bioreactor-cultured cells, SplitKit Moderate for moderately adherent cells, and SplitKit Mild for mildly adherent cells.

XUV WAVELENGTH CALIBRATION SOURCE

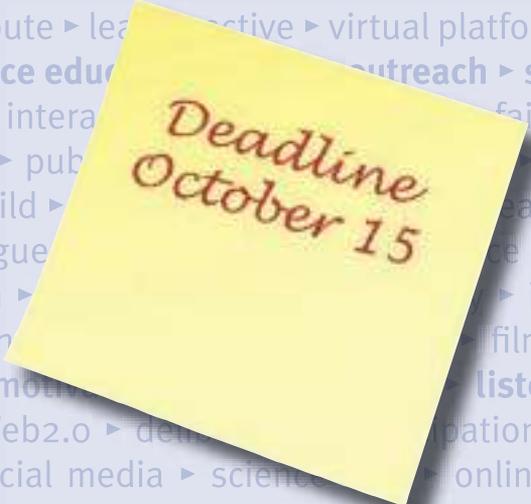

The McPherson Model 642-1 calibration light source for extreme ultraviolet (EUV) and soft x-ray (XUV) features a six position anode carousel to exchange target materials and permits selecting various emission wavelengths without breaking vacuum. This model is easy to set up and provides laboratories excellent, reliable means for at-wavelength calibration, or metrology of EUV lithography materials as well as multilayer or grazing incidence optical systems for astrophysics and other fundamental research. The Model 642-1 is a Manson type electron impact light source and uses a hot filament to produce electrons subsequently accelerated toward a solid anode target by high voltage. The EUV and XUV output emission spectrum follows the target anode material valence band structure. Dual symmetrical output beams provide sample/reference comparison and device calibration in various test setups. Users can readily exchange anodes in the carousel in order to produce desired wavelengths. Many different anodes are characterized and available as accessories.

Electronically submit your new product description or product literature information! Go to www.sciencemag.org/products/newproducts.dtl for more information.

Newly offered instrumentation, apparatus, and laboratory materials of interest to researchers in all disciplines in academic, industrial, and governmental organizations are featured in this space. Emphasis is given to purpose, chief characteristics, and availability of products and materials. Endorsement by *Science* or AAAS of any products or materials mentioned is not implied. Additional information may be obtained from the manufacturer or supplier.

AAAS Early Career Award for Public Engagement with Science

Nominations are open **now through October 15** for the **AAAS Early Career Award for Public Engagement with Science**. With this new award, AAAS will recognize early-career scientists and engineers who demonstrate excellence in their contribution to public engagement with science activities. The award recipient will receive a monetary prize of \$5,000, a commemorative plaque, and complimentary registration and reimbursement of travel expenses to the 2011 AAAS Annual Meeting in Washington, D.C.

For eligibility information and instructions on submitting nominations, visit <http://www.aaas.org/go/PESaward>.

biomapping

Bioilluminate.

LuminoCt[®] qPCR ReadyMix[™] delivers assay results in as few as 25 minutes.

Generating the best possible qPCR data has never been faster.

Discover the next generation of qPCR reagents. Based on highly optimized ReadyMix chemistry, LuminoCt delivers unsurpassed assay speeds without sacrificing accuracy, precision, or sensitivity. LuminoCt works seamlessly with Sigma custom primers and probes as well as most qPCR instruments, so optimization of reaction conditions is kept to an absolute minimum.

Simply choose your kit, build your assay, and begin.
