PERSPECTIVES
700 Climate Data Changes in the 21st Century
J. T. Overpeck et al.
703 Challenges and Opportunities of Open Data in Ecology
O. J. Reichman et al.
705 Changing the Equation on Scientific Data Visualization
P. Fox and J. Hendler
708 Challenges and Opportunities in Mining Neuroscience Data
H. Akil et al.

693 Cover

A word cloud generated from all of the content from the Dealing with Data special section beginning on p. 692. The size of each word relates to the frequency with which it appears in the combined texts. References and figure legends were included; common words, authors, and affiliations were excluded. All words are lowercase. See an expanded version of this cloud and other features at www.sciencemag.org/special/data.

LETTERS
673 Undercutting the Grant Process
A. M. Gade
674 Assessing Performance Through Understanding
P. Cintas
677 Leading the Charge to Virtual Meetings
W. W. Dolci et al.
679 No Mystery About the Polio Outbreak
C. L. Crawford

CORRECTIONS AND CLARIFICATIONS

BOOKS ET AL.
675 Disaster Deferred
S. Stein, reviewed by M. Hamburger
676 Atlas of Science
K. Börner, reviewed by M. A. Porter

POLICY FORUM
678 Measuring the Results of Science Investments
J. Lane and S. Bertuzzi

PERSPECTIVES
681 The Eukaryotic Ribosome
V. Ramakrishnan
682 Learning from Nature
J. O. Kephart
683 The Lives of Proteins
J. B. Plotkin
685 The Genetics of Primary Aldosteronism
J. W. Funder
686 Astronomy in the Time Domain
E. Bernardini
687 Unusual Thermoelastic Properties of Methanol Monohydrate
J. N. Grima et al.

688 Challenges and Opportunities of Open Data in Ecology
O. J. Reichman et al.
689 Changing the Equation on Scientific Data Visualization
P. Fox and J. Hendler
690 Challenges and Opportunities in Mining Neuroscience Data
H. Akil et al.

692 The Disappearing Third Dimension
T. Rowe and L. R. Frank
694 Advancing Global Health Research Through Digital Technology and Sharing Data
T. Leng
697 More Is Less: Signal Processing and the Data Deluge
R. G. Baraniuk
699 Ensuring the Data-Rich Future of the Social Sciences
G. King
702 Metaknowledge
J. A. Evans and J. G. Foster
704 Access to Stem Cells and Data: Persons, Property Rights, and Scientific Progress
D. J. H. Mathews et al.
706 On the Future of Genomic Data
S. D. Kahn

>> News stories pp. 660, 662, and 666

RESEARCH ARTICLE
730 Crystal Structure of the Eukaryotic 40S  
Ribosomal Subunit in Complex with  
Initiation Factor 1  
J. Rabl et al.  
The structure provides insight into how  
protein synthesis is initiated and into the  
evolution of the eukaryotic ribosome.  
>> Perspective p. 681

REPORTS
736 Discovery of Powerful Gamma-Ray Flares  
from the Crab Nebula  
M. Tavani et al.  
739 Gamma-Ray Flares from the Crab Nebula  
A. A. Abdo et al.  
Gamma-ray observations of the Crab Nebula  
by two different space telescopes challenge  
particle acceleration theory.  
>> Perspective p. 686

742 Negative Linear Compressibility and  
Massive Anisotropic Thermal Expansion  
in Methanol Monohydrate  
A. D. Fortes et al.  
At low temperatures, a simple molecular  
crystal can shrink along one axis when heated  
and expand along it when compressed.  
>> Perspective p. 687

746 Increasing Solar Absorption for  
Photocatalysis with Black Hydrogenated  
Titanium Dioxide Nanocrystals  
X. Chen et al.  
An amorphous surface layer on titanium  
dioxide nanoparticles creates electronic states  
that allow longer-wavelength photoexcitation.

