Published by the American Association for the Advancement of Science (AAAS), *Science* serves its readers as a forum for the presentation and discussion of important issues related to the advancement of science, including the presentation of minority or conflicting points of view, rather than by publishing only material on which a consensus has been reached. Accordingly, all articles published in *Science*—including editorials, news and comment, and book reviews—are signed and reflect the individual views of the authors and not official positions of view adopted by AAAS or the institutions with which the authors are affiliated.

AAAS was founded in 1848 and incorporated in 1874. Its mission is to advance science, engineering, and innovation throughout the world for the benefit of all people. The goals of the association are to: enhance communication among scientists, engineers, and the public; promote and defend the integrity of science and its use; strengthen support for the science and technology enterprise; provide a voice for science on societal issues; promote the responsible use of science in public policy; strengthen and diversify the science and technology workforce; foster education in science and technology for everyone; increase public engagement with science and technology; and advance international cooperation in science.

**INFORMATION FOR AUTHORS**

See pages 352 and 353 of the 15 January 2010 issue or access www.sciencemag.org/about/authors

**FULFILLMENT SYSTEMS AND OPERATIONS** (membership@aaas.org); DIRECTOR Waylon Butler; CUSTOMER SERVICE SUPERVISOR Pat Butler; SPECIALISTS Latoya Casteel, LaVonda Crawford, Vicki Linton, April Marshall; DATA ENTRY SUPERVISOR Cynthia Johnson; SPECIALISTS Shirlene Hall, Tarrika Hill, William Jones
