NATIONAL ASSOCIATION

PUBLICATIONS

Science & Technology Policy accelerates the pace of science, technology, and innovation by fostering the responsible use of science in public policy; strengthening communication among scientists, engineers, and the public; and promoting and advancing science, engineering, and innovation throughout the world for the benefit of all.

For reference, the American Association for the Advancement of Science (AAAS) serves its readers as a forum for the presentation and discussion of minority or conflicting points of view, including the presentation of minority or conflicting points of view, in discussion of important issues related to the advancement of science. This supports the science and technology enterprise; provide a voice for science and technology issues; promote the responsible use of science in public policy; strengthen and diversify the science and technology workforce; foster education in science and technology for everyone; and increase public access to science and technology; and advance international cooperation in science.