750 Complete Fourth Metatarsal and Arches in  
the Foot of Australopithecus afarensis  
C. V. Ward et al.  
A long bone of the foot of an early human  
indicates that its foot was stiff and arched, as  
in modern humans.

753 Embryological Evidence Identifies Wing  
Digits in Birds as Digits 1, 2, and 3  
K. Tamura et al.  
Digit identities in living birds are the same  
as in three-fingered dinosaurs, in agreement  
with paleontological evidence.

757 Structure of MyTH4-FERM Domains in  
Myosin VIIa Tail Bound to Cargo  
L. Wu et al.  
Structural data suggest how mutations in a  
myosin tail cause deafness in humans.

760 HSPC117 Is the Essential Subunit of a  
Human tRNA Splicing Ligase Complex  
J. Popow et al.  
The human enzyme that joins transfer RNA  
exons together is discovered.

764 Proteome Half-Life Dynamics in  
Living Human Cells  
E. Eden et al.  
In times of stress, long-lived proteins  
increase their durability.  
>> Perspective p. 685

768 K⁺ Channel Mutations in Adrenal  
Aldosterone-Producing Adenomas  
and Hereditary Hypertension  
M. Choi et al.  
Potassium channel mutations drive both cell  
growth and hormone production in an adrenal  
tumor that causes severe hypertension.  
>> Perspective p. 685

772 Retrieval Practice Produces More Learning  
than Elaborative Studying with Concept  
Mapping  
J. D. Karpicke and J. R. Blunt  
Two different ways of thinking through texts  
are compared for learning value.

775 Leishmania RNA Virus Controls the  
Severity of Mucocutaneous Leishmaniasis  
A. Ives et al.  
An RNA virus of a parasite binds to human  
Toll-like receptor 3 and modulates host  
immune responses to the parasite.

778 Posttranslational Modification of Pili  
upon Cell Contact Triggers N. meningitidis  
Dissemination  
J. Chamot-Rooke et al.  
Regulated deaggregation allows meningitis- 
causing bacteria to propagate to new host  
cells and migrate across epithelia.

SCIENCE SIGNALING
www.sciencesIGNALING.org
TheSignal Transduction Knowledge Environment
8 February issue: http://scim.ag/ss020811

The Arabidopsis G protein α subunit exhibits properties necessary and sufficient for receptor-independent activation.

PERSPECTIVE: Gmax and Phospholipase C-β—Turn On, Turn Off, and Do It Fast E. M. Ross
A crystal structure illuminates reciprocal regulation between a G protein and its effector.

PERSPECTIVE: How Cells Use Pseudopods for Persistent Movement and Navigation P. J. M. Van Haastert
A model of pseudopod formation, splitting, and persistence describe how cells migrate.

GLOSSARY
Find out what MAX, FRK, and TIMP mean in the world of cell signaling.

SCIENCE TRANSLATIONAL MEDICINE
www.sciencetranslationalmedicine.org
Integrating Medicine and Science
9 February issue: http://scim.ag/stm020911

COMMENTARY: Power to the People—Participant Ownership of Clinical Trial Data S. F. Terry and P. F. Terry
The time has come to crowd-source data for diagnostic and therapeutics development.

COMMENTARY: Electronic Consent Channels—Preserving Patient Privacy Without Handcuffing Researchers R. H. Shelton
Policy-makers, researchers, and information technology leaders can help transform how we protect and use patient data.

RESEARCH ARTICLE: Photodynamic Ablation of Lymphatic Vessels and Intralymphatic Cancer Cells Prevents Metastasis T. Tammela et al.
Photodynamic therapy suppresses metastasis by eradicating both the in-transit tumor cells and their conduit to distant tissues.

RESEARCH ARTICLE: 5-Lipoxygenase Metabolite 4-HDHA Is a Mediator of the Antiangiogenic Effect of α-3 Polyunsaturated Fatty Acids P. Sapieha et al.
In mice, certain fatty acids in the diet are converted to a metabolite that blocks destructive vessel growth similar to diabetic retinopathy.
