

Announcing the 2011 Recipients

The Canada Gairdner Awards are given in 3 categories; **International Awards** (seminal discoveries/contributions to medical science), the Global Health Award (scientific advances contributing to health in the developing world) and the Wightman Award (leadership in Canadian medicine).

Adrian Peter Bird PhD, The Wellcome Trust Centre for Cell Biology, University of Edinburgh, Edinburgh

Howard Cedar MD, PhD, **Department of Developmental** Biology and Cancer Research, Hebrew University, Jerusalem

Aharon Razin PhD, **Department of Developmental** Biology and Cancer Research, Hebrew University, Jerusalem

Robert Black MD, MPH, Edgar Berman Professor & Chair in International Health, Johns Hopkins University, Baltimore

For improving child survival and particularly for critical clinical and epidemiological studies to reduce childhood diarrheal deaths.

For their pioneering discoveries on DNA methylation and its role in gene expression.

Jules A. Hoffmann PhD, **Distinguished Class Research Director, CNRS and Group** Leader, Member of the Board of Administrators of CNRS, Strasbourg

For their ground breaking discoveries and definition of the family of Toll-like receptors and the array of microbial compounds that they recognize to provide innate resistance to infection.

Shizuo Akira MD, PhD, Director and Professor, WPI **Immunology Frontier** Research Center, Osaka

Michael Hayden CM, OBC, MB, ChB, PhD, Canada **Research Chair in Human** Genetics & Molecular Medicine, University of British Columbia, Vancouver

For his outstanding national and international leadership in medical genetics, entrepreneurship and humanitarianism.
