ESSAYS

872  Genome-Sequencing Anniversary: A Celebration of the Genome, Part III
A Living Constitution
S. Jasanoﬀ

What Does a “Normal” Human Genome Look Like?
M. V. Olson

Of Mice and Humans
S. Yamanaka

Human Genome Sequencing: Celebrating 10 Years
L. Al-Gazali

Gene Patents: The Shadow of Uncertainty
R. Cook-Deegan

The Genomic Foundation Is Shifting
J. S. Mattick

Famine in the Presence of the Genomic Data Feast
E. Hoal

>> News story p. 838; Policy Forum p. 861

BREVIA

876  Synthetic Clonal Reproduction Through Seeds
M. P. A. Marinuthu et al.
Clonal reproduction is engineered in a sexual plant by manipulating conserved genes controlling meiosis.

RESEARCH ARTICLES

877  Extended Nucleation of the 1999 Mw 7.6 Izmit Earthquake
M. Bouchon et al.
Low-frequency seismic events may have been part of slip accumulation before a large earthquake.

>> News & Analysis p. 836

881  The Crystal Structure of the Signal Recognition Particle in Complex with Its Receptor
S. F. Ataide et al.
Guanine triphosphate controls changes in the signal recognition particle that facilitate transfer of the signal sequence to the translocon.

REPORTS

886  Metallic and Insulating Oxide Interfaces Controlled by Electronic Correlations
H. W. Jang et al.
The strength of electronic correlations dictates the transport properties of oxide interfaces.

889  Time-Reversed Lasing and Interferometric Control of Absorption
W. Wan et al.
Tuning the amplitude and phase of incident light can induce an enhancement of the optical absorption process.

892  Quantum Reflection of He$_2$ Several Nanometers Above a Grating Surface
B. S. Zhao et al.
The helium molecule can interact at large distances with the evanescent repulsion potential of the surface.

894  Spin Selectivity in Electron Transmission Through Self-Assembled Monolayers of Double-Stranded DNA
B. Göhler et al.
Photoelectrons emitted from a DNA-covered gold surface can have an unbalanced spin population of up to 60%.

>> Perspective p. 864

897  Capillary Forces in Suspension Rheology
E. Koos and N. Willenbacher
The addition of a small amount of a nonwetting immiscible fluid to a suspension can drastically alter its rheological properties.

>> Perspective p. 868

900  Steric Control of the Reaction of CH Stretch–Excited CH$_3$ with Chlorine Atom
F. Wang et al.
Spectroscopy elucidates the complex interplay between orientational and vibrational effects in a simple chemical reaction.

903  The Magnitude and Duration of Late Ordovician–Early Silurian Glaciation
S. Finnegan et al.
Carbonate isotopes reveal a link between past ocean temperatures and mass extinction.

906  Hibernation in Black Bears: Independence of Metabolic Suppression from Body Temperature
Ø. Tøien et al.
Hibernating black bears suppress their metabolic rate to 25% of normal, but only slightly reduce their body temperature.

>> Perspective p. 866

909  LysM-Type Mycorrhizal Receptor Recruited for Rhizobium Symbiosis in Nonlegume Parasponia
R. Op den Camp et al.
Parasponia uses a mycorrhizal signaling receptor essential for arbuscle formation to control rhizobium nodule symbiosis.

>> Perspective p. 865

912  The Antiproliferative Action of Progesterone in Uterine Epithelium Is Mediated by Hand2
Q. Li et al.
A progesterone-regulated transcription factor regulates stromal-epithelial communication in early pregnancy.

>> Perspective p. 863

916  Distinct Properties of the XY Pseudoautosomal Region Crucial for Male Meiosis
L. Kauppi et al.
Recombination between the sex chromosomes during sperm formation is controlled by a splicing isoform of the SPO11 protein.

>> Perspective p. 870

920  Classic Selective Sweeps Were Rare in Recent Human Evolution
R. D. Hernandez et al.
Much human genetic variation is likely due to purifying selection against deleterious mutations.

924  Early Tagging of Cortical Networks Is Required for the Formation of Enduring Associative Memory
E. Lesburguères et al.
Tagging of cortical networks at the time of encoding is crucial for long-lasting associative memories.

>> Perspective p. 869

928  Microtubule Stabilization Reduces Scarring and Causes Axon Regeneration After Spinal Cord Injury
F. Hellal et al.
Taxol stimulates the capacity of axons to grow after spinal cord injury.

SPECIAL SERIES

http://scim.ag/genome10

Human Genome 10th Anniversary

A special month-long series explores the impacts of the genomes revolution on science and society.

SCIENCE (ISSN 0036-8075) is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1200 New York Avenue, NW, Washington, DC 20005. Periodicals Mail postage (publication No. 484460) paid at Washington, DC, and additional mailing offices. Copyright © 2011 by the American Association for the Advancement of Science. This title SCIENCE is a registered trademark of the AAAS. Domestic subscription and membership (51 issues): $1149 ($174 allocated to subscription). Domestic institutional subscription (51 issues): $990. Foreign postage extra: Mexico, Caribbean (surface mail $55); other countries (air assist delivery) $185. First class, airmail, student, and emeritus rates on request. Canadian rates with GST available upon request, GST #12134 80324. Publications Mail Agreement Number 006424. Printed in the U.S.A.

Change of address: Allow 4 weeks, giving old and new addresses and 8-digit account number.

Prev. year issues: $35.00. Single copy sales: $10.00 current issue, $35.00 back issue prepaid includes surface postage; bulk rates on request. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that $25.00 per article is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923. The identification code for Science is 0036-8075. Science is indexed in the Reader’s Guide to Periodical Literature and in several specialized indexes.
