

# Bioconnect.

Making connections in **bio** logical.

Your Favorite Gene powered by Ingenuity has always allowed you to make connections to your biology through dynamic interaction networks and pathways. Based on your feedback, Your Favorite Gene now includes a biologically relevant literature search, new gene regulation viewers, expression study results, and identifies biochemical compounds related to your gene. Spend less time searching multiple sites and find it all on Your Favorite Gene, and best of all, it's free.
