Dealing with Data

INTRODUCTION
692 Challenges and Opportunities

NEWS
694 Rescue of Old Data Offers Lesson for Particle Physicists
696 Is There an Astronomer in the House?
698 May the Best Analyst Win

PERSPECTIVES
700 Climate Data Changes in the 21st Century
J. T. Overpeck et al.
>> Science Podcast
703 Challenges and Opportunities of Open Data in Ecology
O. J. Reichman et al.
705 Changing the Equation on Scientific Data Visualization
P. Fox and J. Hendler
708 Challenges and Opportunities in Mining Neuroscience Data
H. Akil et al.

712 The Disappearing Third Dimension
T. Rowe and L. R. Frank
714 Advancing Global Health Research Through Digital Technology and Sharing Data
T. Lang
R. G. Baraniuk
719 Ensuring the Data-Rich Future of the Social Sciences
G. King
721 Metaknowledge
J. A. Evans and J. G. Foster
725 Access to Stem Cells and Data: Persons, Property Rights, and Scientific Progress
D. J. H. Mathews et al.
728 On the Future of Genomic Data
S. D. Kahn

LETTERS
673 Undercutting the Grant Process
A. M. Gade

675 Assessing Performance Through Understanding
P. Cintas

676 Leading the Charge to Virtual Meetings
W. W. Dolci et al.

677 No Mystery About the Polio Outbreak
C. L. Crawford

674 CORRECTIONS AND CLARIFICATIONS

BOOKS ET AL.
675 Disaster Deferred
S. Stein, reviewed by M. Hamburger

676 Atlas of Science
K. Börner, reviewed by M. A. Porter

>> Dealing with Data section p. 692

COVER
A word cloud generated from all of the content from the Dealing with Data special section beginning on p. 692. The size of each word relates to the frequency with which it appears in the combined texts. References and figure legends were included; common words, authors, and affiliations were excluded. All words are lowercase. See an expanded version of this cloud and other features at www.sciencemag.org/special/data/

DEPARTMENTS
647 This Week in Science
650 Editors’ Choice
652 Science Staff
783 New Products
784 Information for Authors
786 Science Careers
ESSAYS

689  Genome-Sequencing Anniversary: A Celebration of the Genome, Part II
    D. Tutu

Genome Literacy
    E. T. Dermitzakis

Personal Genomics: For One and for All
    J. Wang

The Landscape of Human Evolution
    P. Sabeti

My Genome, My Identity, My Health
    C. D. M. Royal

What Will Drive Genomics Over the Next 10 Years?
    A. Caplan

An Anniversary Party
    K. Stefánsson

First Steps on a Long Road
    E. Schadt

>> News stories pp. 660, 662, and 666

RESEARCH ARTICLE

730  Crystal Structure of the Eukaryotic 40S Ribosomal Subunit in Complex with Initiation Factor 1
    J. Rabl et al.

The structure provides insight into how protein synthesis is initiated and into the evolution of the eukaryotic ribosome.
>> Perspective p. 681

REPORTS

736  Discovery of Powerful Gamma-Ray Flares from the Crab Nebula
    M. Tavani et al.

739  Gamma-Ray Flares from the Crab Nebula
    A. A. Abdo et al.

Gamma-ray observations of the Crab Nebula by two different space telescopes challenge particle acceleration theory.
>> Perspective p. 686

742  Negative Linear Compressibility and Massive Anisotropic Thermal Expansion in Methanol Monohydrate
    A. D. Fortes et al.

At low temperatures, a simple molecular crystal can shrink along one axis when heated and expand along it when compressed.
>> Perspective p. 687

746  Increasing Solar Absorption for Photocatalysis with Black Hydrogenated Titanium Dioxide Nanocrystals
    X. Chen et al.

An amorphous surface layer on titanium dioxide nanoparticles creates electronic states that allow longer-wavelength photocexcitation.

750  Complete Fourth Metatarsal and Arches in the Foot of Australopithecus afarensis
    C. V. Ward et al.

A long bone of the foot of an early human indicates that its foot was stiff and arched, as in modern humans.

753  Embryological Evidence Identifies Wing Digits in Birds as Digits 1, 2, and 3
    K. Tamura et al.

Digit identities in living birds are the same as in three-fingered dinosaurs, in agreement with paleontological evidence.

757  Structure of MyTH4-FERM Domains in Myosin VIIa Tail Bound to Cargo
    L. Wu et al.

Structural data suggest how mutations in a myosin tail cause deafness in humans.

