SPECIAL SECTION
Dealing with Data

INTRODUCTION
692 Challenges and Opportunities

NEWS
694 Rescue of Old Data Offers Lesson for Particle Physicists
696 Is There an Astronomer in the House?
698 May the Best Analyst Win

PERSPECTIVES
700 Climate Data Changes in the 21st Century
J. T. Overpeck et al.
703 Challenges and Opportunities of Open Data in Ecology
O. J. Reichman et al.
705 Changing the Equation on Scientific Data Visualization
P. Fox and J. Hendler
708 Challenges and Opportunities in Mining Neuroscience Data
H. Akil et al.

712 The Disappearing Third Dimension
T. Rowe and L. R. Frank
714 Advancing Global Health Research Through Digital Technology and Sharing Data
T. Lang
R. G. Baraniuk
719 Ensuring the Data-Rich Future of the Social Sciences
G. King
721 Metaknowledge
J. A. Evans and J. G. Foster
725 Access to Stem Cells and Data: Persons, Property Rights, and Scientific Progress
D. J. H. Mathews et al.
728 On the Future of Genomic Data
S. D. Kahn

LETTERS
673 Undercutting the Grant Process
A. M. Gade
674 Assessing Performance Through Understanding
P. Cintas
675 Leading the Charge to Virtual Meetings
W. W. Dolci et al.
676 No Mystery About the Polio Outbreak
C. L. Crawford

CORRECTIONS AND CLARIFICATIONS

BOOKS ET AL.
675 Disaster Deferred
S. Stein, reviewed by M. Hamburger
676 Atlas of Science
K. Börner, reviewed by M. A. Porter

>> Dealing with Data section p. 692

POLICY FORUM
678 Measuring the Results of Science Investments
J. Lane and S. Bertuzzi

PERSPECTIVES
681 The Eukaryotic Ribosome
V. Ramakrishnan

>> Research Article p. 730

682 Learning from Nature
J. O. Kephart

683 The Lives of Proteins
J. B. Plotkin
>> Report p. 764

685 The Genetics of Primary Aldosteronism
J. W. Funder
>> Report p. 768

686 Astronomy in the Time Domain
E. Bernardini
>> Reports pp. 736 and 739

687 Unusual Thermoelastic Properties of Methanaol Monohydrate
J. N. Grima et al.
>> Report p. 742

CONTENTS continued >>

EDITORIAL
649 Making Data Maximally Available
Brooks Hanson, Andrew Sugden, Bruce Alberts
>> Dealing with Data section p. 692

NEWS OF THE WEEK
654 A roundup of the week’s top stories

NEWS & ANALYSIS
658 Pfizer’s Shakeup Means Less Money for Research
659 From Nuclear Watchdog to the Maelstrom of Cairo

660 The Genome Project: What Will It Do as a Teenager?
>> Genome Anniversary Essays p. 689

661 Ending Earmarks Also Means the End of Many Research Projects

662 HUMAN GENOME 10TH ANNIVERSARY
What Would You Do?
>> Science Podcast

666 Will Computers Crash Genomics?
>> Genome Anniversary Essays p. 689; Dealing with Data section p. 692

669 Coming Soon to a Lab Near You: Drag-and-Drop Virtual Worlds
>> Dealing with Data section p. 692

COVER
A word cloud generated from all of the content from the Dealing with Data special section beginning on p. 692. The size of each word relates to the frequency with which it appears in the combined texts. References and figure legends were included; common words, authors, and affiliations were excluded. All words are lowercase. See an expanded version of this cloud and other features at www.sciencemag.org/special/data/

784 Information for Authors
786 Science Careers
ESSAYS

689 Genome-Sequencing Anniversary: A Celebration of the Genome, Part II
D. Tutu

Genome Literacy
E. T. Dermietzelis

Personal Genomics: For One and for All
J. Wang

The Landscape of Human Evolution
P. Sabeti

My Genome, My Identity, My Health
C. D. M. Royal

What Will Drive Genomics Over the Next 10 Years?
A. Caplan

An Anniversary Party
K. Stefánsson

First Steps on a Long Road
E. Schadt

>> News stories pp. 660, 662, and 666

RESEARCH ARTICLE

730 Crystal Structure of the Eukaryotic 40S Ribosomal Subunit in Complex with Initiation Factor 1
J. Rabl et al.
The structure provides insight into how protein synthesis is initiated and into the evolution of the eukaryotic ribosome.

>> Perspective p. 681

REPORTS

736 Discovery of Powerful Gamma-Ray Flares from the Crab Nebula
M. Tavani et al.

739 Gamma-Ray Flares from the Crab Nebula
A. A. Abdo et al.
Gamma-ray observations of the Crab Nebula by two different space telescopes challenge particle acceleration theory.

>> Perspective p. 686

742 Negative Linear Compressibility and Massive Anisotropic Thermal Expansion in Methanol Monohydrate
A. D. Fortes et al.
At low temperatures, a simple molecular crystal can shrink along one axis when heated and expand along it when compressed.

>> Perspective p. 687

746 Increasing Solar Absorption for Photocatalysis with Black Hydrogenated Titanium Dioxide Nanocrystals
X. Chen et al.
An amorphous surface layer on titanium dioxide nanoparticles creates electronic states that allow longer-wavelength photoexcitation.

750 Complete Fourth Metatarsal and Arches in the Foot of Australopithecus afarensis
C. V. Ward et al.
A long bone of the foot of an early human indicates that its foot was stiff and arched, as in modern humans.

753 Embryological Evidence Identifies Wing Digits in Birds as Digits 1, 2, and 3
K. Tamura et al.
Digit identities in living birds are the same as in three-fingered dinosaurs, in agreement with paleontological evidence.

757 Structure of MyTH4-ERM Domains in Myosin Vla Tail Bound to Cargo
L. Wu et al.
Structural data suggest how mutations in a myosin tail cause deafness in humans.

760 HSPC117 Is the Essential Subunit of a Human tRNA Splicing Ligase Complex
J. Popow et al.
The human enzyme that joins transfer RNA exons together is discovered.

764 Proteome Half-Life Dynamics in Living Human Cells
E. Eden et al.
In times of stress, long-lived proteins increase their durability.

>> Perspective p. 683

768 K+ Channel Mutations in Adrenal Aldosterone-Producing Adenomas and Hereditary Hypertension
M. Choi et al.
Potassium channel mutations drive both cell growth and hormone production in an adrenal tumor that causes severe hypertension.

>> Perspective p. 685

772 Retrieval Practice Produces More Learning than Elaborative Studying with Concept Mapping
J. D. Karpicke and J. R. Blunt
Two different ways of thinking through texts are compared for learning value.

775 Leishmania RNA Virus Controls the Severity of Mucocutaneous Leishmaniasis
A. Ives et al.
An RNA virus of a parasite binds to human Toll-like receptor 3 and modulates host immune responses to the parasite.

778 Posttranslational Modification of Pili upon Cell Contact Triggers N. meningitidis Dissemination
J. Chamot-Rooke et al.
Regulated deaggregation allows meningitis-causing bacteria to propagate to new host cells and migrate across epithelia.
Science 331 (6018), 647-783.
