Cover:
Topographic map of the Moon based on measurements from the Lunar Orbiter Laser Altimeter, showing the boundary between Oceanus Procellarum, a smooth, relatively young mare region on the western nearside (upper right), and the older, more heavily cratered highlands (center and lower left). Colors indicate increasing elevation from blue to red. The crescent-shaped Lorentz crater (center) is ~312 kilometers in diameter.

1487 Island Biogeography Reveals the Deep History of SIV
M. Worobey et al.
Separation of the island of Bioko from West Africa about 10,000 years ago dates the origins of simian immunodeficiency virus.

RESEARCH ARTICLES

1488 Hemispheric Aerosol Vertical Profiles: Anthropogenic Impacts on Optical Depth and Cloud Nuclei
A. Clarke and V. Kapustin
Vertical profiles of atmospheric aerosols from throughout the Pacific region show the influence of anthropogenic combustion.
>> Perspective p. 1474; Report p. 1513

1492 Evidence for an Alternative Glycolytic Pathway in Rapidly Proliferating Cells
M. G. Vander Heiden et al.
Characterization of cancer cell metabolism provides evidence for a previously uncharacterized metabolic pathway.

REPORTS

1500 Quantum Walks of Correlated Photons
A. Peruzzo et al.
Pairs of correlated photons retain their quantum-mechanical correlations as they propagate through a waveguide maze.
>> Perspective p. 1477

1504 Global Distribution of Large Lunar Craters: Implications for Resurfacing and Impactor Populations
J. W. Head III et al.
An analysis of high-resolution global topography data advances our understanding of the impact history of the Moon.

1507 Global Silicate Mineralogy of the Moon from the Diviner Lunar Radiometer
B. T. Greenhagen et al.
Remote thermal emission spectroscopy reveals the existence of complex igneous processes on the Moon.

1513 Rainforest Aerosols as Biogenic Nuclei of Clouds and Precipitation in the Amazon
U. Pöschl et al.
The majority of cloud condensation nuclei in the Amazon during the wet season are derived from biogenic precursors.
>> Perspective p. 1474; Research Article p. 1488

1516 Melting of Peridotite to 140 Gigapascals
G. Fiquet et al.
High-temperature and high-pressure experiments reveal details about how and where the mantle melts.

1518 A Test of the Snowball Theory for the Rate of Evolution of Hybrid Incompatibilities
D. R. Matute et al.

1521 Hybrid Incompatibility “Snowballs” Between Solanum Species
L. C. Mayle and T. Nakazato
Two studies support the theory that the number of genes involved in hybrid incompatibility increases faster than linearly.

1523 The Ecological Significance of Tool Use in New Caledonian Crows
C. Rutz et al.
Stable isotope analysis reveals the nutritional benefits of tool use in wild New Caledonian crows.

1526 Structural Basis for Activation of Class Ib Ribonucleotide Reductase
A. K. Boal et al.
A single protein activates two different metallofactors by distinct chemistries.
>> Perspective p. 1475

1530 Bifurcation of Toll-Like Receptor 9 Signaling by Adaptor Protein 3
M. Sasai et al.
Compartmentalization of signaling components allows induction of distinct pathways downstream of a pathogen receptor.

1534 Differential Arginylation of Actin Isoforms Is Regulated by Coding Sequence–Dependent Degradation
F. Zhang et al.
The translational speed of proteins influences whether they are cotranslationally degraded after arginylation.
>> Perspective p. 1473

1537 MiR-16 Targets the Serotonin Transporter: A New Facet for Adaptive Responses to Antidepressants
A. Baudry et al.
The uptake transporter for a key neurotransmitter is regulated by a microRNA, yielding new insight into how Prozac functions.

1541 Relating Introspective Accuracy to Individual Differences in Brain Structure
S. M. Fleming et al.
Individual differences in the capacity for introspection are reflected in structural variation in the frontal lobe.
>> Perspective p. 1478

A “light pipe” delivers tiny objects across infant experiences shape adult attributes. Researchers create fibbing machines in the lab. How to Train Your Robot (to Lie)

IDH2 Mutations in Patients with β-2-Hydroxyglutaric Aciduria M. Kranendijk et al. A mutation that changes the specificity of an enzyme in human cancer is also found in an inherited metabolic disorder.

Propane Respiration Jump-Starts Microbial Response to a Deep Oil Spill D. L. Valentine et al. Hydrocarbon gases were the first compounds that bacteria degraded in deep underwater petroleum plumes.

β2-Microglobulin Expression from the Active X Chromosome Improves Mouse Somatic Cell Nuclear Transfer K. Inoue et al. Efficiency of mouse nuclear transfer was improved by correcting aberrant gene expression on the active X chromosome.

Chordate Amphioxus Chords Are Established by a Signaling Pathway with Prohibitin Homology J. Colicelli et al. Insight into the regulation of ABL-family tyrosine kinases could facilitate development of therapies for malignancies driven by ABL fusion proteins.

The Signal Transduction Knowledge Environment

The Signal Transduction Knowledge Environment

Evolving domains.

Personalized Epigenomic Signatures That Are Stable Over Time and Covary with Body Mass Index A. P. Feinberg et al. Epigenetic signatures akin to genetic fingerprints may correlate with a common genetic trait.

Disruption at the PTCHD1 Locus on Xp22.11 in Autism Spectrum Disorder and Intellectual Disability A. N. Noel et al. Mutations of the X-linked gene PTCHD1 are associated with autism spectrum disorders and intellectual disability.

How to Train Your Robot (to Lie) Researchers create fibbing machines in the lab.

Fast-Growing Boys Have More Sex as Men Research supports the idea that early infant experiences shape adult attributes.

Physicists Fashion the Ultimate Peashooter Out of Laser Light A “light pipe” delivers tiny objects across the room with hair’s breadth accuracy.

Evolving domains.