760  HSPC117 Is the Essential Subunit of a Human tRNA Splicing Ligase Complex
    J. Popow et al.

The human enzyme that joins transfer RNA exons together is discovered.

764  Proteome Half-Life Dynamics in Living Human Cells
    E. Eden et al.

In times of stress, long-lived proteins increase their durability.
>> Perspective p. 683

768  K+ Channel Mutations in Adrenal Aldosterone-Producing Adenomas and Hereditary Hypertension
    M. Choi et al.

Potassium channel mutations drive both cell growth and hormone production in an adrenal tumor that causes severe hypertension.
>> Perspective p. 685

772  Retrieval Practice Produces More Learning than Elaborative Studying with Concept Mapping
    J. D. Karpicke and J. R. Blunt

Two different ways of thinking through texts are compared for learning value.

775  Leishmania RNA Virus Controls the Severity of Mucocutaneous Leishmaniasis
    A. Ives et al.

An RNA virus of a parasite binds to human Toll-like receptor 3 and modulates host immune responses to the parasite.

778  Posttranslational Modification of Pili upon Cell Contact Triggers N. meningitidis Dissemination
    J. Chamot-Rooke et al.

Regulated deaggregation allows meningitis-causing bacteria to propagate to new host cells and migrate across epithelia.

www.scienceexpress.org

The World’s Technological Capacity to Store, Communicate, and Compute Information
M. Hilbert and P. López
An inventory of the world’s technological capacity from 1986 to 2007 reveals the evolution from analog to digital technologies.
10.1126/science.1200815
>> Dealing with Data section p. 692; Science Podcast

Tomography of Reaction-Diffusion Microemulsions Reveals Three-Dimensional Turing Patterns
T. Bánsági Jr. et al.
Tomography reveals three-dimensional Turing patterns created by the Belousov-Zhabotinsky reaction running in a microemulsion.
10.1126/science.1200815

Dynamic Control of Chiral Space in a Catalytic Asymmetric Reaction Using a Molecular Motor
J. Wang and B. L. Feringa
Photoisomerization of a molecular catalyst changes its conformation and switches the chirality of its reaction product.
10.1126/science.1199844

SCIENCE SIGNALING
www.sciencesignaling.org

The Signaling Transduction Knowledge Environment
8 February issue: http://scim.ag/ss020811

RESEARCH ARTICLE: The Crystal Structure of a Self-Activating G Protein α Subunit Reveals Its Distinct Mechanism of Signal Initiation
J. C. Jones et al.
The Arabidopsis G protein α subunit exhibits properties necessary and sufficient for receptor-independent activation.

PERSPECTIVE: Gqα and Phospholipase C-β1—
Turn On, Turn Off, and Do It Fast
E. M. Ross
A crystal structure illuminates reciprocal regulation between a G protein and its effector.

PERSPECTIVE: How Cells Use Pseudopods for Persistent Movement and Navigation
P. J. M. Van Haastert
A model of pseudopod formation, splitting, and persistence describe how cells migrate.

GLOSSARY
Find out what MAX, FRK, and TIMP mean in the world of cell signaling.

SCIENCE TRANSLATIONAL MEDICINE
www.sciencetranslationalmedicine.org

Integrating Medicine and Science
9 February issue: http://scim.ag/stm020911

COMMENTARY: Power to the People—
Participant Ownership of Clinical Trial Data
S. F. Terry and P. F. Terry
The time has come to crowd-source data for diagnostic and therapeutics development.

COMMENTARY: Electronic Consent Channels—
Preserving Patient Privacy Without Handcuffing Researchers
R. H. Shelton
Policy-makers, researchers, and information technology leaders can help transform how we protect and use patient data.
>> Dealing with Data section p. 692 and www.sciencemag.org/special/data/

RESEARCH ARTICLE: Photodynamic Ablation of Lymphatic Vessels and Intralymphatic Cancer Cells Prevents Metastasis
T. Tammela et al.
Photodynamic therapy suppresses metastasis by eradicating both the in-transit tumor cells and their conduit to distant tissues.

RESEARCH ARTICLE: 5-Lipoxygenase Metabolite 4-HDHA Is a Mediator of the Antiangiogenic Effect of 0-3 Polyunsaturated Fatty Acids
P. Sapieha et al.
In mice, certain fatty acids in the diet are converted to a metabolite that blocks destructive vessel growth similar to diabetic retinopathy.
